

**The reasons for not putting FCC/IC TA info on the product label**

<p>29mm X 23mm X 20mm</p> 	<ul style="list-style-type: none"> <li>- Models OTE140R/OTE140L are very small and curved.</li> <li>- Due to the surface treatment of OTE140R/OTE140L, it is more complex to do printing and due to this the scrap will increase significantly and make it unreasonable expensive to print on the headset</li> <li>- FCC ID/IC ID will be included in the printed user manual and on the outer surface of the product box,</li> <li>- Marking on top surface would ruin the product design in a way so that the product would not be attractive to customers</li> </ul>
<p>Meet the app</p>  <p>Jabra Sport Life</p> <p>Customize earbud settings Manage your workouts with real-time coaching Test and analyze your fitness level.</p> 	<p>OTE140R/OTE140L will use accompanying app (Jabra Sport life app) with cell phone (evidence as attached below). E labeling will be extended to devices with a cell phone screen, which can display the <b>regulatory info</b> (such as the FCC /IC identification number, TELEC mark and ID, safety warnings etc.). The use of electronic labelling rather than permanent physical labels reduces costs for manufacturers as well.</p>

The following pages shows the way through the App menu (About -> Technical info -> Regulatory information).

This guidance will be added to the online documentation for Elite 7
