

- *See the performance of a stock over time:* Tap an option from the time range selections at the top of the chart.
- *See the value for a specific date or time:* Touch and hold the chart with one finger.
- *See the difference in value over time:* Touch and hold the chart with two fingers.
- *See more details:* Below the chart, view additional stock details like 52-week high and low, Beta, EPS, and average trading volume.
- *Read news:* Swipe up to see additional news stories, then tap a story.

View your watchlist across devices

You can view your watchlist on your iPhone, iPad, iPod touch, and Mac when you're signed in with the same Apple ID.

On your iPhone, iPad, and iPod touch, go to Settings  > [your name] > iCloud, then turn on Stocks.

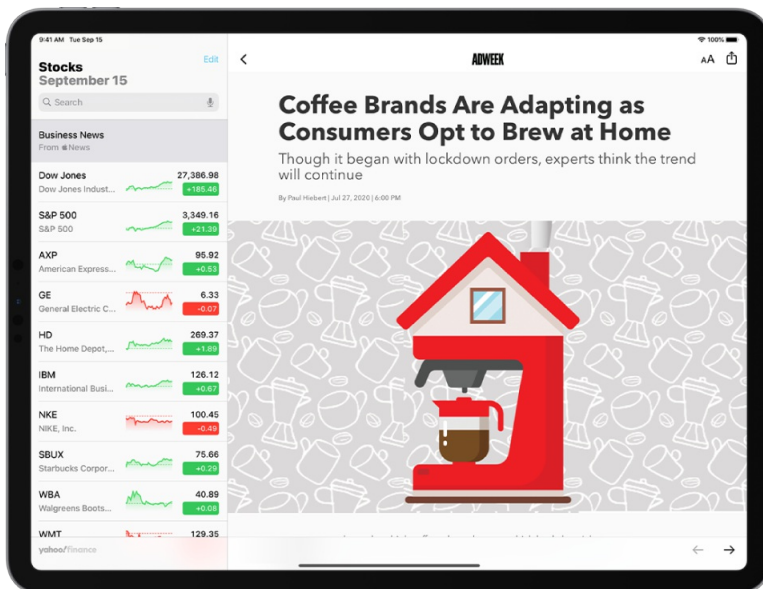

On your Mac, choose Apple menu  > System Preferences, then do one of the following:

- *macOS 10.15 or later:* Click Apple ID, select iCloud, then turn on Stocks.
- *macOS 10.14 or earlier:* Select iCloud, then turn on Stocks.

Read business news

Tap Business News above the watchlist, then swipe up on the newsfeed to view stories that highlight the current news driving the market. Stories about companies in your watchlist are grouped by ticker symbol. In countries where Apple News is available, you also see stories selected by the Apple News editors and stories from Apple News+. (Apple News and Apple News+ content is not available in all countries or regions.)

Note: If you tap an Apple News+ story and you're not an Apple News+ subscriber, tap the subscribe or free trial button, then follow the onscreen instructions. To learn more about Apple News+, see [Subscribe to Apple News+](#).

Tap a story to read it. While viewing a story, you have these options:

- *Return to your newsfeed in Stocks:* Tap < or Done.
- *Save the story to Apple News:* Tap .

Note: To save stories to Apple News, make sure to sign in with your Apple ID, then go to Settings  > [your name] > iCloud, then turn on News.

- *See more stories from the publication in Apple News:* Tap the publisher logo.
- *Change the text size:* Tap , then tap the smaller or larger letter to change the text size in the story.
- *Share the story:* Tap , tap Share Story, then choose a sharing option, such as Messages or Mail.

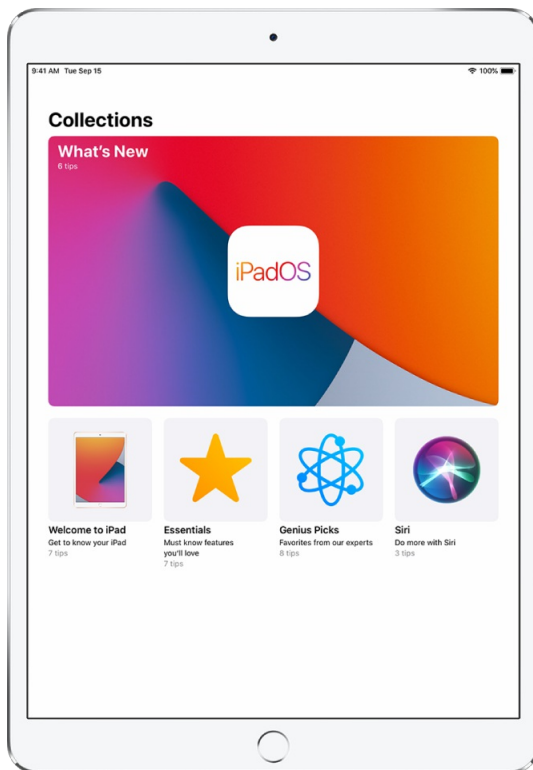

Stories from publications you have blocked in Apple News don't appear in the newsfeed. See [See news stories chosen just for you](#).

Add a Stocks widget to your iPad Home Screen

Add a Stocks widget to your iPad Home Screen to check stocks at a glance. Choose Watchlist to monitor several symbols from your watchlist on your Home Screen, or Symbol to monitor the performance of a single symbol.

Get tips on iPad

In the Tips app , see collections of tips that help you get the most from iPad.

Get Tips

In the Tips app, tap a collection to learn how to take better photos, use dictation, create a custom radio station, and much more.

New tips are added frequently.

Get notified when new tips arrive

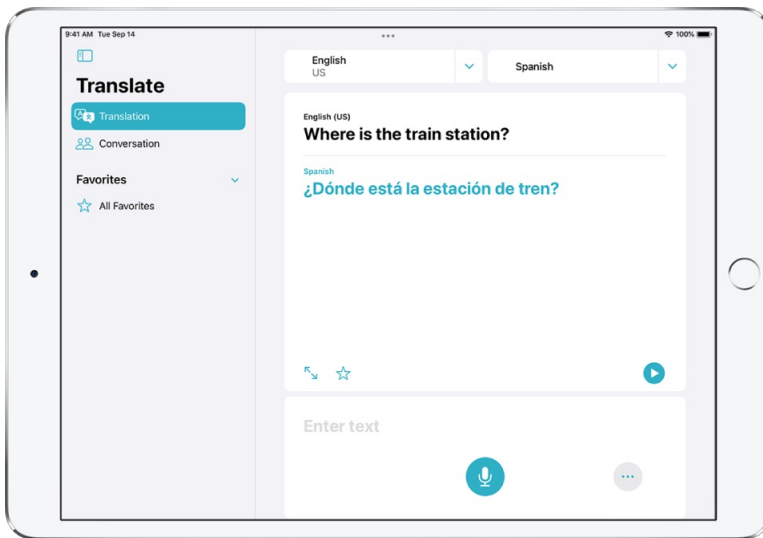

1. Go to Settings , then tap Notifications.
2. Tap Tips below Notification Style, then turn on Allow Notifications.

3. Choose options for the location and style of tip notifications, when they should appear, and so on.
-

Translate

Translate text, voice, and conversations on iPad

In the Translate app , you can translate text, voice, and conversations between any of the supported languages. You can even download specific languages to translate when you're not connected to the internet.

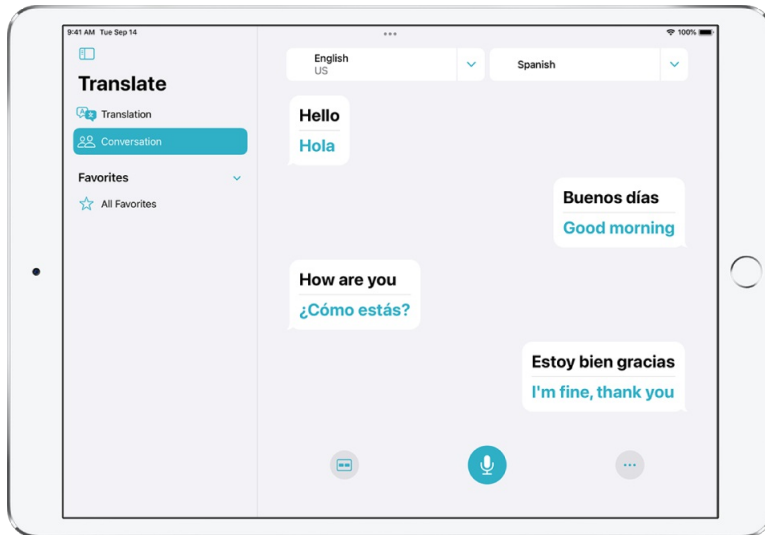

Translate text or your voice

1. Tap Translation, select the languages to translate between, then do any of the following:
 - Tap "Enter text", type a phrase, then tap Go.
 - Tap [the Listen button], then say a phrase.
2. When the translation is shown, do any of the following:
 - *Play the audio translation:* Tap [the Play button].
 - *Save the translation to your Favorites:* Tap [the favorite button].
 - *Look up a word in the dictionary:* Tap [the Dictionary button], then tap a word to see its definition.
 - *Show the translation to someone else:* Tap [the Enter Full Screen button].

You can also view your recent history.

Translate a conversation

In Conversation mode, iPad shows the translated text in chat bubbles from both sides of the conversation. Conversation mode works for downloaded languages even when you don't have an internet connection.

1. Tap Conversation.
2. Tap [the Listen button], then speak in one of the two languages.

💡 Tip: You can translate a conversation without tapping the microphone button before each person speaks. Tap [the More Options button], tap Auto Translate, then tap [the Listen button] to start the conversation. iPhone automatically detects when you start speaking and when you stop.

When chatting face-to-face, you can tap [the Face to Face button] so that each person can see the conversation from their side.

Download languages to iPad for offline translation

1. Tap Translation, tap [the Select Language button], scroll to the bottom of the list, then tap Manage Languages.
2. Tap the languages you want to download.

Translate text using the camera and in apps on iPad

You can translate text using the iPad camera and in apps such as Photos, Safari, Messages, Mail, supported third-party apps, and more.

Translate what you see through the camera

1. Open the Camera app , then position iPad so that the text appears on the screen.
 2. Tap [the Detect Text button], select the text to translate, then tap Translate.
-

Translate text in Photos

1. In the Photos app , navigate to the photo you want to translate.
 2. Tap [the Detect Text button], select the text to translate, then tap Translate.
-

Translate text in other apps

You can translate any text you select in apps such as Safari, Messages, Mail, supported third-party apps, and more.

1. Select the text you want to translate, then tap Translate.
-

Below the text translation, you can play the audio translation, copy the translation, change the language, or open the Translate app .

TV

Set up the Apple TV app on iPad

With the Apple TV app , you can watch original shows and movies from Apple TV+ as well as your other favorite shows, movies, sports, and live news. You can also add Apple TV channels such as Paramount+ and Showtime, watch titles from streaming services and cable providers, and purchase or rent movies and TV shows. The Apple TV app is on your iPhone, iPad, iPod touch, Mac, Apple TV, and supported smart TVs and streaming devices, so you can watch at home or wherever you go.

Note: The availability of the Apple TV app and its features and services (such as Apple TV+, Apple TV channels, sports, news, and supported apps) varies by country or region. See the Apple Support articles [Availability of Apple Media Services](#) and [Availability of supported apps in the Apple TV app](#).

Subscribe to Apple TV channels

If you subscribe to Apple TV channels (such as Paramount+ and Showtime), you can stream the ad-free content on demand or download it to watch offline. If you use Family Sharing, up to five other family members can [share the subscription](#) for no additional charge.

1. Tap Watch Now, browse the Channels row, then tap a channel you want to watch.

2. Tap the subscription button, review the free trial (if eligible) and subscription details, then follow the onscreen instructions.
-

Add your cable or satellite service to the Apple TV app

Single sign-on provides immediate access to all the supported video apps in your subscription package.

1. Go to Settings  > TV Provider.
2. Choose your TV provider, then sign in with your provider credentials.

If your TV provider isn't listed, sign in directly from the app you want to use.

Connect apps to the Apple TV app

The Apple TV app recommends new content or the next episode in a series you watch from a connected app (supported streaming apps only).

1. Tap Watch Now, scroll down to Streaming Apps, then browse the available apps.
 2. To connect an app, tap it, then follow the onscreen instructions.
-

Manage your connected apps, subscriptions, and viewing history

1. Tap Watch Now, then tap  or your profile picture at the top right.
2. Tap any of the following:

- *Connected Apps*: Connect or disconnect supported streaming apps.

Connected apps appear in the Apple TV app on all your devices where you're signed in with your Apple ID.

- *Manage Subscriptions*: Tap a subscription to change or cancel it.
 - *Clear Play History*: Remove your viewing history from all your Apple devices.
-

Subscribe to Apple TV+ on iPad

In the Apple TV app , you can subscribe to Apple TV+ and watch new, exclusive Apple Originals without ads. Stream Apple TV+ on demand on iPhone, iPad, iPod touch, Mac, Apple TV, and supported smart TVs and streaming devices, or download Apple Originals to watch offline on iPhone, iPad, iPod touch, and Mac.

You can subscribe to Apple TV+ or to Apple One, which includes Apple TV+ and other services. See the Apple Support article [Bundle Apple subscriptions with Apple One](#).

Note: Apple One and Apple TV+ aren't available in all countries or regions. See the Apple Support article [Availability of Apple Media Services](#).

Subscribe to Apple TV+

1. Tap Originals, then tap the subscription button.
 2. Review the free trial (if eligible) and subscription details, then follow the onscreen instructions.
-

Share Apple TV+ with family members

When you subscribe to Apple TV+ or Apple One Premier, you can [use Family Sharing](#) to share Apple TV+ with up to five other family members. Your family group members don't need to do anything—Apple TV+ is available to them the first time they open the App Store app after your subscription begins.

If you [join a family group](#) that subscribes to Apple TV+ or Apple One Premier, and you already subscribe, your subscription isn't renewed on your next billing date; instead, you use the group's subscription. If you join a family group that doesn't subscribe, the group uses your subscription.

Note: To stop sharing Apple TV+ with a family group, you can cancel the subscription, [leave the family group](#), or (if you're the family group organizer), stop using Family Sharing.

Change or cancel your Apple TV+ subscription

1. Tap Watch Now, then tap  or your profile picture at the top right.
 2. Tap Manage Subscriptions.
-

Find shows, movies, and more in the Apple TV app on iPad

The Apple TV app  brings your favorite shows, movies, sports, and live news together in one place. Quickly find and watch your favorites, pick up where you left off with Up Next, or discover something new—personalized just for you.

Discover shows and movies

In the Apple TV app, tap Watch Now, then do any of the following:

- *See what's up next:* In the Up Next row, find titles you recently added, rented, or purchased, catch the next episode in a series you've been watching, or resume what you're watching from the moment you left off.

- *Get recommendations:* Browse the What to Watch row for editorial recommendations that are personalized for you. Many rows throughout the app feature personalized recommendations based on your channel subscriptions, supported apps, purchases, and viewing interests.
 - *Browse Apple TV+:* In the Apple TV+ row, tap a title to see more information or play a trailer.
 - *Browse channels:* Scroll down to browse channels you subscribe to. In the Channels row, browse other available channels, then tap a channel to explore its titles.
 - *Watch live news:* (available in select countries or regions) Tap TV shows at the top, scroll down to the News row, then choose a news channel.
 - *See movies, shows, and episodes sent by friends in Messages:* Scroll down to the Shared with You row.
-

Search for a title, sport, team, cast member, Apple TV channel, or topic

Tap Search, then enter what you're looking for in the search field.

Explore sports (U.S. and Canada only)

You can browse by sport or league, watch games, and get live scores and notifications for close games.

1. Tap Watch Now, then tap Sports at the top.
2. Do any of the following:
 - *Browse by sport:* Scroll down to browse the events of many sports, such as football, baseball, and basketball. To narrow your browsing, scroll down, then choose a sport.
 - *Watch a game:* Tap the game.
 - *Choose your favorite teams:* Scroll to the bottom, then tap Your Favorite Teams.

Their games automatically appear in Up Next, and you'll receive notifications about your favorite teams.

To hide the scores of live games, go to Settings  > TV, then turn off Show Sports Scores.

Use the Up Next queue

- *Add an item to Up Next:* Tap the item to see its details, then tap Add.
- *Remove an item from Up Next:* Touch and hold the item, then tap Remove from Up Next.

- *Continue watching on another device:* You can see your Up Next queue in Watch Now on your iPhone, iPad, iPod touch, Mac, Apple TV, or supported smart TV where you're signed in with your Apple ID.
-

Watch shows and movies in the Apple TV app on iPad

Play shows and movies from the Apple TV app  on iPad. Purchases, rentals, Apple TV+, and Apple TV channels play in the Apple TV app, while content from other providers plays in their video app.

Buy, rent, stream, or download shows and movies

1. Tap an item to see its details.
2. Choose any of the following options (not all options are available for all titles):
 - *Watch Apple TV+ or Apple TV channels:* Tap Play. If you're not a current subscriber, tap Try It Free (available for eligible Apple ID accounts) or Subscribe.
 - *Choose a different video app:* If the title is available from multiple apps, scroll down to How To Watch, then choose an app.
 - *Buy or rent:* Confirm your selection, then complete the payment.

