Ref: FCC ID: **BBOMRHH325**

Dear Sirs:

Cobra Electronics Corporation requests acceptance of the labeling proposal described below for transceivers bearing FCC identifier BBOMRHH325.

The subject transceivers are compact handheld models as shown in figure 1, authorized under 47CFR Part 80 for maritime services.

Figure 1.

Because the majority of the transceiver housing is composed of display, speaker, operating controls, and a removable battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because the battery pack is a removable item. For this

reason, Cobra proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

Figure 2.

The consumer packaging for these models includes the battery pack as a separate item, NOT installed on the radio. As such, the FCC identifier will be readily visible to the user before the battery pack is installed and whenever the battery pack is removed or replaced. In this location, the label will also be protected from physical abuse and remain readable for the anticipated life of the device.

The consumer packaging for these models is a "gift box" which does not allow the transceiver to be seen at time of purchase. In order to meet the requirements of 47CFR Part 2.925 (d), Cobra will add the FCC identifier "**BBOMRHH325**" to the outside of the consumer "gift box" packaging.

Sincerely,

Robert Mudra
