Subject: Request permission to use Bluetooth / WiFi test reports from model A1395 in our applications for model A1396 and model A1397

FCC IDs: BCGA1395, BCGA1396, BCGA1397

To Whom It May Concern:

Pursuant to KDB 996369, we request permission to use Bluetooth and WiFi test reports from model A1395 (FCC ID: BCGA1395) in our application for model A1396 (FCC ID: BCGA1396) and model A1397 (FCC ID: BCGA1397). Models A1395, A1396 and A1397 shares same enclosure, main logic board, display, battery and I/O design. They also use the same Bluetooth / WiFi card and antenna and operate using the same transmit power levels. Because of the similarities between the three systems, the test reports from model A1395 accurately reflect the Bluetooth and Wifi emissions from models A1396 and A1397.

Model A1395 is a tablet device with an 802.11a/b/g/n radio, and Bluetooth radio card.

Model A1396 is identical to A1395 except it also includes a cellular data module and antenna. The cellular radio in A1396 provides GPRS, EGPRS, UMTS, HSDPA) radio functions and supports the GPS receiver. The UMTS Bands I, II, V, VI, and VIII are supported.

Model A1397 is identical to A1395 except it also includes a different cellular data module and antenna and GPS receiver. The cellular radio in model A1397 provides CDMA2000 1xRTT, EV-DO Rev. A radio functions.

Best Regards