When you rent a movie, you have 30 days to start watching it. After you start watching the movie, you can play it as many times as you want for 48 hours, after which the rental period ends. When the rental period ends, the movie is deleted.

- *Download:* Tap . You can find the downloaded item in your Library and watch it even when iPad isn't connected to the internet.
- *Pre-order:* Review the details, then tap Pre-Order.

When the pre-ordered item becomes available, your payment method is billed, and you receive an email notification. If you turned on automatic downloads, the item is automatically downloaded to your iPad.

Note: The availability of Apple Media Services varies by country or region. See the Apple Support article [Availability of Apple Media Services](#).

Control playback in the Apple TV app

During playback, tap the screen to show the controls.

Control	Description
	Play

Control	Description
	Pause
	Skip backward 15 seconds; touch and hold to rewind
	Skip forward 15 seconds; touch and hold to fast-forward
	Change the aspect ratio; if you don't see the scaling control, the video already fits the screen perfectly
	Display subtitles and closed captions (if available)
	Stream the video to other devices
	Multitask with Picture in Picture ; you can continue to watch the video while you use another app
	Stop playback

Watch together with your friends on FaceTime

Using SharePlay, you can stream movies and TV shows while on a FaceTime call with friends. With synced playback and controls, you'll see everyone laugh, jump, and react to the same moments at the same time. The volume automatically adjusts, so you can keep talking while you watch. (Requires all FaceTime participants to have the Apple TV app and subscribe to Apple TV+.) See [Use SharePlay to watch and listen together in FaceTime on iPad](#).

Change the Apple TV app settings

1. Go to Settings  > TV.
2. Choose streaming options:
 - *Use Cellular Data:* (Wi-Fi + Cellular models) Turn off to limit streaming to Wi-Fi connections.
 - *Cellular:* (Wi-Fi + Cellular models) Choose High Quality or Automatic.
 - *Wi-Fi:* Choose High Quality or Data Saver.

High Quality requires a faster internet connection and uses more data.

3. Choose download options:

- *Use Cellular Data:* (Wi-Fi + Cellular models) Turn off to limit downloads to Wi-Fi connections.
- *Cellular:* (Wi-Fi + Cellular models) Choose High Quality or Fast Downloads.
- *Wi-Fi:* Choose High Quality or Fast Downloads.

High Quality results in slower downloads and uses more data.

- *Languages:* Choose a language. Each added audio language increases the download size. To remove a language, swipe left on the language you want to remove, then tap Delete.

The default language is the primary language for your country or region. If you turned on Audio Descriptions in Settings > Accessibility, audio descriptions are also downloaded.

4. To update your recommendations and Up Next queue based on what you watch on your iPad, turn on Use Play History.

What you watch on your iPad affects your personalized recommendations and Up Next on all your devices where you're signed in with your Apple ID.

Remove a download

1. Tap Library, then tap Downloaded.
2. Tap Edit, select the item you want to remove, then tap Delete.

Removing an item from iPad doesn't delete it from your purchases in iCloud. You can download the item to iPad again later.

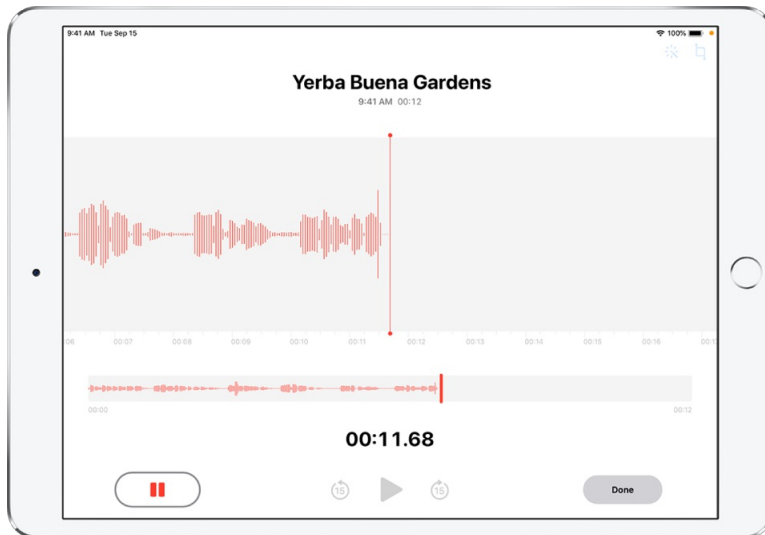

Voice Memos

Make a recording in Voice Memos on iPad

With the Voice Memos app , you can use iPad as a portable recording device to record personal notes, classroom lectures, musical ideas, and more. You can fine-tune your recordings with editing tools like trim, replace, and resume.

Record voice memos using the built-in microphone, a supported headset, or an external microphone.

When Voice Memos is turned on in iCloud settings or preferences, your recordings [appear and update automatically](#) on all your devices where you're signed in with the same Apple ID.

Make a basic recording

1. To begin recording, tap .

To adjust the recording level, move the microphone closer to or farther from what you're recording.

2. Tap Done to finish recording.

Your recording is saved with the name New Recording or the name of your location, if [Location Services](#) is turned on in Settings  > Privacy. To change the name, tap the recording, then tap the name and type a new one.

To fine-tune your recording, see [Edit a recording in Voice Memos](#).

Note: For your privacy, when you use Voice Memos to make recordings, an orange dot appears at the top of your screen to indicate your microphone is in use.

Use the advanced recording features

You can make a recording in parts, pausing and resuming as you record.

1. To begin recording, tap .

To adjust the recording level, move the microphone closer to or farther away from what you're recording.

To see more details while you're recording, swipe up from the top of the waveform.

2. Tap  to stop recording; tap Resume to continue.

3. To review your recording, tap ▶.

To change where playback begins, drag the playhead right or left across the small waveform at the bottom of the screen before you tap ▶.

4. To save the recording, tap Done.

Your recording is saved with the name New Recording or the name of your location, if [Location Services](#) is turned on in Settings  > Privacy. To change the name, tap the recording, then tap the name and type a new one.

To fine-tune your recording, see [Edit a recording in Voice Memos](#).

Mute the start and stop tones

While recording, use the iPad volume down button to turn the volume all the way down.

Use another app while recording

While you're recording, you can use another app, as long as it doesn't play audio on your device. If the app starts playing or recording sound, Voice Memos stops recording.

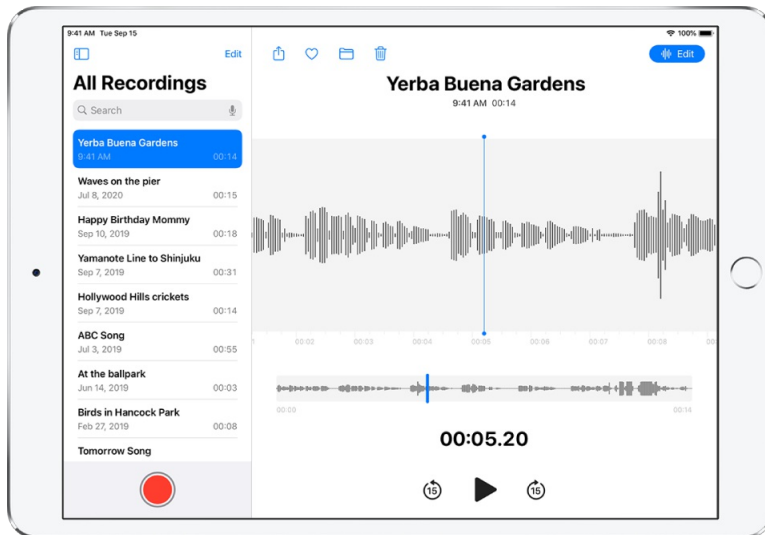

1. While recording, you can go to the Home Screen and open another app.
 2. To return to Voice Memos, tap the red bar at the top of the screen.
-

If Voice Memos is turned on in iCloud settings or preferences, your recording is saved in iCloud and appears automatically on all your devices where you're signed in with the same Apple ID.

Recordings using the built-in microphone are mono, but you can record stereo using an external stereo microphone that works with iPad. Look for accessories marked with the Apple "Made for iPad" or "Works with iPad" logo.

Play a recording in Voice Memos on iPad

In the Voice Memos app , tap a recording and use the playback controls to listen to it.

Control	Description
	Play
	Pause
	Skip backward 15 seconds
	Skip forward 15 seconds

 **Tip:** While the recording is open, you can tap its name to rename it.

Change the playback speed

You can play a recording at a faster or slower speed.

1. In the list of recordings, tap the recording you want to play.
2. Tap , then drag the slider toward the tortoise  for a slower speed, or toward the rabbit  for a faster speed.]
3. Tap , then tap  to play the recording.

Note: Changing the playback speed doesn't change the recording itself, only how fast it plays.

Enhance a recording

When playing a recording, you can enhance it to reduce background noise and echo.

1. Tap the recording you want to enhance.

2. Tap , then turn on Enhance Recording.
3. Tap , then tap  to play the recording.

Note: Turning on Enhance Recording doesn't change the recording itself, only how it sounds when you play it.

Skip over gaps when playing back a recording

Voice Memos can analyze your audio and automatically skip over gaps when playing it.

1. Tap the recording you want to play.
2. Tap , then turn on Skip Silence.
3. Tap , then tap  to play the recording.

Note: Turning on Skip Silence doesn't change the recording itself, only how it sounds when you play it.

Turn off the playback options

To return all the playback options to their original settings, tap , then tap Reset.

Edit or delete a recording in Voice Memos on iPad

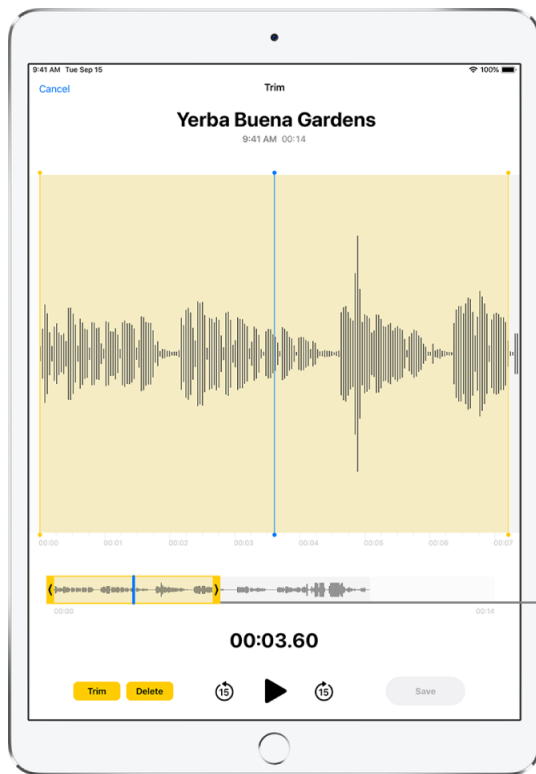

In the Voice Memos app , you can use the editing tools to fine-tune your recordings. You can remove parts you don't want, record over parts, or replace an entire recording.

Trim the excess

1. In the list of recordings, tap the recording you want to edit, then tap Edit at the top right.

2. Tap  at the top right, then drag the yellow trim handles to enclose the section you want to keep or delete.

You can pinch open to zoom in on the waveform for more precise editing.

Drag the yellow trim handles on the waveform to select a section of the recording.

To check your selection, tap .

3. To keep the selection (and delete the rest of the recording), tap Trim, or to delete the selection, tap Delete.
4. Tap Save, then tap Done.

Replace a recording

1. In the list of recordings, tap the recording you want to replace, then tap Edit at the top right.
2. Drag the waveform to position the playhead where you want to start recording new audio.

You can pinch open to zoom in on the waveform for more precise placement.

3. Tap Replace to begin recording (the waveform turns red as you record).

Tap  to pause; tap Resume to continue.

4. To check your recording, tap .

5. Tap Done to save the changes.

Delete a recording

Do one of the following:

- In the list of recordings, tap the recording you want to delete, then tap .
- Tap Edit above the list of recordings, select one or more recordings, then tap Delete.

Deleted recordings move to the Recently Deleted folder, where they're kept for 30 days by default. To change how long deleted recordings are kept, go to Settings  > Voice Memos > Clear Deleted, then select an option.

Recover or erase a deleted recording

1. Tap the Recently Deleted folder, then tap the recording you want to recover or erase.
 2. Do any of the following:
 - *Recover the selected recording:* Tap Recover.
 - *Recover everything in the Recently Deleted folder:* Tap Edit above the Recently Deleted list, then tap Recover All.
 - *Delete everything in the Recently Deleted folder:* Tap Edit above the Recently Deleted list, then tap Delete All.
-

Keep recordings up to date in Voice Memos on iPad

With the Voice Memos app  and iCloud, your audio recordings appear and are kept up to date automatically on all your devices (where you're signed in with the same Apple ID and Voice Memos is turned on in iCloud settings or preferences).

Go to Settings  > [your name] > iCloud, then turn on Voice Memos.

Organize recordings in Voice Memos on iPad

In the Voice Memos app , you can mark recordings as favorites and organize your recordings into folders.

Note: Apple Watch recordings, recently deleted recordings, and favorites are grouped into Smart Folders—folders that automatically gather files by type and subject matter.

Mark recordings as favorites

Do one of the following:

- In the list of recordings, tap the recording you want to mark as a favorite, then tap  above the waveform on the right.
- Tap Edit above the list of recordings, select one or more recordings, tap Move, then tap favorites.

Recordings marked as favorites automatically appear in the Favorites folder.

Organize recordings into folders

You can group related recordings together into folders so you can locate them easily.

1. Tap Edit above the list of recordings.
2. Select one or more recordings, then tap Move.
3. If you want to create a new folder for the recordings, tap , then type a name for the folder.
4. Tap the folder where you want to store the selected recordings.

To view your folders, tap ; tap a folder to check its contents.

To return to the list of recordings, tap All Recordings above the folders.

Delete or reorder folders

1. Tap  to go to the list of folders.
 2. Tap Edit above the folders, then do any of the following:
 - *Delete a folder:* Tap  next to the folder, then tap .
 - *Change the order of the folders:* Drag  next to any folder.
 3. Tap Done.
-

Search for or rename a recording in Voice Memos on iPad

You can search for your recordings in the Voice Memos app , and rename any recording.

Search for a recording

1. Swipe down from the middle of the list of recordings to reveal the search field.

2. Tap the search field, enter part or all of the recording name, then tap Search.
-

Rename a recording

A recording is initially saved with the name New Recording or the name of your location, if [Location Services](#) is turned on in Settings  > Privacy.

To change the name, tap the recording, tap the name, then type a new one.

Share a recording in Voice Memos on iPad

In the Voice Memos app , you can share a recording with others (or send it to your Mac or another device) via AirDrop, Messages, Mail, and more.

1. Tap the recording you want to share, then tap .
 2. Choose a sharing option, select or enter a recipient, then tap Done or .
-

Duplicate a recording in Voice Memos on iPad

In the Voice Memos app , you can duplicate a recording, which is useful when you need another version of it. You can make changes to the copy, save it, and [give it a new name](#).

Tap a recording, tap  above the waveform, then tap Duplicate.

The duplicate appears right below the original version in the list and has “copy” added to its name. You can tap the name, then type a new one.

Siri

Ask Siri on iPad

Talking to Siri is a quick way to get things done. Ask Siri to translate a phrase, set an alarm, find a location, report on the weather, and more. See [Find out what Siri can do on iPad](#).

On supported devices, audio of your requests is processed entirely on your iPad unless you choose to share it. You can choose to share your voice recordings with Apple for improvement purposes. To learn more, see the Apple Support article [Improve Siri and Dictation & Privacy](#).

For some requests, iPad must be [connected to the internet](#). Cellular charges may apply.

Set up Siri

If you didn't set up Siri when you first set up your iPad, go to Settings  > Siri & Search, then do any of the following:

- *If you want to summon Siri with your voice:* Turn on Listen for "Hey Siri."
- *If you want to summon Siri with a button:* Turn on Press Home for Siri (on an iPad with a Home button) or Press Top Button for Siri (on other iPad models).

To change additional Siri settings, see [Change Siri settings on iPad](#).

Summon Siri with your voice

When you summon Siri with your voice, Siri responds out loud.

1. Say "Hey Siri," then ask Siri a question or to do a task for you.

For example, say something like "Hey Siri, what's the weather for today?" or "Hey Siri, set an alarm for 8 a.m."

2. To ask Siri another question or to do another task, say "Hey Siri" again or tap .

Note: To prevent iPad from responding to "Hey Siri," place your iPad face down, or go to Settings  > Siri & Search, then turn off Listen for "Hey Siri."

You can also say “Hey Siri” to summon Siri while wearing AirPods. See <link to come> in the AirPods User Guide.

Summon Siri with a button

When you summon Siri with a button and iPad is muted, Siri responds silently. To change this, see [Change how Siri responds](#).

1. Do one of the following:
 - *On an iPad with a Home button:* Press and hold the Home button.
 - *On other iPad models:* Press and hold the top button.
 - *EarPods with Remote and Mic:* (Sold separately) Press and hold the center or call button.

