Ref: FCC ID: **BBOMRHH350**

Dear Sirs:

Cobra Electronics Corporation requests acceptance of the labeling proposal described below for transceivers bearing FCC identifier BBOMRHH350.

The subject transceivers are compact handheld models as shown in figure 1, authorized under 47CFR Part 80 for Marine VHF services.

Figure 1.

Because the majority of the transceiver housing is composed of display, speaker, operating controls, and a clip on battery pack, there is extremely limited space available to attach the required label carrying the FCC identifier. Attaching the label to the battery pack is not acceptable because the battery pack is a removable item. For this reason, Cobra proposes placing the label carrying the FCC identifier inside the battery compartment as shown in figure 2.

figure 2.

The consumer packaging for these models includes the battery pack as a separate item, NOT installed in the radio. As such, the FCC identifier will be readily visible to the user before the battery pack is installed and whenever the battery pack is removed or replaced. In this location, the label will also be protected from physical abuse and remains readable for the anticipated life of the device.

The consumer packaging for these models is a cardboard giftbox and as such, the FCC identifier on the serial number label cannot be seen at time of purchase. In order to meet the requirements of 47 CFR Part 2.925 (d), Cobra will add the FCC identifier "BBOMRHH350" on the outside of the gift box packaging where it can be readily seen.

Sincerely,

A handwritten signature in black ink that reads "Chris deWaal". The signature is written in a cursive style.

Chris deWaal
Sr. Project Engineering
