Subject: Request permission to use Wi-Fi / Bluetooth test reports from model A1403 in our applications for model A1430 and A1416

FCC IDs: BCGA1403, BCGA1430, BCGA1416

To whom it may concern:

Pursuant to KDB 996369, we request permission to use Wi-Fi and Bluetooth test reports from model A1403 (FCC ID: BCGA1403) in our application for model A1430 (FCC ID: BCGA1430) and model A1416 (FCC ID: BCGA1416).

Models A1403, A1430 and A1416 share the same enclosure, main logic board, display, battery and I/O design. All three models use the same Wi-Fi / Bluetooth chipset/module and antenna, and operate using the same transmit power levels. Also, all three models run the same iOS software.

Model A1403 is a tablet device with an IEEE 802.11a/b/g/n and Bluetooth radio and a cellular radio and antennas that provide GPRS, EGPRS, UMTS, DC-HSDPA, HSPA+, CDMA 1xRTT, EV-DO Rev. A and LTE radio functions, and also supports a GPS receiver. The CDMA Bands supported are BC0, BC1 and BC6. The UMTS bands supported are FDD I, II, V, VI, VIII. The LTE band supported is FDD XIII.

Model A1430 is identical to A1403 except that the LTE Band support is different and that it does not have CDMA radio functions. Model A1430 supports only LTE Bands FDD IV and XVII.

Model A1416 is identical to A1403 except that it does not have any Cellular or GPS radio capabilities.

Sincerely,

Tiberiu Muresan