2. When Siri appears, ask Siri a question or to do a task for you.

For example, say something like “What’s 18 percent of 225?” or “Set the timer for 3 minutes.”

3. To ask Siri another question or to do another task, tap .

You can also summon Siri with a touch on AirPods. See <link to come> in the AirPods User Guide.

Make a correction if Siri misunderstands you

- *Rephrase your request:* Tap , then say your request in a different way.
 - *Spell out part of your request:* Tap , then repeat your request by spelling out any words that Siri didn’t understand. For example, say “Call,” then spell the person’s name.
 - *Change a message before sending it:* Say “Change it.”
 - *Edit your request with text:* If you see your request onscreen, you can edit it. Tap the request, then use the onscreen keyboard.
-

Type instead of speaking to Siri

1. Go to Settings  > Accessibility > Siri, then turn on Type to Siri.
 2. To make a request, summon Siri, then use the keyboard and text field to ask Siri a question or to do a task for you.
-

If Siri doesn’t work as expected on your iPad, see the Apple Support article [If “Hey Siri” isn’t working on your iPhone or iPad](#).

Siri is designed to protect your information, and you can choose what you share. To learn more, see the Apple Support article [Ask Siri, Dictation & Privacy](#).

Find out what Siri can do on iPad

Use Siri on iPad to get information and perform tasks. Siri and its response appear on top of what you're currently doing, allowing you to refer to information onscreen.

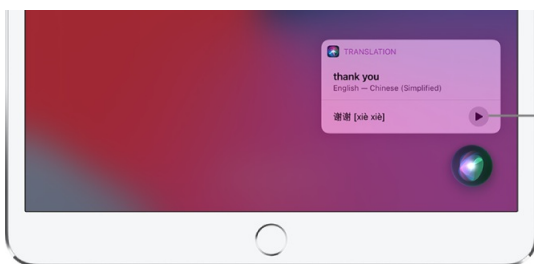

Siri is interactive. When Siri displays a web link, you can tap it to see more information in your default web browser. When the onscreen response from Siri includes buttons or controls, you can tap them to take further action. And you can tap Siri again to ask another question or do an additional task for you.

Below are some examples of what you can ask Siri to do. Additional examples appear throughout this guide. You can also ask Siri: Say something like "Hey Siri, what can you do?"

Use Siri to answer questions

Siri can quickly check facts, do calculations, or translate a phrase into another language. Say something like:

- "Hey Siri, what causes a rainbow?"
- "Hey Siri, what does a cat sound like?"
- "Hey Siri, what's the derivative of cosine x?"
- "Hey Siri, how do you say Thank You in Mandarin?"

Play the translation again.

Use Siri with apps

You can use Siri to control apps with your voice. Say something like:

- "Hey Siri, set up a meeting with Gordon at 9" to create an event in Calendar.
- "Hey Siri, add artichokes to my groceries list" to add an item to Reminders.

- “Hey Siri, what’s my update?” o have Siri tell you about the weather in your area, the news, your reminders and calendar events, and more.

For more examples, see any of the following:

- [Announce calls, messages, and more with Siri on iPad](#)
 - [Use Siri to play music on iPad](#)
 - [Control your home using Siri on iPad](#)
 - [Use Siri, Maps, and the Maps widget to get directions on iPad](#)
 - [Add Siri Shortcuts on iPad](#)
-

Use Siri to share information with contacts

You can share onscreen items like photos, webpages, content from Apple Music or Apple Podcasts, Maps locations, and more to [people in your contacts](#).

For example, when looking at a photo in your Photo library, say something like “Hey Siri, send this to mom” to create a new message with the photo.

Personalize your experience with Siri

The more you use Siri, the better it knows what you need. You can also tell Siri about yourself and change how and when Siri responds. See any of the following:

- [About Siri Suggestions on iPad](#)
- [Tell Siri about yourself on iPad](#)
- [Change Siri settings on iPad](#)

You can also [use accessibility features with Siri](#).

Siri is designed to protect your information, and you can choose what you share. To learn more, see the Apple Support article [Ask Siri, Dictation & Privacy](#).

Tell Siri about yourself on iPad

If you tell Siri about yourself—including things like your home and work addresses, and your relationships—you can get personalized service so you can say things like “Send a message to my husband” and “FaceTime mom.”

Tell Siri who you are

1. Open Contacts , then [fill out your contact information](#).
 2. Go to Settings  > Siri & Search > My Information, then tap your name.
-

Tell Siri about a relationship

Say something like “Hey Siri, Eliza Block is my wife” or “Hey Siri, Ashley Kamin is my mom.”

Keep what Siri knows about you up to date on your Apple devices

On each device, go to Settings , then sign in with the same Apple ID.

If you use iCloud, your Siri settings stay up to date across your Apple devices using end-to-end encryption. If you set up Hey Siri, a small sample of your requests also stay up to date using end-to-end encryption to improve personalized Hey Siri recognition on each device.

If you do not want Siri personalization to stay up to date across iPad and your devices, you can disable Siri in iCloud settings. Go to Settings > *[your name]* > iCloud, then turn off Siri.

Note: If you have Location Services turned on, the location of your device at the time you make a request will also be sent to Apple to help Siri and Dictation improve the accuracy of its response to your requests. To deliver relevant responses, Apple may use the IP address of your internet connection to approximate your location by matching it to a geographic region. See [Control the location information you share on iPad](#).

Announce calls, messages, and more with Siri on iPad

Siri can announce calls and notifications from apps like Messages on supported headphones. You can answer or reply using your voice without needing to say “Hey Siri.”

Announce Calls and Announce Messages also work with supported third-party apps.

Have Siri announce calls

With Announce Calls, Siri identifies incoming FaceTime calls, which you can accept or decline using your voice.

1. Go to Settings  > Siri & Search > Announce Calls, then choose Always, Headphones & Car, or Headphones Only.
 2. When a call comes in, Siri identifies the caller. Siri asks if you want to answer the call. Say “yes” to accept the call or “no” to decline it.
-

Have Siri announce notifications

Siri can automatically announce incoming notifications from apps like Messages and Reminders. Siri automatically enables app notifications for apps that use time sensitive notifications, but you can change the settings at any time. To learn more about time sensitive notifications, see [Set up a Focus on iPad](#).

1. Go to Settings  > Siri & Search > Announce Notifications, then turn on Announce Notifications.
2. Tap an app you want Siri to announce notifications from, then turn on Announce Notifications.

For some apps, you can also choose whether to announce all notifications or only time sensitive notifications.

For apps where you can send a reply, like Messages, Siri repeats what you said, then asks for confirmation before sending your reply. To send replies without waiting for confirmation, turn on Reply Without Confirmation.

Add Siri Shortcuts on iPad

Some apps offer shortcuts for things you do frequently, so you can ask Siri to do them for you. For example, a travel app might let you view your upcoming trip event just by asking Siri “Where am I going next?”

Add a suggested shortcut

Tap Add to Siri when you see a suggestion for a shortcut, then follow the onscreen instructions to record a phrase of your choice that performs the shortcut.

You can also use the Shortcuts app to create a new shortcut that uses Siri, or to manage, re-record, and delete existing Siri shortcuts. See the [Shortcuts User Guide](#).

Use a shortcut

Summon Siri, then speak your phrase for the shortcut. See [Ask Siri on iPad](#).

Based on your routines and how you use your apps, Siri also suggests shortcuts on the Home Screen, Lock Screen, and when you start a search. To turn off shortcut suggestions for an app, see [Change Siri settings for a specific app](#).

About Siri Suggestions on iPad

Siri makes suggestions for what you might want to do next, such as confirm an appointment or send an email, based on your routines and how you use your apps. For example, Siri might help when you do any of the following:

- *Glance at the Lock Screen or start a search:* As Siri learns your routines, you get suggestions for just what you need, at just the right time.
- *Create email and events:* When you start adding people to an email or calendar event, Siri suggests the people you included in previous emails or events.
- *Leave for an event:* If your calendar event includes a location, Siri assesses traffic conditions and notifies you when to leave.
- *Type:* As you enter text, Siri can suggest names of movies, places—anything you viewed on iPad recently. If you tell a friend you're on your way, Siri can even suggest your estimated arrival time.
- *Search in Safari:* Siri suggests websites and other information in the search field as you type.

(iPad Air 2 and later) Above the keyboard, Siri also suggests words and phrases based on what you were just reading.

- *Confirm an appointment or book a flight on a travel website:* (iPad Air 2 and later) Siri asks if you want to add it to your calendar.
- *Read News stories:* As Siri learns which topics you're interested in, they'll be suggested in News.

To change the settings for Siri Suggestions, see [Change Siri settings on iPad](#).

Your personal information—which is encrypted and remains private—stays up to date across all your devices where you're signed in with the same Apple ID. As Siri learns about you on one device, your experience with Siri is improved on your other devices. If you don't want Siri personalization to update across your devices, you can disable Siri in iCloud settings. See [Keep what Siri knows about you up to date on your Apple devices](#).

Siri is designed to protect your information, and you can choose what you share. To learn more, see the Apple Support article [Siri Suggestions, Search & Privacy](#).

Change Siri settings on iPad

You can change the voice for Siri, prevent access to Siri when your device is locked, and more.

For information about how to set up and use Siri, see [Ask Siri on iPad](#).

Change when Siri responds

Go to Settings  > Siri & Search, then do any of the following:

- *Prevent Siri from responding to the voice command "Hey Siri":* Turn off Listen for "Hey Siri."
- *Prevent Siri from responding to the Home button or the top button:* Turn off Press Home for Siri (on an iPad with a Home button) or Press Top Button for Siri (on other iPad models).
- *Prevent access to Siri when iPad is locked:* Turn off Allow Siri When Locked.
- *Change the language Siri responds to:* Tap Language, then select a new language.

You can also summon Siri by typing. See [Type instead of speaking to Siri](#).

Change how Siri responds

Go to Settings  > Siri & Search, then do any of the following:

- *Change the voice for Siri:* (not available in all languages) Tap Siri Voice, then choose a different variety or voice.
 - *Change when Siri provides voice responses:* Tap Siri Responses, then choose an option below Spoken Responses.
 - *Always see the response from Siri onscreen:* Tap Siri Responses, then turn on Always Show Siri Captions.
 - *See your request onscreen:* Tap Siri Responses, then turn on Always Show Speech.
-

Hide apps when you summon Siri

If you don't want the active app to remain visible behind Siri, go to Settings  > Accessibility > Siri, then turn off Show Apps Behind Siri.

Change where Siri Suggestions appear

Go to Settings  > Siri & Search, then turn on or off any of the following:

- Suggestions while Searching
- Suggestions on Lock Screen
- Suggestions on Home Screen
- Suggestions when Sharing

See [About Siri Suggestions on iPad](#).

Change Siri settings for a specific app

You can change which apps you can use with Siri, as well as the [Siri Suggestions](#) and [Siri Shortcuts](#) settings for any app.

1. Go to Settings  > Siri & Search, then select an app.
 2. Turn settings on or off.
-

Adjust the Siri voice volume

You can say something like, “Turn up the volume” or “Turn down the volume.”

Or use the volume buttons. See [Adjust the volume on iPad](#).

Retrain Siri with your voice

Go to Settings  > Siri & Search, turn off Listen for “Hey Siri,” then turn on Listen for “Hey Siri” again.

To change Siri accessibility settings, see [Use accessibility features with Siri on iPad](#).

If Siri doesn't work as expected on your iPad, see the Apple Support article [If “Hey Siri” isn't working on your iPhone or iPad](#).

Family Sharing

Set up Family Sharing on iPad

When you set up Family Sharing, family members can share purchases, subscriptions, locations, and more—without sharing accounts. You can also set up parental controls for children.

One adult family member—the *organizer*—sets up a family sharing group and invites up to five other family members to participate. When family members join, they have instant access to the shared content.

Family Sharing is available on eligible devices. See the Apple Support article [System requirements for iCloud](#).

Create a Family Sharing group

You only need to set up Family Sharing on one device. Then it's available on all your devices that are signed in with the same Apple ID.

1. Go to Settings  > [your name] > Family Sharing, then follow the onscreen instructions to set up your Family Sharing group.

When you add an adult family member, you can designate them as a parent or guardian. Learn about types of Family Sharing members.

2. Tap a feature you want to set up for your Family Sharing group, then follow the onscreen instructions.

Depending on the features you choose, you may be asked to set up a subscription. If you choose to share App Store, music, movie, TV, and book purchases with your family members, you agree to pay for any purchases they initiate while part of the Family Sharing group. Adult and teen family members can [turn off purchase sharing for themselves](#).

You can see what you're sharing with your family and adjust sharing settings at any time. Features you share with your family appear above those you haven't shared.

What you can do with Family Sharing

With a Family Sharing group, you can set up or share the following:

- *Apple and App Store subscriptions*: You can share Apple subscriptions, including iCloud+, and App Store subscriptions. See [Share subscriptions and iCloud storage with family members](#).
- *Purchases*: You can share iTunes Store, App Store, Apple Books, and Apple TV purchases. See [Download family members' purchases](#).

- *Locations:* When you share your location with family members, they can use the Find My app  to see your location and help locate a missing device. See [Share locations with family members and locate their lost devices on iPad](#).
 - *Apple Card and Apple Cash:* You can share Apple Card with trusted members of your Family Sharing group or set up an Apple Cash Family account for a child. See [Use Apple Cash and Apple Card with Family Sharing on iPad \(U.S. only\)](#).
 - *Parental controls:* You can manage your children's purchases and how they use their Apple devices. See [Set up Screen Time through Family Sharing](#).
-

Add or remove members from your Family Sharing group on iPad

In a [Family Sharing group](#), the organizer can add family members who have an Apple ID. The organizer, a parent, or a guardian can add a child to the group and create an Apple ID for them.

The organizer can remove members or disband the group, and family members who aren't teens with parental controls or children or can remove themselves. Children need to be moved to another Family Sharing group if you remove them from your group or disband the group. See [Move a child to another group using Family Sharing](#).

Learn about types of Family Sharing members.

Add a family member with an Apple ID

The organizer of the Family Sharing group can add a family member who has their own Apple ID.

1. Go to Settings  > [your name] > Family Sharing, then tap Add Member.
2. Tap Invite People, then follow the onscreen instructions.

You can send the invitation using AirDrop, Messages, or Mail. If you're near the family member, you can also tap Invite in Person and ask the family member to enter their Apple ID and password on your device.

Create an Apple ID for a child

If a child is too young to create their own Apple ID, the organizer, a parent, or a guardian can add the child to the Family Sharing group and create an Apple ID for them.

1. Go to Settings  > [your name] > Family Sharing.

2. Do one of the following:

- *If you're the organizer:* Tap Add Member, tap Create an Account for a Child, then follow the onscreen instructions.
- *If you're a parent or guardian:* Tap Add Child, then follow the onscreen instructions.

For more information about child accounts and the age at which a child can create their own Apple ID, see the Apple Support article [Family Sharing and Apple ID for your child](#).

Remove a member from a family group

The organizer of a Family Sharing group can remove other members. When a family member is removed, they immediately lose access to any shared content.

1. Go to Settings  > [your name] > Family Sharing.
 2. Tap [member's name], then tap Remove [member's name] from Family.
-

Leave a Family Sharing group

When you leave a Family Sharing group, you stop sharing your purchases and subscriptions with family members and immediately lose access to any content they've shared.

Note: The organizer can't leave the Family Sharing group. If you want to change the organizer, you must disband the group, and have another adult create a new one.

1. Go to Settings  > [your name] > Family Sharing.
 2. Tap [your name], then tap Stop Using Family Sharing.
-

Disband a Family Sharing group

The organizer can disband a family group. When a Family Sharing group is disbanded, all members immediately lose access to the shared content.

1. Go to Settings  > [your name] > Family Sharing > [your name].
 2. Tap Stop Using Family Sharing.
-

Share Apple and App Store subscriptions with family members on iPad

When you're in a [Family Sharing group](#), you can share Apple subscriptions and eligible App Store subscriptions with other family members.

If your Family Sharing group has purchase sharing turned on, any subscriptions shared with the group are billed directly to the organizer's Apple ID account.

Not all services are available in all countries or regions, and some selections are subject to content restrictions set in [Screen Time](#).

Share Apple subscriptions

1. Go to Settings  > [your name] > Family Sharing.
2. Tap a subscription, then follow the onscreen instructions.

See any of the following to learn more.

- *Apple Arcade*: See [Get apps in the App Store on iPad](#). All members of your family can download and play Apple Arcade games from the App Store. Each player gets a personalized account—your progress is carried over between devices.
- *Apple Fitness+*: See [All about Apple Fitness+](#) in the Apple Watch User Guide. All members of your family can access workouts in the Fitness app on their iPhone or iPad.
- *Apple Music*: See [Subscribe to Apple Music on iPad](#). Each family member gets their own music library and personal recommendations.
- *Apple News+*: See [Subscribe to Apple News+ on iPad](#). All members of your family can read Apple News+ publications for no additional charge.
- *Apple TV+ and Apple TV channels*: See [Set up the Apple TV app on iPad](#). Each family member can watch on their iPhone, iPad, iPod touch, Mac, Apple TV, and supported smart TVs and streaming devices, using their own Apple ID and password.
- *iCloud+*: See [Subscribe to iCloud+ on iPad](#). When you share iCloud+, all family members have access to iCloud+ features and storage. For storage, you only share the space—your photos and documents stay private and everyone keeps using their own accounts.

