Applicant's application for class II permissive change

Federal Communications Commission

Re: application for FCC ID: BCE-9400HS and BCE-9400BS

In order to allow for wideband operation SW changes are implemented to utilize part15.323(c)(5) if windows are available, we hereby apply for a class II permissive change for the above DECT system parts

We refer to the document: "Applicants self-declaration concerning DECT wideband system" for further explanation on compliance to part 15.323(c)(5).

Wideband parameters were originally tested and the original test reports submitted covers this.

Aalborg, Denmark