For information about combining your Apple subscriptions, see the Apple Support article [Bundle Apple subscriptions with Apple One](#).

Share App Store subscriptions

You can choose which eligible App Store  subscriptions you share with family members. For information about the App Store, see [Get apps in the App Store on iPad](#).

1. Go to Settings  > [your name] > Subscriptions.

2. Do either of the following:

- *Share all new subscriptions:* Turn on Share New Subscriptions. When you purchase a new subscription that's eligible for sharing, it's shared with your family members by default.
- *Change the settings of a specific subscription:* Tap a subscription, then turn Share with Family on or off.

If you don't see Share with Family, the subscription is not eligible for sharing.

To see which subscriptions you're already sharing, go to Settings  > [your name] > Family Sharing.

You can also share iTunes Store, App Store, Apple Books, and Apple TV purchases with family members. See [Download family members' purchases on iPad](#).

Download family members' purchases on iPad

When you [set up Family Sharing](#), you and up to five family members can share iTunes Store, App Store, Apple Books, and Apple TV purchases.

When your family shares App Store, music, movie, TV, and book purchases, all items are billed directly to the family organizer's Apple ID account. Adult and teen family members can [turn off purchase sharing for themselves](#). The family organizer can also require that children in the family group request approval for purchases or free downloads. See [Set up parental controls with Family Sharing on iPad](#).

Once purchased, an item is added to the initiating family member's account and eligible purchases are shared with the rest of the family.

Download shared purchases from the iTunes Store

1. Open the iTunes Store , then tap Purchased.
2. Tap My Purchases at the top left.
3. Choose a family member.
4. Tap a category (for example, Music) at the top of the screen, tap a purchased item, then tap  to download it.

Download shared purchases from the App Store

1. Open the App Store .
2. Tap —or your profile picture—at the top right.
3. Tap Purchased, choose a family member, then tap  next to a purchased item to download it.

Download shared purchases from Apple Books

1. Open the Books app .
2. Tap , or your profile picture, at the top right.
3. Tap the name of a family member under Family Purchases, then tap a category (for example, Books or Audiobooks).
4. Tap All, Recent Purchases, or a genre, then tap  next to a purchased item to download it.

Download shared purchases from the Apple TV app

1. Open the Apple TV app .
2. Tap Library, tap Family Sharing, then choose a family member.
3. Tap a category (for example, TV Shows or Movies) or a genre, tap a purchased item, then tap  to download it.

If you don't want to share a specific item with your family members, see the Apple Support article [Hide and unhide music, movies, TV shows, audiobooks, and books](#).

You can also [share Apple and App Store subscriptions with family members](#).

Stop sharing purchases with your family members on iPad

With [Family Sharing](#), the organizer can turn on purchase sharing. Any purchases family members make from the iTunes Store, the App Store, Apple Books, and Apple TV are billed directly to the organizer's Apple ID account.

If adult and teen family members don't want to share purchases and billing information with family members, they can turn off purchase sharing for themselves.

Note: The family organizer can also require that children in the family group request approval for purchases or free downloads. See [Set up parental controls with Family Sharing on iPad](#).

-
1. Go to Settings  > [your name] > Family Sharing.
 2. Tap Purchase Sharing, then turn off Share Purchases with Family.

If the organizer wants to turn off purchase sharing entirely, they can tap Stop Purchase Sharing.

If you don't want to share a specific item with your family members, see the Apple Support article [Hide and unhide music, movies, TV shows, audiobooks, and books](#).

Share locations with family members and locate their lost devices on iPad

With [Family Sharing](#), you can share your location with members of your Family Sharing group and help them find lost devices. When the family organizer sets up location sharing in Family Sharing settings, the organizer's location is automatically shared with everyone in the family. Then, family members can choose whether or not to share their location.

Share your location with family members

When you share locations with your family, they can [see your location in Find My](#). You can also [get notified when family members change their locations](#)—for example, if a child leaves school during school hours.

Note: To share your location, you must have Location Services turned on in Settings  > Privacy. See [Control the location information you share on iPad](#).

1. Go to Settings > [your name] > Family Sharing > Location Sharing, then turn on Share My Location.
2. If your iPad isn't currently sharing your location, tap Use This iPad as My Location.
3. Tap the name of a family member you want to share your location with, then tap Share My Location.

You can repeat this step for each family member you want to share your location with. Each family member receives a message that you're sharing your location and can choose to share their location with you.

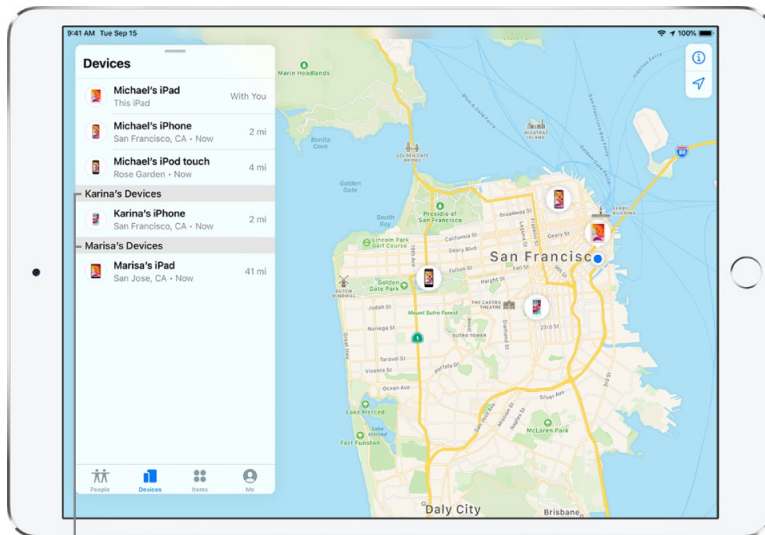

4. To stop sharing your location with a family member, tap the name of the family member, then tap Stop Sharing My Location.
-

Locate a family member's device

After you share your location with members of your Family Sharing group, they can help locate a missing device that you added to the Find My app.

See [Locate a device in Find My on iPad](#).

Your devices are at the top of the list, and your family members' devices are below yours.

Family members' devices appear below yours.

You can also use [Find My iPhone on iCloud.com](#) to locate a family member's missing device. See [Locate a device in Find My iPhone on iCloud.com](#) in the iCloud User Guide.

Use Apple Cash and Apple Card with Family Sharing on iPad (U.S. only)

You can use [Family Sharing](#) with Wallet. The organizer of the Family Sharing group can set up an Apple Cash account for a child. They can also share Apple Card with trusted members of their Family Sharing group.

Learn about types of Family Sharing members.

Set up Apple Cash Family

The Family organizer can set up Apple Cash Family for a child in Family Sharing settings, and use Wallet to see the card balance, monitor transactions, and limit who the child can send money to.

1. Go to Settings  > [your name] > Family Sharing.
2. Tap Apple Cash, then do one of the following:
 - *If there isn't a child in your family group:* Tap Add Child or Create A Child Account, then follow the onscreen instructions.
 - *If there is a child in your family group:* Tap the child's name, tap Set Up Apple Cash, then follow the onscreen instructions.

For more information about system requirements and how to manage Apple Cash accounts, see the Apple Support article [Set up and use Apple Cash Family](#).

You can also turn on Ask to Buy, so children must receive approval for purchases or free downloads. See [Turn on Ask to Buy for a child](#).

Set up Apple Card Family

The Family organizer can invite one eligible member of their Family Sharing group who is 18 years or older to co-own Apple Card. Members of the Family Sharing group who are 13 years or older can be added as participants.

1. Go to Settings  > Wallet & Apple Pay, then tap Apple Card.
2. Tap Share My Card, then follow the onscreen instructions.

For more information about what owners, co-owners, and participants can do with Apple Card, see the Apple Support article [Set up Apple Card Family and add a co-owner and participants](#).

Set up parental controls with Family Sharing on iPad

With [Family Sharing](#), the organizer can set up parental controls for children in the Family Sharing group. You can use Screen Time to manage how your children use their Apple devices. You can also turn on Ask to Buy, so children must receive approval for purchases or free downloads.

Learn about types of Family Sharing members.

Set up Screen Time for a child

When you set up Screen Time for a child, you can manage settings for downtime, allowances for app use, the contacts your child communicates with, content ratings, and more. To use Screen Time, your child must be using an eligible device. See the Screen Time section in the Apple Support article [System Requirements for iCloud](#).

1. Go to Settings  > [your name] > Family Sharing > Screen Time.
2. Tap the name of a family member, tap Turn on Screen Time, then follow the onscreen instructions.

For information about Screen Time settings, see [Set up Screen Time for a family member on iPad](#).

Important: If you set up Screen Time for a child with Family Sharing and you forget the family Screen Time passcode, you can reset it. See the Apple Support article [If you forgot your Screen Time passcode](#).

Turn on Ask to Buy for a child

When you set up Ask to Buy, a child's purchases must be approved by the family organizer or a parent or guardian in the family group.

1. Go to Settings  > [your name] > Family Sharing.
2. Tap Ask To Buy, then do one of the following:
 - *If there isn't a child in your family group:* Tap Add Child or Create A Child Account, then follow the onscreen instructions.
 - *If there is a child in your family group:* Tap the child's name, then turn on Ask To Buy.

Note: Age restrictions for Ask To Buy vary by region. In the United States, the family organizer can turn on Ask To Buy for any family member under age 18; for children under age 13, it's turned on by default.

For more information, see the Apple Support article [Approve what kids buy with Ask to Buy](#).

You can also set up an Apple Cash Family account for a child. See [Use Apple Cash and Apple Card with Family Sharing on iPad \(U.S. only\)](#).

For information about child accounts in Family Sharing, see the Apple Support article [Family Sharing and Apple ID for your child](#).

Screen Time

Keep track of your screen time on iPad

You can use Screen Time to get information about how you and your family members spend time on your devices—which apps and websites you use, how often you pick up your device, and more. You can use this information to help you make decisions about managing the time you spend on devices. You can also schedule time away from your screen, set time limits for app use, and more.

Turn on Screen Time

Before you can view your app and device usage, you need to turn on Screen Time.

1. Go to Settings  > Screen Time.
2. Tap Turn On Screen Time, then tap Continue.
3. Tap This is My iPad if you're setting up Screen Time for yourself on your iPad.

If you're setting up Screen Time for your child (or family member), tap This is My Child's iPad.

4. To use Screen Time on all your Apple devices, swipe up and turn on Share Across Devices.

If you've set up Family Sharing, you can turn on Screen Time for a family member through Family Sharing on your device. See [Set up parental controls with Family Sharing on iPad](#).

View your Screen Time report

After you turn on Screen Time, you can view a report of your device use with information including how much time you spend using certain kinds of apps, how often you pick up your iPad and other devices, what apps send you the most notifications, and more.

1. Go to Settings  > Screen Time.

2. Tap See All Activity, then tap Week to see a summary of your weekly use, or tap Day to see a summary of your daily use.

Use the Screen Time widget to check your device use at a glance

To keep track of your device use from the Home Screen, [add a widget to your Home Screen](#) for Screen Time. The widget displays information from your Screen Time summary—the larger the widget you add, the more information it displays. You can quickly check your device use by glancing at the widget.

If you [set up Screen Time for family members](#) through Family Sharing, you can tap the widget to see a list of the people in your family group. Tap the name of a family member whose report you want to view.

Use Screen Time on all your devices

To share your Screen Time settings and reports across all your devices, make sure you're signed in with the same Apple ID on each device and Share Across Devices is turned on.

1. Go to Settings  > Screen Time.
2. Swipe up, then turn on Share Across Devices.

Set up Screen Time for yourself on iPad

With Screen Time, you can manage your app use, schedule time away from your devices, and more. You can change or turn off any of these settings at any time.

Schedule time away from the screen

In Screen Time, you can block apps and notifications for periods when you want time away from your devices. For example, you might want to schedule downtime during meals or at bedtime.

1. Go to Settings  > Screen Time, then turn on Screen Time if you haven't already.
 2. Tap Downtime, then turn on Downtime.
 3. Select Every Day or Customize Days, then set the start and end times.
-

Turn on downtime on demand

During downtime, only calls, messages, and apps you choose to allow are available. You can receive calls from contacts you've selected to [allow communication with during downtime](#), and you can use apps you've chosen to [allow at all times](#).

When you turn on downtime on demand, a five-minute reminder is sent before downtime is turned on. It stays on until the end of the day, or until the beginning of your scheduled downtime, if you've scheduled it.

1. Go to Settings  > Screen Time, then [turn on Screen Time](#) if you haven't already.
2. Tap Downtime, then tap Turn On Downtime Until Tomorrow, or Turn On Downtime Until Schedule (if Scheduled is turned on).

To turn off downtime on demand, tap Turn Off Downtime.

Note: You can also turn on downtime on demand for a family member, either directly on their device, or through Family Sharing on your device.

Set limits for app use

You can set a time limit for a category of apps (for example, Games or Social Networking) and for individual apps.

1. Go to Settings  > Screen Time, then turn on Screen Time if you haven't already.
2. Tap App Limits, then tap Add Limit.

3. Select one or more app categories.

To set limits for individual apps, tap the category name to see all the apps in that category, then select the apps you want to limit. If you select multiple categories or apps, the time limit you set applies to all of them.

4. Tap Next, then set the amount of time allowed.

To set an amount of time for each day, tap Customize Days, then set limits for specific days.

5. When you finish setting limits, tap Add.

To temporarily turn off all app limits, tap App Limits on the App Limits screen. To temporarily turn off a time limit for a specific category, tap the category, then turn off App Limit.

To remove a limit for a category, tap the category, then tap Delete Limit.

Set communication limits

In Screen Time, you can either allow or block communication—including incoming and outgoing phone calls, FaceTime calls, and messages—from certain contacts in iCloud, either at all times or during certain periods.

1. If you haven't already turned on Contacts in iCloud, go to Settings  > [your name] > iCloud, then turn on Contacts.
2. Go to Settings  > Screen Time, then turn on Screen Time if you haven't already.
3. Tap Communication Limits, tap During Screen Time, then select one of the following for communication at all times (other than downtime):
 - *Contacts Only*: To allow communication only with your contacts.
 - *Contacts & Groups with at Least One Contact*: To allow one-on-one conversations only with people in your contacts and group conversations that include at least one person in your contacts.
 - *Everyone*: To allow conversations with anyone, including unknown numbers.
4. Tap Back at the top left, then tap During Downtime.

The option you selected for During Screen Time is already set here. You can change this setting to Specific Contacts, then choose one of the following:

- *Choose From My Contacts*: To select contacts to allow communication with during Downtime.
- *Add New Contact*: To add a person to your contacts and allow communication with that person during downtime.

If someone who's currently blocked by your Communication Limit settings tries to call you or send you a message, their communication won't go through.

If you try to call or send a message to someone who's currently blocked by your Communication Limit settings, their name or number appears in red in your list of recent calls or messages, and your communication won't go through. You can communicate with them when the communication limit is changed. If the limit applies only to downtime, you receive a Time Limit message. You can resume communication with the contact when downtime is over.

To resume communication with contacts who are blocked by your Communication Limit settings, change the settings by following the steps above.

Choose apps and contacts you want to allow at all times

In Screen Time, you can specify apps that can be used, and contacts you can communicate with, at all times—even during downtime (for example, in the event of an emergency).

1. Go to Settings  > Screen Time > Always Allowed.
2. Below Allowed Apps, tap  or  next to an app to add or remove it from the Allowed Apps list.
3. To specify contacts you want to allow communication with, tap Contacts.

The option you selected in Communication Limits appears here. You can change this setting to Specific Contacts, then choose one of the following:

- *Choose From My Contacts:* To select specific people to allow communication with.
- *Add New Contact:* To add a new contact and allow communication with that person.

4. Tap Back at the top left.
-

Set content and privacy restrictions

You can block inappropriate content and set restrictions for iTunes Store and App Store purchases.

1. Go to Settings  > Screen Time, then turn on Screen Time if you haven't already.
2. Tap Content & Privacy Restrictions, turn on Content & Privacy Restrictions, then tap options to set content allowances for iTunes Store and App Store purchases, app use, content ratings, and so on.

You can also set a passcode that's required before changing settings.

3. Select options to set content allowances for iTunes Store and App Store purchases, app use, content ratings, and more.

Note: To restrict [SharePlay apps in FaceTime calls](#), go to Content & Privacy Restrictions > Allowed Apps, then turn off SharePlay. To allow SharePlay, turn it on.

To share your Screen Time settings and reports across all your devices, make sure you're signed in with the same Apple ID and [Share Across Devices is turned on](#).

Set up Screen Time for a family member on iPad

Screen Time lets you see how family members are using their devices, so you can structure the time they spend on them. You can set up Screen Time for a family member on their device or, if you've set up Family Sharing, you can set up Screen Time for a family member on your device. See [Set up parental controls with Family Sharing on iPad](#) and the Apple Support article [Family Sharing and Apple ID for your child](#).

Set downtime and app limits on a family member's device

1. On your family member's device, go to Settings  > Screen Time.
2. Tap Turn On Screen Time, tap Continue, then tap This is My Child's iPad.
3. To schedule downtime for your family member (time away from the screen), enter the start and end times, then tap Set Downtime.
4. To set limits for categories of apps you want to manage (for example, Games or Social Networking), select the categories.

To see all the categories, tap Show All Categories.

5. Tap Set, enter an amount of time, then tap Set App Limit.
6. Tap Continue, then enter a Screen Time passcode for managing your family member's Screen Time settings.

Note: You can also [turn on downtime on demand](#) for a family member, either directly on their device, or through Family Sharing on your device (if you've set up Family Sharing).

Set communication limits on a family member's device

You can block incoming and outgoing communication on your family member's device—including phone calls, FaceTime calls, and messages—from specific contacts, either at all times or during certain periods.

1. If you haven't already turned on Contacts in iCloud on your family member's device, go to Settings  > [child's name] > iCloud, then turn on Contacts.

Note: You can only manage your family member's communication if they're using Contacts in iCloud.

2. On your family member's device, go to Settings  > Screen Time.

3. If you haven't already turned on Screen Time, tap Turn On Screen Time, tap Continue, then tap This is My Child's iPad.

4. Tap Communication Limits, then do any of the following:

- *Limit communication at any time:* Tap During Screen Time, then select Contacts Only, Contacts & Groups with at Least One Contact, or Everyone.

- *Limit communication during downtime:* Tap During Downtime. The option you selected for During Screen Time is already set here. You can change this setting to Specific Contacts.

If you select Specific Contacts, tap either Choose From My Contacts or Add New Contact to select people you want to allow communication with during downtime.

- *Manage a child's contacts:* If you're using Family Sharing, you can manage your child's contacts. Tap Manage [*child's name*] Contacts.

If your child already has contacts in iCloud, they receive a notification on their device asking them to approve the request to manage them. If they don't have contacts, they don't get a notification and you can immediately add contacts.

When you manage your child's contacts, a new row appears beneath Manage [*child's name*] Contacts to show how many contacts they have. You can view and edit those contacts by tapping that row.

- *Allow contact editing:* Tap Allow Contact Editing to turn off this option and prevent your child from editing their contacts.

Turning off contact editing and limiting communication at any time to Contacts Only is a good way to control who your child can communicate with and when they can be contacted.

If someone who's currently blocked by the Communication Limit settings tries to call your family member (by phone or FaceTime), or send them a message, their communication won't go through.

If your family member tries to call or send a message to someone who's currently blocked by the Communication Limit settings, the recipient's name or number appears in red with a Screen Time hourglass icon, and the communication won't go through. If the limit applies only to downtime, your family member receives a Time Limit message and can resume communication with the contact when downtime is over.

To allow your family member to communicate with contacts who are blocked by the Communication Limit settings, change the settings by following the steps above.

Choose which apps to allow at all times on a family member's device

You can set which apps you want your family member to be able to use at any time.

1. On your family member's device, go to Settings > Screen Time.

2. If you haven't already turned on Screen Time, tap Turn On Screen Time, tap Continue, then tap This is My Child's iPad.
3. Tap Always Allowed, then tap  or  next to an app to add or remove it from the list.

Note: If your family member needs health or accessibility apps, make sure they're in the Allowed Apps list. If Messages isn't always allowed, your family member may not be able to send or receive messages (including to emergency numbers and contacts) during downtime or after the app limit has expired.

Set content and privacy restrictions on a family member's device

You can help ensure that the content on your family member's device is age appropriate by limiting the explicitness ratings in Content & Privacy Restrictions.

1. On your family member's device, go to Settings  > Screen Time.
2. If you haven't already turned on Screen Time, tap Turn On Screen Time, tap Continue, then tap This is My Child's iPad.
3. Tap Content & Privacy Restrictions, then turn on Content & Privacy Restrictions.
4. Choose specific content and privacy options, then tap .

Note: To restrict [SharePlay in FaceTime calls](#), go to Content & Privacy Restrictions > Allowed Apps, then turn off SharePlay. To allow SharePlay, turn it on.

To prevent changes to the maximum headphone volume, tap Reduce Loud Sounds, then select Don't Allow. See [Reduce loud headphone sounds in Settings](#).

Add or change Screen Time settings for a family member later

To add or change Screen Time settings later, follow the steps described in [Set up Screen Time for yourself on iPad](#).

Important: If you set up Screen Time for a family member on their device (not through Family Sharing), and you forget the Screen Time passcode, you can use your Apple ID to reset it. However, if you set up Screen Time for a family member on your device through Family Sharing and you forget your Screen Time passcode, you can reset it on your device using your device passcode, Touch ID, or Face ID.

Get a report of your device use on iPad

When you have Screen Time set up, you can get a report of your device use.

1. Go to Settings  > Screen Time.
2. Tap See All Activity, then do any of the following:
 - Tap Week to see a summary of your weekly use.
 - Tap Day to see a summary of your daily use.

You can also view your summary by tapping a Screen Time Weekly Report notification when one appears on your screen. (If the notification disappears, you can find it in [Notification Center](#). Alternatively, you can [add a widget](#) for Screen Time to the Home Screen.

Apple Pay

Set up Apple Pay on iPad

Set up Apple Pay to make secure payments in apps and on websites that support Apple Pay. In Messages, you can send and receive money from friends and family or make purchases using Business Chat.

Add a credit or debit card

1. Go to Settings  > Wallet & Apple Pay.
2. Tap Add Cards. You may be asked to sign in with your Apple ID.
3. Do one of the following:
 - *Add a new card*: Position iPad so that your card appears in the frame, or enter the card details manually.
 - *Add your previous cards*: Select the card associated with your Apple ID, cards you use with Apple Pay on your other devices, or cards that you removed. Tap Continue, then enter the CVV number of each card.

Alternatively, you may be able to add your card from the app of the bank or card issuer.

The card issuer determines whether your card is eligible for Apple Pay, and may ask you for additional information to complete the verification process.

View the information for a card and change its settings

1. Go to Settings  > Wallet & Apple Pay.
 2. Tap a card, then do any of the following:
 - Tap Transactions to view your recent history. To hide this information, turn off Transaction History. To view all your Apple Pay activity, see the statement from your card issuer.
 - View the last four digits of the card number and Device Account Number—the number transmitted to the merchant.
 - Change the billing address.
 - Remove the card from Apple Pay.
-

Change your Apple Pay settings

1. Go to Settings  > Wallet & Apple Pay.
 2. Do any of the following:
 - Set your default card.
 - Add the shipping address and contact information for purchases.
-

Remove your cards from Apple Pay if your iPad is lost or stolen

If you enabled [Find My iPhone](#), you can use it to help locate and secure your iPad.

To remove your cards from Apple Pay, do any of the following:

- *On a Mac or PC:* Sign in to your [Apple ID account](#). In the Devices section, click the lost iPad. Below the list of cards, click Remove all.
- *On another iPhone, iPad, or iPod touch:* Go to Settings  > [your name], tap the lost iPad, then tap Remove All Cards (below Apple Pay).
- Call the issuers of your cards.

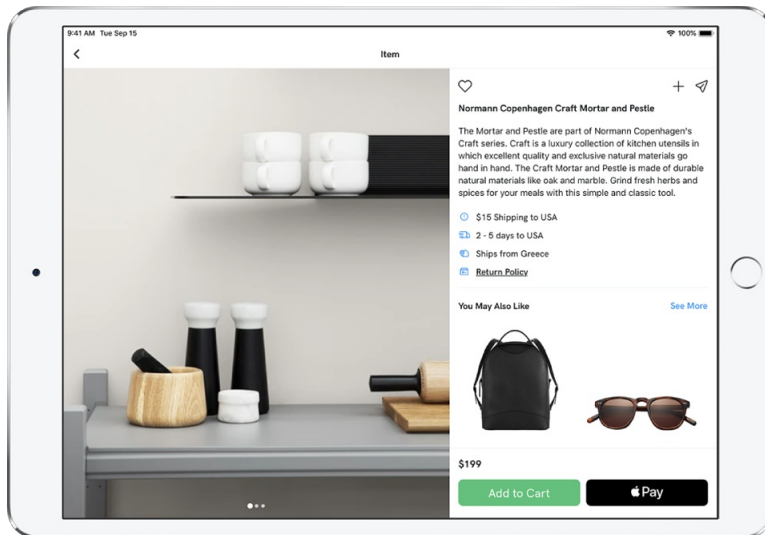

If you remove cards, you can add them again later.

If you sign out of iCloud in Settings > [your name], all your credit and debit cards for Apple Pay are removed from iPad. You can add the cards again the next time you sign in.

Note: The availability of Apple Pay and its features varies by country or region. See the Apple Support article [Countries and regions that support Apple Pay](#).

Use Apple Pay in apps, App Clips, and Safari on iPad

You can make purchases using Apple Pay in apps, in App Clips, and on the web using Safari wherever you see the Apple Pay button.

Pay in an app, in an App Clip, or on the web

1. During checkout, tap the Apple Pay button.
2. Review the payment information.

You can change the credit card, billing and shipping addresses, and contact information.

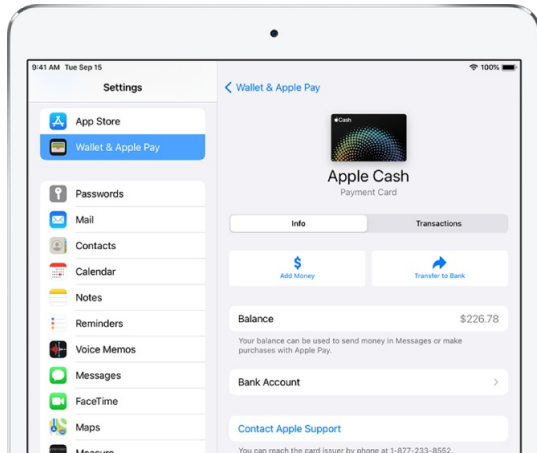

3. Complete the payment:
 - *On an iPad with Touch ID:* Authenticate with Touch ID or enter your passcode.
 - *On an iPad with Face ID:* Double-click the top button, then glance at iPad to authenticate with Face ID, or enter your passcode.

Change your default shipping and contact information

1. Go to Settings  > Wallet & Apple Pay.
2. Set any of the following:
 - Shipping address
 - Email
 - Phone

Set up and use Apple Cash on iPad (U.S. only)

When you [receive money in Messages](#), it's added to your Apple Cash. You can use Apple Cash right away wherever you would use Apple Pay. You can also transfer your Apple Cash balance to your bank account.

Set up Apple Cash

Do any of the following:

- Go to Settings  > Wallet & Apple Pay, then turn on Apple Cash.
- In Messages, send or accept a payment. See [Send and receive money with Apple Pay on iPad \(U.S. only\)](#).

Use Apple Cash

You can use Apple Cash wherever you use Apple Pay:

- [Send and receive money with Apple Pay \(U.S. only\)](#)
- [Pay in apps or on the web using Apple Pay](#)

Manage your Apple Cash

1. Go to Settings  > Wallet & Apple Pay, then tap Apple Cash.

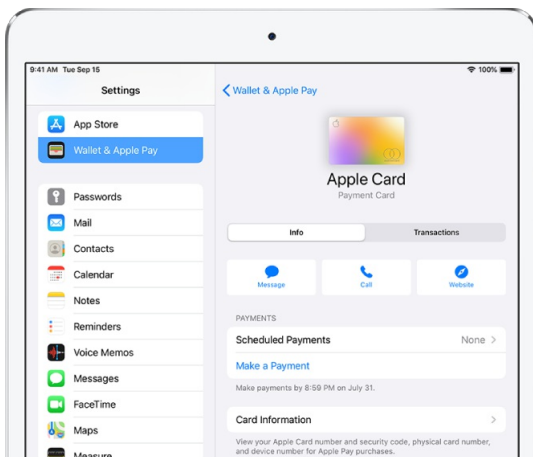

2. Do any of the following:

- Add money from a debit card.
- Transfer money to your bank. See the Apple Support article [Transfer money in Apple Cash to your bank account or Visa debit card](#).
- Update your bank account information.
- Tap Transactions to view your history and details (including comments sent with payments), manually accept or reject individual payments, and request a statement.
- Choose to manually or automatically accept all payments. You have 7 days to manually accept a payment before it's returned to the sender.
- Verify your identity for account servicing and to increase your transaction limits.
- Contact Apple Support.

Apple Cash and sending and receiving payments through Apple Pay are services provided by Green Dot Bank, member FDIC.

Set up and use Apple Card on iPad (U.S. only)

Apple Card is a credit card created by Apple and designed to help you lead a healthier financial life. You can sign up for Apple Card on iPad in minutes and start using it with Apple Pay right away in stores, in apps, or online worldwide. Apple Card gives you easy-to-understand, real-time views of your latest transactions and balance, and Apple Card support is available anytime by simply sending a text from Messages.

Get Apple Card

1. Go to Settings  > Wallet & Apple Pay, tap Add Card, then tap Apply for Apple Card.

2. Enter your information, then agree to the terms and conditions to submit your application.
 3. Review the details of your Apple Card offer, including the credit limit and APR, then accept Apple Card or tap No Thanks to decline.
 4. If you accept the terms, you can do any of the following:
 - Set Apple Card as your default card for Apple Pay transactions.
 - Get a physical Apple Card to use where Apple Pay isn't accepted.
-

Use Apple Card

On iPad, you can use Apple Card to [make Apple Pay purchases in apps or on the web](#).

You can also use Apple Card at locations where Apple Pay isn't accepted:

- *In apps, on the web, or over the phone:* Go to Settings  > Wallet & Apple Pay, tap Apple Card, then tap Card Information to see the card number, expiration date, and security code. Use this information to make your purchase.
 - *In stores, restaurants, and other locations:* Use the physical card.
-

View transactions and statements

Go to Settings  > Wallet & Apple Pay, tap Apple Card, then do any of the following:

- *Review your transactions:* Tap Transactions, then review your latest transactions, or scroll down to see all your transactions grouped by year.
 - *Get monthly statements:* Tap Card Balance to see the balance, new spending, and payments and credits. Scroll down to see your monthly statements. Tap a statement to see the summary for that month, download a PDF statement, or export transactions to a CSV or OFX file.
-

Make payments

Go to Settings  > Wallet & Apple Pay, tap Apple Card, then do any of the following:

- *Schedule payments:* Tap Scheduled Payments, choose Pay My Bill or Pay Different Amount, enter the payment details (such as the account and date), then authenticate with Face ID, Touch ID, or your passcode.
 - *Make a one-time payment:* Tap Make a Payment, drag the checkmark to adjust the payment amount or tap Show Keypad to enter an amount, tap Pay Now or Pay Later, review the payment details (such as the payment account), then authenticate with Face ID, Touch ID, or your passcode.
-

View Apple Card details, change settings, contact support, and more

Go to Settings  > Wallet & Apple Pay, tap Apple Card, then do any of the following:

- View family members who share your card.
 - Review scheduled payments.
 - View card information.
 - View credit details.
 - Add or remove linked bank accounts.
 - Lock your physical card and request a replacement card.
 - Change the billing address.
 - Get support through Messages, by phone, or on the [Apple Card Support website](#).
-

Accessories

Accessories included with iPad

Use the included power adapter and charging cable to connect iPad to a power outlet and [charge the battery](#). The size and type of the adapter depends on your iPad model and your country or region.

You can also use the charging cable to [connect iPad to your computer](#) for charging, transferring files, using iPad as a second display for your Mac, and more.

USB-C Power Adapter

USB power adapter

USB-C Charge Cable

Lightning to USB-C Cable

Lightning to USB Cable

SIM eject tool (cellular models)

Insert the SIM eject tool into the small hole of the SIM card tray, then push in toward iPad to eject the tray. See [Set up cellular service on iPad \(Wi-Fi + Cellular models\)](#). (Not available in all countries or regions.)

AirPods and other headphones

Set up AirPods with iPad

Set up AirPods to listen to music, movies, text messages, and more. You can also use AirPods to make and answer FaceTime calls with your iPad.

Note: If you need to charge your AirPods before setup, see [Charge AirPods to use with iPad](#).

Pair AirPods with your iPad

1. On iPad, go to Settings  > Bluetooth, then turn on Bluetooth.

2. Go to the Home Screen on your iPad.

3. Do one of the following:

- *AirPods Max*: Press the noise control button on the right headphone, then hold AirPods Max next to your iPad (iPadOS 14.3 or later).

- *AirPods Pro or AirPods (1st and 2nd generation)*: Open the case with your AirPods inside, then hold it next to your iPad.

AirPods Pro

AirPods
(1st and 2nd generation)

4. Follow the onscreen instructions, then tap Done.

Your AirPods are automatically paired with all of your supported devices where you're signed in with the same Apple ID (iOS 10, iPadOS 13, macOS 10.12, watchOS 3, or later required).

Note: If you can't pair your AirPods, see the Apple Support article [If your AirPods won't connect](#).

Find the best fit (AirPods Pro)

To see which of the included ear tips provide the best seal, run the fit detection test.

1. Open the AirPods case.
 2. On iPad, go to Settings  > Bluetooth.
 3. In the list of devices, tap the information button  next to your AirPods.
 4. Tap Ear Tip Fit Test, tap Continue, then follow the onscreen instructions.
-

Connect AirPods Max with an audio cable

To connect your AirPods Max to iPad with a cable instead of wirelessly, do one of the following:

- *iPad models that include a headphone jack:* Use an Apple Lightning to 3.5 mm Audio Cable to connect the charging port on your AirPods Max to the headphone jack on your iPad.
- *Other models:* Connect an Apple Lightning to 3.5 mm Audio Cable to the charging port on your AirPods Max, connect an Apple Lightning to 3.5 mm Headphone Jack Adapter to the charging port on your iPad, then join the two 3.5 mm audio connectors.

Note: If the audio connection isn't working, ensure that the Headphone Jack Adapter is connected to the charging port of your iPad, not to your AirPods Max.

With AirPods Max, AirPods Pro, and AirPods (2nd generation), you can also amplify soft sounds and adjust certain frequencies to suit your hearing. See [Set headphone accommodations](#).

Charge AirPods to use with iPad

Charge AirPods Max

Connect AirPods Max to a power outlet using a Lightning to USB Cable and a compatible power adapter.

Note: To help maintain the battery charge when you're not using AirPods Max, put AirPods Max in sleep mode by placing them in the Smart Case. (You can't play audio on AirPods Max when they're in the Smart Case.)

See the Apple Support article [How to charge your AirPods Max and learn about battery life](#).

Charge AirPods Pro or AirPods (1st and 2nd generation)

1. Put the AirPods in their case.

AirPods Pro

AirPods
(1st and 2nd generation)

2. Close the lid.

AirPods shut down and charge whenever they're in the case with the lid closed.

To charge the case, do one of the following:

- Connect the case to a power outlet using a Lightning to USB Cable and a compatible power adapter.
- If you have AirPods with Wireless Charging Case or AirPods Pro, place the case with the status light facing up on the center of a MagSafe wireless charger or a Qi-certified charger.

See the Apple Support article [Charge your AirPods and learn about battery life](#).

To see how much charge your AirPods have left, check the Batteries widget. See [Add a Batteries widget to monitor your Home Screen](#).

Start and stop iPad audio playback with AirPods

AirPods sense when you're wearing them, and they automatically play or stop the audio from your iPad. To pause, resume, or skip audio playback, you can use the Digital Crown on AirPods Max, the Force Sensor on AirPods Pro, and taps on AirPods (1st and 2nd generation).

Hear what's playing on your iPad

- *AirPods Max*: Place AirPods Max on your head.
- *AirPods Pro and AirPods (1st and 2nd generation)*: Put one or both AirPods in your ears.

Stop the audio

- *AirPods Max*: Remove AirPods Max from your head.
- *AirPods Pro and AirPods (1st and 2nd generation)*: Remove both AirPods from your ears, or if you're wearing just one, remove it.

Pause the audio

- *AirPods Max*: Press the Digital Crown once. Press it again to play.

You can turn the Digital Crown to [change the volume](#). You can also use the Digital Crown to [answer and end calls](#), [ask for Siri](#), and [end the reading of a new message](#).

- *AirPods Pro*: Press the Force Sensor on either of your AirPods. To resume playback, press again. If you press the Force Sensor for too long, a chime sounds, and the noise control mode changes.

You can also use the Force Sensor to [answer and end calls](#), [ask for Siri](#), [change the noise control mode](#), and [end the reading of a new message](#).

- *AirPods Pro and AirPods (1st and 2nd generation)*: While listening with both AirPods, remove one. When you return it to your ear, playback resumes automatically.
- *AirPods*: (1st and 2nd generation) You can set either of your AirPods to pause when you double-tap it, then resume play when you double-tap it again. See [Change the name and other settings for AirPods \(1st and 2nd generation\)](#).

Skip tracks

- *AirPods Max*: To skip forward, double-press the Digital Crown quickly. To skip backward, triple-press the Digital Crown quickly.

- *AirPods Pro*: To skip forward, double-press the Force Sensor on either of your AirPods. To skip backward, triple-press the sensor.
- *AirPods*: (2nd generation) To skip forward, double-tap either of your AirPods. You can set either of them to skip backward when you double-tap it. See [Change the name and other settings for AirPods \(1st and 2nd generation\)](#).
- *AirPods*: (1st generation) You can set either of your AirPods to skip forward or backward when you double-tap it. See [Change the name and other settings for AirPods \(1st and 2nd generation\)](#).

If you don't want AirPods to automatically play and stop the audio, you can [turn off](#) Automatic Head Detection or Automatic Ear Detection.

Change the AirPods volume while listening to iPad

Change the volume for your AirPods

Do one of the following:

- [Summon Siri](#), then say something like "Turn down the volume."
- Use either volume button on the side of iPad.
- Drag the volume slider in an app's playback controls.
- Open Control Center, then drag the volume slider.
- Drag the volume slider on the Lock Screen.

- Turn the Digital Crown (AirPods Max).

You can [change which turn direction](#) increases the volume (iPadOS 14.3 or later). You can also use the Digital Crown to [stop and start audio playback](#), [answer and end calls](#), [ask for Siri](#), and [end the reading of a new message](#).

For information about protecting your hearing from loud volume while listening to AirPods with iPad, see [Use headphone audio-level features on iPad](#).

Make and answer calls with AirPods on iPad

You can make and answer FaceTime calls with AirPods that are paired with your iPad.

Make and answer calls with AirPods Max

- *Make a call:* Say ["Hey Siri,"](#) then say something like "Make a FaceTime call." Or press and hold the Digital Crown, wait for a chime, then make your request.
- *Answer or end a call:* Press the Digital Crown.

Note: If you [turn on Announce Calls with Siri](#), you can also answer or decline a call using your voice (iPadOS 14.5 or later).

Note: While on a call, you can turn the Digital Crown to change the volume.

Make and answer calls with AirPods Pro

- *Make a call:* Say “Hey Siri,” then say something like “Make a FaceTime call.”

You can also set either of your AirPods to summon Siri when you press and hold the Force Sensor. See [Change the name and other settings for AirPods Pro](#).

- *Answer or end a call:* Press the Force Sensor on either of your AirPods.

Note: If you [turn on Announce Calls with Siri](#), you can also answer or decline a call using your voice (iPadOS 14.5 or later).

Make and answer calls with AirPods (2nd generation)

- *Make a call:* Say “Hey Siri,” then say something like “Make a FaceTime call.”

You can also set either of your AirPods to summon Siri with a double tap. See [Change the name and other settings for AirPods \(1st and 2nd generation\)](#).

- *Answer or end a call:* Double-tap either of your AirPods.

Note: If you [turn on Announce Calls with Siri](#), you can also answer or decline a call using your voice (iPadOS 14.5 or later).

Make and answer calls with AirPods (1st generation)

- *Make a call:* Double-tap either of your AirPods to summon Siri, wait for a chime, then make your request.
 - *Answer or end a call:* Double-tap either of your AirPods.
-

Switch AirPods between iPad and other devices

When your other iOS and iPadOS devices are signed in with the same Apple ID as your iPad, your AirPods seamlessly connect to whichever device you're listening to. (On supported AirPods and Beats headphones; iOS 14, iPadOS 14, or later required; iOS 14.3, iPadOS 14.3, or later required for AirPods Max.)

For example, if you're listening to your iPhone with AirPods but you want to listen to your iPad instead, start playing music, a podcast, or other audio on your iPad—your AirPods switch to iPad.

Switch AirPods back to your iPad

If your AirPods switch from your iPad to another device but you want them to stay connected to your iPad, tap  (in the "Moved to" notice at the top of the iPad screen).

To stop AirPods from automatically switching between devices, go to Settings  > Bluetooth, tap the information button  next to the name of your AirPods, tap Connect to This iPad, then tap When Last Connected to This iPad.

Choose between AirPods and other playback devices for your iPad audio

1. Tap  in Control Center, on the Lock Screen, or in the Now Playing controls for the app you're listening to.
 2. Select your AirPods or another device.
-

Use Siri with AirPods on iPad

You can use Siri with your AirPods to [ask questions and do tasks](#).

Summon Siri with your voice (AirPods Max, AirPods Pro, and AirPods 2nd generation)

While wearing AirPods, say “Hey Siri,” then ask Siri a question or to do a task for you.

For example, say something like “Hey Siri, how’s the weather today?” or “Hey Siri, let’s hear the Acoustic playlist.”

Note: If you didn’t set up “Hey Siri,” go to Settings  > Siri & Search, then turn on Listen for “Hey Siri.”

Summon Siri with the Digital Crown (AirPods Max)

Press and hold the Digital Crown, wait for a chime, then make your request.

Summon Siri with the Force Sensor or by double-tapping (AirPods Pro or AirPods 2nd generation)

You can set AirPods Pro to summon Siri when you press and hold the Force Sensor, and you can set your AirPods (2nd generation) to summon Siri when you double-tap one of your AirPods.

1. Open the AirPods case, or place one or both AirPods in your ears.
2. On iPad, go to Settings  > Bluetooth.
3. In the list of devices, tap the information button  next to your AirPods.
4. Select Left or Right, then choose Siri.

Summon Siri with a double tap (AirPods 1st generation)

Double-tap either of your AirPods, wait for a chime, then make your request.

Note: By default, a double tap on either of your AirPods (1st generation) summons Siri, but you can change this behavior in Settings. See [Change the name and other settings for AirPods \(1st and 2nd generation\)](#).

Listen and respond to messages with AirPods on iPad

With Announce Messages, you can listen to your messages with your AirPods (not available on AirPods 1st generation; iPadOS 14.3 or later required for AirPods Max). When your iPad is locked, your AirPods are connected to it, and a message arrives, a chime sounds and Siri begins to read the message.

Reply to a message

Say something like "Reply that's great news."

Siri repeats what you said, then asks for confirmation before sending your reply. (To send replies without waiting for confirmation, go to Settings  > Siri & Search > Announce Messages, then turn on Reply without Confirmation.)

Stop Siri from reading a message

You can do any of the following:

- Say something like "Stop" or "Cancel."

- Press the Digital Crown (AirPods Max).

Note: While listening to a message, you can turn the Digital Crown to change the volume.

- Press either Force Sensor (AirPods Pro).

- Double-tap either of your AirPods (2nd generation).
- Remove one of your AirPods (AirPods Pro and AirPods 2nd generation).

If you didn't turn on Announce Messages when you set up your AirPods, go to Settings  > Siri & Search > Announce Messages, then turn on Announce Messages with Siri.

Share audio with AirPods and Beats headphones from iPad

While you wear AirPods or compatible Beats headphones, you can share what you're listening to with a friend who's also wearing AirPods or compatible Beats headphones. Both sets of headphones must be paired with iPhone, iPad, or iPod touch. (On supported models; iOS 13.1, iPadOS 13.1, or later required; iOS 14.3, iPadOS 14.3, or later required for AirPods Max.)

Start sharing audio when your friend's headphones are in their charging case

Your AirPods or Beats headphones should be connected to your iPad, and your friend's AirPods Pro, AirPods (1st and 2nd generation), or Beats headphones should be inside their charging case.

1. While you're wearing your headphones, move your iPad close to your friend's open charging case.
 2. On your iPad, tap Temporarily Share Audio.
 3. Follow the onscreen instructions.
-

Share audio with your friend's AirPods Max or Beats over-ear headphones

Your AirPods or Beats headphones should be connected to your iPad.

1. While you're wearing your headphones, move your iPad close to your friend's headphones.
 2. Do one of the following:
 - *If your friend has AirPods Max:* Ask your friend to press the noise control button on the right headphone.
 - *If your friend has Beats over-ear headphones:* Ask your friend to turn them on, then briefly press (for less than 1 second) the power button on their headphones.
 3. On your iPad, tap Temporarily Share Audio, then follow the onscreen instructions.
-

Share audio when your friend is wearing AirPods or Beats headphones

If your friend is wearing AirPods or Beats headphones connected to their iPhone, iPad, or iPod touch, you can share the audio that's playing on your iPad.

1. Wear your AirPods or Beats headphones.
 2. On your iPad, tap  on the Lock Screen, in Control Center, or in the Now Playing controls for the app you're listening to.
 3. Tap Share Audio (below the name of your headphones).
 4. Bring your iPad close to your friend's iPhone, iPad, or iPod touch.
 5. Tap Share Audio on your iPad.
 6. Ask your friend to tap Join on their device.
-

Change the volume or noise control modes

If you and a friend use AirPods or Beats headphones to share audio from your iPad, you can set a different volume level for each set of headphones. When the headphones support noise control, you can also choose a different noise control mode for each set.

1. On your iPad, open Control Center, then touch and hold the volume control.
 2. To change the volume, drag the volume sliders.
 3. To change a noise control mode (AirPods Max and AirPods Pro), tap one of the Noise Control buttons at the bottom of the screen, then choose an option.
-

Stop sharing audio

On your iPad, tap  in the Now Playing controls, on the Lock Screen, or in Control Center, then tap the name of your friend's headphones to turn off the connection.

Change noise control modes on AirPods while listening to iPad

Switch between noise cancellation and transparency modes while listening to audio from your iPad on AirPods Max or AirPods Pro.

Change noise control modes in Control Center

1. Open Control Center, then press and hold the volume control.
 2. Tap the Noise Control button at the bottom left.
 3. Choose one of the following:
 - *Noise Cancellation*: Blocks out external sounds.
 - *Transparency*: Lets you hear the sounds around you.
 - *Off*: Turns off both noise cancellation and transparency.
-

Quickly change noise control modes

Do one of the following:

- *AirPods Max*: Press the noise control button on the right headphone. A chime confirms the change.

- *AirPods Pro*: Press and hold either Force Sensor until you hear a chime.

You can choose which modes are available to change. See [Change the name of your AirPods and other settings on iPad](#).

Control spatial audio on AirPods with iPad

When you watch a supported show or movie, AirPods Max (iPadOS 14.3 or later) and AirPods Pro use spatial audio to create an immersive surround sound experience. Spatial audio includes dynamic head tracking. With dynamic head tracking, you hear the surround sound channels in the right place, even as you turn your head or move your iPad (supported models).

Learn how spatial audio works

1. Place AirPods Max on your head or place both AirPods Pro in your ears, then go to Settings  > Bluetooth.
2. In the list of devices, tap the information button  next to your AirPods Max or AirPods Pro, then tap See & Hear How It Works.

Turn spatial audio on or off while watching a show or movie

Open Control Center, press and hold the volume control, then tap Spatial Audio at the lower right.

Turn spatial audio off or on for all shows and movies

1. Go to Settings  > Bluetooth.
 2. In the list of devices, tap the information button  next to your AirPods.
 3. Turn Spatial Audio on or off.
-

Turn off dynamic head tracking

1. Go to Settings  > Accessibility > Headphones.
2. Tap the name of your headphones, then turn Follow iPad off.

Dynamic head tracking makes it sound like the audio is coming from your iPad, even when your head moves. If you turn off dynamic head tracking, the audio sounds like it's following your head movement.

Restart AirPods for use with iPad

If your AirPods aren't working right, try restarting them.

Restart AirPods

Do one of the following:

- *AirPods Max*: On the right headphone, press and hold the Digital Crown and the noise control button at the same time until the status light next to the charging port flashes amber (around 12 seconds), then immediately release the buttons.

Important: Immediately release the buttons when the AirPods Max status light flashes amber. If you continue to hold the buttons until the status light flashes white (around 15 seconds), AirPods Max return to their factory settings.
 - *AirPods Pro and AirPods (1st and 2nd generation)*: Put the AirPods in their case, then close the lid for a minimum of 10 seconds.
-

Return AirPods Max to factory settings

If your AirPods Max aren't working correctly after you restart them, you can return them to their factory settings.

On the right headphone, press and hold the Digital Crown and the noise control button at the same time until the status light next to the charging port changes from flashing amber to flashing white (around 15 seconds).

Change the name of your AirPods and other settings on iPad

Change the name and other settings for AirPods Max

Remove AirPods Max from the Smart Case.

- 1.
 2. On iPad, go to Settings  > Bluetooth.
 3. In the list of devices, tap the information button  next to your AirPods Max.
 4. Do any of the following:
 - *Change the name:* Tap the current name, enter a new name, then tap Done.
 - *Change which modes you can select with the noise control button:* (iPadOS 14.3 or later) Tap a mode. A checkmark indicates that you can select the mode.
 - *Turn Automatic Head Detection off or on:* (iPadOS 14.3 or later) Tap Automatic Head Detection.

When Automatic Head Detection is turned on, AirPods Max sense when they're on your head and automatically play the audio from your iPad. When you remove AirPods Max from your head, playback stops.
 - *Change the rotational direction for increasing the volume:* (iPadOS 14.3 or later) Tap Digital Crown, then choose an option.
 - *Unpair AirPods Max from your iPad:* Tap Forget This Device.
-

Change the name and other settings for AirPods Pro

1. Open the AirPods case, or place one or both AirPods in your ears.
2. On iPad, go to Settings  > Bluetooth.
3. In the list of devices, tap the information button  next to your AirPods.

4. Do any of the following:

- *Change the name:* Tap the current name, enter a new name, then tap Done.
- *Change what happens when you press and hold the Force Sensor:* Select Left or Right, then choose whether to summon Siri or change the noise control mode. Tap a noise control mode to turn it on or off.
- *Turn Automatic Ear Detection off or on:* Tap Automatic Ear Detection.

When Automatic Ear Detection is turned on, AirPods sense when they're in your ears and automatically play the audio from your iPad. Playback is paused when you remove one of your AirPods. When you remove both, playback stops.

- *Set the microphone to Always Left, Always Right, or Automatic:* Tap Microphone, then choose an option.

When you choose Automatic, either of your AirPods can act as the microphone. If you use only one of them, it acts as the microphone.

When you choose Always Left or Always Right, the one you choose becomes the microphone even if you remove it from your ear or put it in the case.

- *Unpair AirPods Pro from your iPad:* Tap Forget This Device.
-

Change the name and other settings for AirPods (1st and 2nd generation)

1. Open the AirPods case, or place one or both AirPods in your ears.
2. On iPad, go to Settings  > Bluetooth.
3. In the list of devices, tap the information button  next to your AirPods.
4. Do any of the following:

- *Change the name:* Tap the current name, enter a new name, then tap Done.
- *Change what a double tap does:* Select Left or Right, then choose an option.
- *Set the microphone to Always Left, Always Right, or Automatic:* Tap Microphone, then choose an option.

When you choose Automatic, either of your AirPods can act as the microphone. If you use only one of them, it acts as the microphone.

When you choose Always Left or Always Right, the one you choose becomes the microphone even if you remove it from your ear or put it in the case.

- *Unpair these AirPods from your iPad:* Tap Forget This Device.
-

Use EarPods with Lightning Connector on iPad

You can use EarPods with Lightning Connector (sold separately) to listen to music and videos, and make calls on an iPad model with a Lightning port. EarPods feature a microphone, volume buttons, and the center button.

Use the center button to answer and end calls, control audio and video playback, and use Siri, even when iPad is locked.

Control audio with your EarPods

- *Pause*: Press the center button. Press again to resume playback.
- *Skip forward*: Press the center button twice quickly.
- *Skip backward*: Press the center button three times quickly.
- *Fast-forward*: Press the center button twice quickly and hold.

Manage calls using your EarPods

- *Answer an incoming call:* Press the center button.
 - *End the current call:* Press the center button.
 - *Switch to an incoming or on-hold call, and put the current call on hold:* Press the center button. Press again to switch back to the first call.
-

Ask Siri with your EarPods

Press and hold the center button until you hear a beep. Let go, then ask Siri to perform a task or answer your question. See [Ask Siri on iPad](#).

For information about protecting your hearing from loud volume while listening to EarPods with iPad, see [Use headphone audio-level features on iPad](#).

Use headphone audio-level features on iPad

You can set a maximum decibel level to ensure that headphone audio doesn't become uncomfortable for you. iPad analyzes your headphone audio and reduces any sound above this level.

You can also check whether the current audio level is OK or loud by viewing a headphone level meter.

Reduce loud headphone sounds in Settings

1. Go to Settings  > Sounds > Reduce Loud Sounds.
2. Turn on Reduce Loud Sounds, then drag the slider.

Note: If you [set up Screen Time](#) for a family member, you can prevent them from changing the Reduce Loud Sounds level. Go to Settings > Screen Time > Content & Privacy Restrictions > Reduce Loud Sounds, then select Don't Allow.

Check your headphone level while you listen

While using headphones with iPad, you can use Hearing in Control Center to check their current decibel level. AirPods, EarPods, and many other wired and wireless headphones are compatible with Hearing in Control Center.

1. Go to Settings  > Control Center, then add Hearing.
2. Connect your headphones, then play audio.
3. Open Control Center, then tap .

The audio level (in decibels) of your headphones is displayed on the Headphone Level meter.

Note: You can also scroll below the Headphone Level meter to turn Live Listen on or off. See [Use iPad as a remote microphone with Live Listen](#). Typically, headphone level monitoring and Live Listen aren't used at the same time. The Headphone Level monitor is intended for listening to audio playback. Live Listen is intended for listening to external sounds with the iPad microphone.

Improve the accuracy of audio measurements for third-party Bluetooth headphones

Classify your Bluetooth devices as headphones, speakers, or other devices.

1. Go to Settings  > Bluetooth, then tap the information button  next to the name of the device.
2. Tap Device Type, then choose a classification.

When you connect AirPods, EarPods, and other compatible headphones to your iPad, the headphone audio levels are automatically sent to iPad. Headphone audio measurements are most accurate when using Apple or Beats headphones. Audio played through other headphones can be estimated based on the volume of your iPad.

Apple Pencil

Pair and charge Apple Pencil (2nd generation) with iPad

On an iPad model that supports Apple Pencil (2nd generation), attach Apple Pencil to the magnetic connector on the right side of your iPad.

Pair Apple Pencil (2nd generation) with iPad

Charge your Apple Pencil (2nd generation)

1. Make sure that Bluetooth is turned on in Settings  > Bluetooth.
2. Attach Apple Pencil to the magnetic connector on the right side of your iPad.

Note: To see how much charge your Apple Pencil has left, check the Batteries widget. See [Add a Batteries widget to monitor your Home Screen](#).

Pair and charge Apple Pencil (1st generation) with iPad

Pair Apple Pencil (1st generation) with iPad

On an iPad model that supports Apple Pencil (1st generation), remove the cap and plug Apple Pencil into the Lightning connector on your iPad. When the Pair button appears, tap it.

Note: After you pair your Apple Pencil, it stays paired until you restart your iPad, turn on Airplane Mode, or pair with another iPad. Just pair your pencil again when you're ready to use it.

Charge your Apple Pencil (1st generation)

Plug your Apple Pencil into the Lightning connector on your iPad.

You can also charge it with an Apple USB Power Adapter and the Apple Pencil Charging Adapter that came with your pencil.

Note: To see how much charge your Apple Pencil has left, check the Batteries widget. See [Add a Batteries widget to monitor your Home Screen](#).

Enter text with Scribble on iPad

On supported iPad models, you can use Apple Pencil (sold separately) and Scribble to enter text. Without opening or using the onscreen keyboard, you can quickly reply to a message, jot down a reminder, and more. Scribble converts your handwriting to text directly on your iPad, so your writing stays private.

Note: Scribble is available in several languages. See the [iOS and iPadOS Feature Availability website](#).

Use Apple Pencil to enter text in any text field

1. Write with Apple Pencil in any text field, and Scribble automatically converts your handwriting into typed text.

Scribble even works when your handwriting extends beyond the edges of the text field.

2. To use an action shortcut, tap the Scribble toolbar.

Available actions depend on the app you're using, and may include the Undo button , the Show Keyboard button , and more.

To automatically minimize the toolbar when you're entering text, tap , then turn on Auto-minimize. To show the full toolbar, tap the minimized version.

Use Apple Pencil to enter text in Notes

1. In Notes, tap  to show the Markup toolbar.
 2. In the Markup toolbar, tap the Handwriting tool  (to the left of the pen).
 3. Write with Apple Pencil, and Scribble automatically converts your handwriting into typed text.
-

Select and revise text with Apple Pencil

As you enter text using Apple Pencil and Scribble, you can do the following:

- *Delete a word:* Scratch it out.
 - *Insert text:* Touch and hold in a text area, then write in the space that opens.
 - *Join or separate characters:* Draw a vertical line between them.
 - *Select text:* Draw a circle around the text or underline it to select it and see editing options. To change the selection, drag from the beginning or end of the selected text.
 - *Select a word:* Double-tap the word.
 - *Select a paragraph:* Triple-tap a word within the paragraph, or drag Apple Pencil over the paragraph.
-

Stop converting your handwriting to text

Go to Settings  > Apple Pencil, then turn off Scribble.

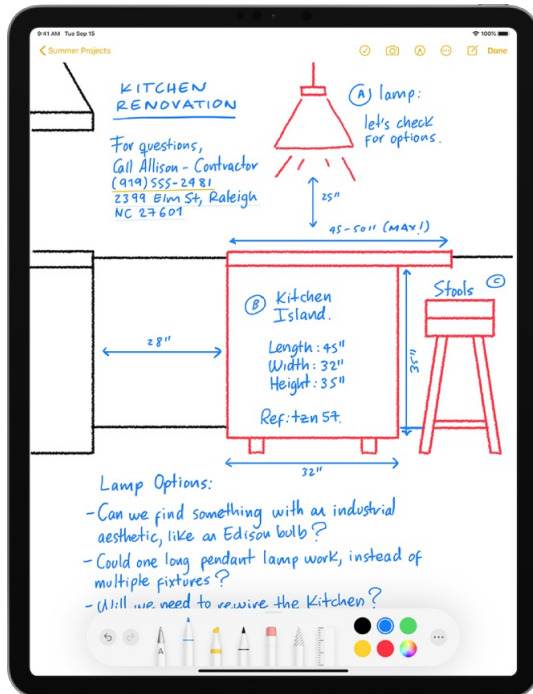

Draw with Apple Pencil on iPad

On supported models, you can use Apple Pencil (sold separately) to draw a sketch, mark up a photo, sign a document, and more. See:

- [Draw in apps with Markup on iPad](#)
- [Draw in a note](#)

- Add your signature in other supported apps
- Take and mark up a screenshot with Apple Pencil on iPad

Compared to using your finger, Apple Pencil gives you extra control as you draw. For example, you can tilt or press with Apple Pencil to shade or darken a line.

Shade or darken a line with Apple Pencil

When you draw or sketch, tilt your Apple Pencil to shade a line, and press more firmly to darken the line.

Double-tap to switch tools with Apple Pencil (2nd generation)

When you're working in a supported app, such as Notes, double-tap the lower section of Apple Pencil (2nd generation) to quickly switch back to the tool you used last.

For example, you can switch from the marker back to the eraser.

To change your settings for double tap, go to Settings  > Apple Pencil.

Take and mark up a screenshot with Apple Pencil on iPad

You can use Apple Pencil to quickly take a picture of the iPad screen, then mark it up to share with others or use in documents.

-
1. To capture the screen, swipe up with Apple Pencil from either corner at the bottom of your iPad.
 2. To mark up the screenshot, draw with Apple Pencil.

Use the Markup toolbar at the bottom of the screen to change drawing tools. See [Draw in apps with Markup on iPad](#).

3. To send the marked up screenshot to others (such as in a message), or to save it in a document (such as in a note), tap , then choose an option.
 4. When you're finished, tap Done, then choose an option.
-

Jot down notes with Apple Pencil on iPad

Use Apple Pencil to quickly jot a note from anywhere on iPad, even while iPad is locked (supported models).

Create a Quick Note

Swipe up from the bottom right corner of the screen using Apple Pencil.

See [Create Quick Notes anywhere on iPad](#).

Wake iPad by drawing or writing a note

Tap Apple Pencil on the Lock Screen, then begin drawing or taking notes.

Whatever you create is [saved in Notes](#).

Apple TV, smart TVs, and video displays

Wirelessly stream videos and photos to Apple TV or a smart TV from iPad

You can wirelessly stream video or photos to Apple TV or an AirPlay 2-enabled smart TV.

Play video on Apple TV or an AirPlay 2-enabled smart TV

While playing video in the Apple TV app  or another supported video app, tap the screen to show the controls, tap , then choose your Apple TV or AirPlay 2-enabled smart TV as the playback destination.

If an AirPlay passcode appears on the TV screen, enter the passcode on your iPad.

Show photos on Apple TV or an AirPlay 2-enabled smart TV

In Photos , tap a photo, tap , swipe up, tap AirPlay, then choose your Apple TV or an AirPlay 2-enabled smart TV as the playback destination.

If an AirPlay passcode appears on the TV screen, enter the passcode on your iPad.

Mirror your iPad on Apple TV or a smart TV

On Apple TV or a smart TV, you can show whatever appears on your iPad.

1. Open Control Center.
2. Tap , then choose your Apple TV or an AirPlay 2-enabled smart TV as the playback destination.

If an AirPlay passcode appears on the TV screen, enter the passcode on your iPad.

To switch back to iPad, tap Stop Mirroring or , then choose your iPad.

You can also stream audio, such as music or a podcast, from iPad to your Apple TV or smart TV speakers. See [Play audio from iPad on HomePod and other wireless speakers](#).

Note: For a list of AirPlay 2-enabled smart TVs, see the [Home accessories website](#).

To learn more about using Apple TV, see the [Apple TV User Guide](#).

Connect iPad to a display with a cable

With the appropriate cable or adapter, you can connect your iPad to a secondary display, like a computer display, TV, or projector.

To extend the workspace of your Mac by connecting it to your iPad, see [Use iPad as a second display for your Mac](#).

Connect iPad Pro 12.9-inch (5th generation) or iPad Pro 11-inch (3rd generation) to Apple Pro Display XDR

Apple Pro Display XDR automatically turns on when you plug it into power and connect iPad Pro 12.9-inch (5th generation) or iPad Pro 11-inch (3rd generation) using the Thunderbolt cable included with the display. Your iPad charges while connected to the display.

1. If you're using a Pro Stand, route the display and iPad cables through the stand's opening.
2. Plug the display into a power source.
3. Plug one end of the Thunderbolt 3 Pro Cable into the Thunderbolt 3 port on the display.
4. Plug the other end of the Thunderbolt 3 Pro Cable into the charging port of your iPad.

If the display doesn't turn on when you connect it to iPad, unplug it from iPad, then plug it back in. If that doesn't work, unplug the Pro Display XDR from its power source, then plug it in again.

Note: You can connect Apple Pro Display XDR and multiple Thunderbolt devices to each other, then connect the chain of devices to the charging port on your iPad.

For information about using the features of Pro Display XDR, see the [Pro Display XDR Support website](#).

Connect your iPad if it has a USB-C or Thunderbolt / USB 4 connector

On a model with a USB-C or a Thunderbolt / USB 4 connector, you may be able to connect iPad to a USB or Thunderbolt 3 port on the display.

If the [charging cable](#) that came with your iPad isn't compatible with the port on your display, TV, or projector, do the following:

1. Plug a USB-C Display AV Adapter or USB-C VGA Multi-port Adapter into the charging port on iPad.
2. Connect an HDMI or VGA cable to the adapter.
3. Connect the other end of the HDMI or VGA cable to the display, TV, or projector.

4. If necessary, switch to the correct video source on the display, TV, or projector. If you need help, see the manual that came with your display.

If the display doesn't turn on when you connect it to iPad, unplug it from iPad, then plug it back in. If that doesn't work, unplug the display from its power source, then plug it in again.

See the Apple Support article [Charge and connect with the USB-C port on iPad Pro](#).

Connect your iPad if it has a Lightning connector

On a model with a Lightning connector, do the following:

1. Plug a Lightning Digital AV Adapter or Lightning to VGA Adapter into the charging port on iPad.
2. Connect an HDMI or VGA cable to the adapter.
3. Connect the other end of the HDMI or VGA cable to the display, TV, or projector.
4. If necessary, switch to the correct video source on the display, TV, or projector. If you need help, see the manual that came with your display.

The adapters have an extra port so you can connect the charging cable and charge your iPad while connected to a display, TV, or projector.

Play audio from iPad on HomePod and other wireless speakers

You can play audio from iPad on wireless devices like HomePod, Apple TV, AirPlay 2-enabled smart TVs, and Bluetooth headphones and speakers.

Play audio from iPad on a wireless device

1. On your iPad, open an audio app, such as Music, then choose an item to play.
2. Tap , then choose a playback destination.

Note: If your AirPlay 2-enabled devices don't appear in the list of playback destinations, make sure they're on the same Wi-Fi network. With a Bluetooth device, the playback destination returns to iPad if you move the device out of Bluetooth range.

To change the playback destination, you can also tap  on the Lock Screen or in Control Center.

Note: For information about setting up a Bluetooth audio device, see [Pair a Bluetooth headphone, keyboard, game controller, or other device](#).

Play audio on multiple AirPlay 2-enabled devices

With AirPlay 2 and iPad, you can play audio on multiple AirPlay 2-enabled devices connected to the same Wi-Fi network. For example, you can play a party playlist on HomePod speakers in the living room and kitchen, on an Apple TV in the bedroom, and on an AirPlay 2-enabled smart TV in the den.

 **Ask Siri.** Say something like:

- "Stop playing music everywhere"
- "Set the dining room volume to 10 percent"
- "What's playing in the kitchen?"
- "Play a song I like in the kitchen"
- "Add the living room speaker"
- "Remove the music from the kitchen"
- "Move the music to the den"

You can also choose playback destinations from the iPad screen.

1. Tap  in Control Center, on the Lock Screen, or in the Now Playing controls for the app you're listening to.
2. Select each device you want to use.

Note: Devices arranged in a stereo pair are treated as a single audio device.

To learn more about using HomePod speakers and Apple TV, see the [HomePod User Guide](#) and [Apple TV User Guide](#).

For a list of AirPlay 2-enabled smart TVs, see the [Home accessories website](#).

Keyboards

Apple external keyboards for iPad

These portable full-size keyboards (sold separately) allow you to enter text while viewing the entire iPad screen.

Magic Keyboard for iPad

Magic Keyboard for iPad attaches directly to iPad and closes to create a thin cover (supported models). It includes a built-in trackpad, which you can use to move around the iPad screen, open apps, and more. Magic Keyboard for iPad requires no batteries or external power (but you can connect it to power to keep iPad charged).

See [Attach Magic Keyboard for iPad \(with built-in trackpad\)](#).

Smart Keyboard

The Smart Keyboard (supported models), including the Smart Keyboard Folio (supported models), connects directly to iPad and converts into a thin cover. The keyboard doesn't require batteries or external power.

See [Attach Smart Keyboard to iPad](#).

Magic Keyboard

Magic Keyboard, including Magic Keyboard with Numeric Keypad, connects to iPad using Bluetooth. Magic Keyboard is powered by a built-in rechargeable battery.

See [Pair Magic Keyboard with iPad](#).

Attach Magic Keyboard for iPad (with built-in trackpad)

You can enter text using Magic Keyboard for iPad, and you can use its built-in trackpad to control items on the iPad screen (supported models).

To connect and use the Bluetooth version of Magic Keyboard, see [Pair Magic Keyboard with iPad](#).

Attach Magic Keyboard for iPad

Open the keyboard, fold it back, then attach iPad.

iPad is held in place magnetically.

To adjust the viewing angle, tilt iPad as needed.

Adjust the keyboard brightness

Go to Settings  > General > Keyboard > Hardware Keyboard, then drag the slider to adjust the level of backlighting in low light conditions.

Charge iPad while using Magic Keyboard for iPad

Connect the keyboard to a power outlet using the USB-C Charge Cable and USB-C Power Adapter that came with your iPad.

Important: The Magic Keyboard for iPad contains magnets that hold iPad securely in place. Avoid placing cards that store information on a magnetic strip—such as credit cards or hotel key cards—on the inside of the Magic Keyboard, or between iPad and the Magic Keyboard, as such contact may demagnetize the card.

Attach Smart Keyboard to iPad

You can use Smart Keyboard, including Smart Keyboard Folio, to enter text on iPad.

 **Tip:** You can use a trackpad or mouse along with Smart Keyboard. See [Connect Magic Trackpad to iPad](#) or [Connect a mouse to iPad](#).

To attach Smart Keyboard, do one of the following:

- *On an iPad with a Home button:* Attach the keyboard to the Smart Connector on the side of iPad (supported models).
- *On other iPad models:* Attach the keyboard to the Smart Connector on the back of iPad (supported models).

To use the keyboard, position it in front of your iPad, then set iPad in the groove above the number keys.

Pair Magic Keyboard with iPad

You can use Magic Keyboard, including Magic Keyboard with Numeric Keypad, to enter text on iPad. Magic Keyboard connects to iPad using Bluetooth. (For information about using Magic Keyboard for iPad, which attaches directly to iPad, see [Attach Magic Keyboard for iPad \(with built-in trackpad\)](#).)

Pair Magic Keyboard

1. Make sure the keyboard is turned on and charged.

2. On iPad, go to Settings  > Bluetooth, then turn on Bluetooth.
3. Select the device when it appears in the Other Devices list.

Note: If Magic Keyboard is already paired with another device, you must unpair them before you can connect Magic Keyboard to your iPad. For iPhone, iPad, or iPod touch, see [Unpair a Bluetooth device](#). On Mac, choose Apple menu  > System Preferences > Bluetooth, select the device, then Control-click its name.

Reconnect Magic Keyboard to iPad

Magic Keyboard disconnects when you turn its switch to Off or when you move it or iPad out of Bluetooth range—about 33 feet (10 meters).

To reconnect, turn the keyboard switch to On, or bring the keyboard and iPad back into range, then tap any key.

 **Tip:** You can use a trackpad or mouse along with Magic Keyboard. See [Connect Magic Trackpad to iPad](#) or [Connect a mouse to iPad](#).

Switch between keyboards with iPad

With an Apple external keyboard, you can switch between the language keyboard for your region, an emoji keyboard, other language keyboards that you add, and the onscreen keyboard.

Switch between language keyboards and the onscreen emoji keyboard

1. On the external keyboard, press and hold the Control key.
2. Press the Space bar to cycle between the language keyboard for your region, the emoji keyboard, and [other language keyboards that you add](#).

When you select the emoji keyboard, you can do the following:

- *Search for an emoji:* Enter a commonly used word or phrase—such as “heart” or “smiley face”—in the search field above the emoji keyboard.
- *Enter an emoji:* Tap it; or use the arrow keys on the external keyboard to select it, then press Return.

 **Tip:** To quickly switch to the emoji keyboard, press -e on the Magic Keyboard for iPad or Smart Keyboard.

With Magic Keyboard for iPad and Smart Keyboard, you can also press  to choose between keyboards. If you want to use  to show only the emoji keyboard instead of switching languages, go to Settings  > General > Keyboard > Hardware Keyboard, then turn on Press  for Emoji.

 **Tip:** If you added a Chinese, Korean, Japanese, or Hebrew keyboard, you can press the Caps Lock key to switch back and forth between Latin script and the other keyboard you're using. To prevent use of the Caps Lock key for switching languages, go to Settings > General > Keyboard > Hardware Keyboard, then turn off Switch Languages using Caps Lock.

Switch to the onscreen keyboard

1. Do one of the following:
 - Tap  in the Shortcuts bar (at the bottom of the screen).
 - If you installed additional language keyboards, tap the language button next to the predictive text suggestions (opposite of the Dictation button  in the Shortcuts bar).
2. Tap Show Keyboard.

To hide the onscreen keyboard, tap .

Note: With Magic Keyboard for iPad and Smart Keyboard, you can use  to show only the emoji keyboard instead of switching languages. Go to Settings  > General > Keyboard > Hardware Keyboard, then turn on Press  for Emoji. To switch between other language keyboards, press and hold the Control key, then press the Space bar.

Enter characters with diacritical marks while using an Apple external keyboard with iPad

If the Apple external keyboard you use with iPad doesn't include accents and other diacritical marks for the language you're typing, you can use an Option key modifier or the onscreen keyboard to enter those marks.

Use the Option key to enter a diacritical mark for a character

To enter a character with a diacritical mark, you can press the Option key to select a mark.

1. Do one of the following:
 - [Add a language keyboard](#) that supports diacritical marks, then in an app, [switch to that language keyboard](#).

For example, add the Spanish (Mexico) keyboard, then in an app, use  on Magic Keyboard for iPad to select Español (México).
 - Go to Settings  > General > Keyboard > Hardware Keyboard, then [choose an alternative keyboard layout](#) that supports diacritical marks.

For example, if you have the English (US) language keyboard, tap English (US), then choose U.S. International — PC or ABC — Extended.

2. In an app, press and hold the Option key, then press a key that enters a diacritical mark.

For example, the Spanish (Mexico) keyboard and the U.S. International — PC alternative layout support these diacritical marks:

- *Acute accent* (for example, *é*): Option-E.
- *Grave accent* (for example, *è*): Option-`.
- *Tilde* (for example, *ñ*): Option-N.
- *Diaeresis or umlaut* (for example, *ü*): Option-U.
- *Circumflex* (for example, *ê*): Option-I.

3. Press the letter.

For example, to enter *ñ* using the Spanish (Mexico) keyboard or the U.S. International — PC alternative layout, press Option-N, then type an *n*.

Note: The ABC - Extended alternative layout also allows you to enter tone marks for typing Mandarin Chinese in Pinyin orthography. For example, to type *ǔ* in *lǔxíng* ("travel"), press Option-V, then type a *v*. In addition, the ABC - Extended layout allows you to type diacritical marks and letters from several different European languages, such as Czech, French, German, Hungarian, and Polish.

Use the onscreen keyboard to enter a diacritical mark

1. [Switch](#) to the onscreen keyboard.
2. On the onscreen keyboard, touch and hold the letter, number, or symbol on the keyboard that's related to the character you want.

For example, to enter *é*, touch and hold the *e* key.

3. Slide your finger to choose a variant.
4. To hide the onscreen keyboard when you're finished, tap .

Dictate text while using an Apple external keyboard with iPad

You can dictate text instead of typing it on an Apple external keyboard.

Note: Dictation may not be available in all languages or in all countries or regions, and features may vary. Cellular data charges may apply.

-
1. Go to Settings  > General > Keyboard, then turn on Enable Dictation.
 2. Tap the Dictation button  in the Shortcuts bar (at the bottom of the screen), then speak.

3. When you finish, tap  at the bottom of the screen.

While dictating text, you can also [add punctuation or formatting](#) by speaking it.

 **Tip:** To quickly switch to dictation, press -D on the Magic Keyboard for iPad or Smart Keyboard.

Use shortcuts on an Apple external keyboard with iPad

You can use the Shortcuts bar (at the bottom of the screen) and combination keystrokes known as *keyboard shortcuts* to quickly perform many common actions.

Use the Shortcuts bar to accept suggested words and spellings

While typing, you can do the following:

- Accept a suggested word by tapping it in the Shortcuts bar.
- Accepted a suggestion highlighted in the Shortcuts bar by entering a space or punctuation. If you enter a comma, period, or other punctuation, the space is deleted.
- Reject the suggestions by tapping your original word (shown with quotation marks in the Shortcuts bar).

To turn off the suggestions, go to  > General > Keyboard, then turn off Predictive Text.

Use the Shortcuts bar to switch between language, emoji, and onscreen keyboards

You can use the Shortcuts bar to switch between the language keyboard for your region, an emoji keyboard, [other language keyboards that you add](#), and the onscreen keyboard.

1. Do one of the following:

- Tap  in the Shortcuts bar.
- If you installed additional language keyboards, tap the language button next to the predictive text suggestions (opposite of the Dictation button  in the Shortcuts bar).

2. Choose an option.

Use the Shortcuts bar for other shortcuts

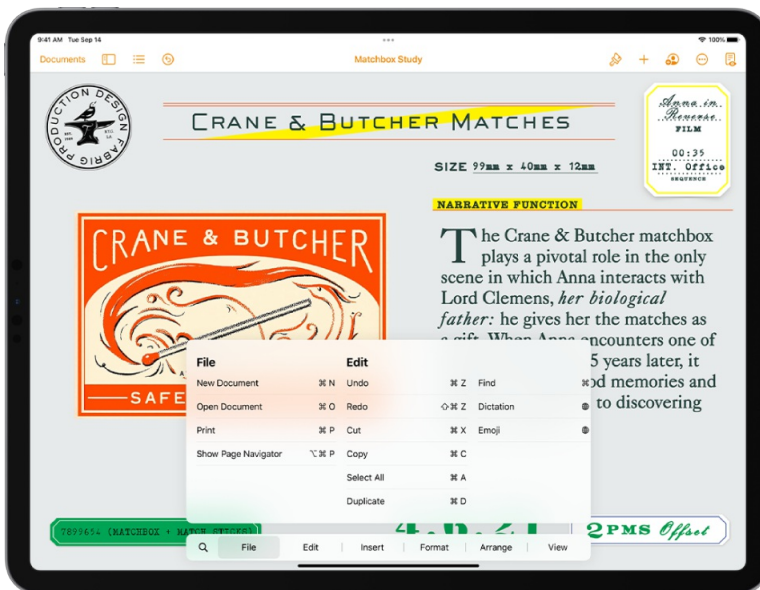

- *Take app-specific shortcuts:* Buttons on the outer edges of the Shortcuts bar vary depending on the app you're using or the task you're doing. Each app is different—try out the Shortcuts bar to see what you can do.
- *Change keyboard settings:* Tap  (or the language button that replaced it), then tap Keyboard Settings.

- *Minimize the Shortcuts bar:* Tap  (or the language button that replaced it), then tap Minimize. To see the full Shortcuts bar, tap the minimized version.
- *Dictate text:* Tap the Dictation button , then speak. When you're finished, tap  at the bottom of the screen.

Use keyboard shortcuts

You can use keyboard shortcuts on an Apple external keyboard to perform the following actions on iPad:

- *Quickly switch between apps:* Press and hold the Command key, then press Tab until you reach the app you want to open.
- *Open Search:* Press Command-Space.
- *View shortcuts for the app you're using:* Do the following, then tap categories below the list:
 - Press and hold the Command key.
 - Press and hold  (Magic Keyboard for iPad and Smart Keyboard).

You can change the actions that are performed by the Command key (and other modifier keys like Caps Lock). Go to Settings  > General > Keyboard > Hardware Keyboard, tap Modifier Keys, tap a key, then choose the action you want it to perform.

To use additional keyboard shortcuts, go to Settings > Accessibility > Keyboards > Full Keyboard Access, then turn on Full Keyboard Access. See [Control iPad with an external keyboard](#).

Note: You can also set up text replacements that enter words or phrases after you type just a few characters. For example, type “omw” to enter “On my way!” See [Save keystrokes with text replacements on iPad](#).

You can also accept suggested words before you finish typing them. See [Use predictive text on iPad](#).

Navigate apps with an Apple external keyboard and iPad

Choose an alternative layout for an Apple external keyboard with iPad

With an alternative keyboard layout, you can enter letters and marks that are different from the ones on your Apple external keyboard. For example, with the ABC - Extended keyboard layout, you can type letters and [enter diacritical marks](#) for several different European languages and tone marks for Mandarin Chinese in Pinyin.

1. Go to Settings  > General > Keyboard > Hardware Keyboard.
 2. Tap a language at the top of the screen, then choose an alternative layout from the list.
-

Change typing assistance options for an Apple external keyboard with iPad

You can change options for auto-correction, smart punctuation, and more.

Change typing assistance options for an external keyboard

Go to Settings  > General > Keyboard > Hardware Keyboard, then do any of the following:

- *Turn Auto-Capitalization on or off:* When this option is selected, an app supporting this feature capitalizes proper nouns and the first words in sentences as you type.
 - *Turn Auto-Correction on or off:* When this option is selected, an app supporting this feature corrects the spelling as you type.
 - *Turn “. ” Shortcut on or off:* When this option is selected, double-tapping the space bar inserts a period followed by a space.
-

Change typing assistance options for all keyboards

You can turn on or off special typing features—such as predictive text and smart punctuation—that assist you when you type. These settings apply to your onscreen keyboard and external keyboard.

1. Go to Settings > General, then tap Keyboard.
2. In the list below All Keyboards, turn typing features on or off.

For several options, including auto-correction and auto-capitalization, you can specify different settings for your external keyboard in Settings  > General > Keyboard > Hardware Keyboard.

Trackpads

Connect Magic Trackpad to iPad

You can connect Magic Trackpad, including Magic Trackpad 2, to your iPad (Magic Trackpad sold separately).

Pair Magic Trackpad

1. Make sure Magic Trackpad is turned on and charged.
2. On iPad, go to Settings  > Bluetooth, then turn on Bluetooth.
3. Select the device when it appears in the Other Devices list.

Note: If Magic Trackpad is already paired with your Mac or another iPad, you must unpair them before you can connect Magic Trackpad to your iPad. For iPad, see [Unpair a Bluetooth device](#). On Mac, choose Apple menu  > System Preferences > Bluetooth, select the device, then Control-click its name.

Reconnect Magic Trackpad to iPad

Magic Trackpad disconnects when you turn its switch to Off, or when you move it or iPad out of Bluetooth range—about 33 feet (10 meters).

To reconnect, turn the trackpad switch to On, or bring the trackpad and iPad back into range, then click the trackpad.

Trackpad gestures for iPad

You can use Magic Trackpad, including Magic Trackpad 2 and the trackpad built into Magic Keyboard for iPad, to open apps, go to the Home Screen, open Slide Over, and more (Magic Trackpad and Magic Keyboard for iPad sold separately).

Trackpad gestures for Magic Trackpad, Magic Trackpad 2, and Magic Keyboard for iPad

Gesture	Description
---------	-------------

Click. Press with one finger until you feel a click.

Click and hold. Press and hold with one finger.

Drag. Click and hold an item, then slide your finger across the trackpad to move it.

Wake iPad. Click the trackpad.
Or, if you're using an external keyboard, press any key.

Open the Dock. Use one finger to swipe the pointer past the bottom of the screen.

Go Home. Use one finger to swipe the pointer past the bottom of the screen. After the Dock appears, swipe the pointer past the bottom of the screen again.
Alternatively, click the bar at the bottom of the screen (on an iPad with Face ID).

View Slide Over. Use one finger to swipe the pointer past the right edge of the screen. To hide Slide Over, swipe right again.

Open Control Center. Use one finger to move the pointer to select the status icons at the top right, then click.

Or, select the status icons at the top right, then swipe up with one finger.

Open Notification Center. Use one finger to move the pointer to select the status icons at the top left, then click.

Or, use one finger to move the pointer past the top of the screen near the middle.

Additional gestures for Magic Trackpad 2 and Magic Keyboard for iPad

Gesture

Description

Scroll up or down. Swipe two fingers up or down.

Scroll left or right. Swipe two fingers left or right.

Zoom. Place two fingers near each other. Pinch open to zoom in, or pinch closed to zoom out.

Go Home. Swipe up with three fingers.

Open the App Switcher. Swipe up with three fingers, pausing before you lift your fingers.

Or, pinch four fingers together, pausing before you lift your fingers.

Switch between open apps. Swipe left or right with three fingers.

Open Today View. When the Home Screen or the Lock Screen is visible, use two fingers to swipe right.

Open search from the Home Screen. Swipe down with two fingers.

Secondary click. Click with two fingers to show the quick actions menu for items like icons on the Home Screen, messages in a mailbox, and the Camera button in Control Center.

Or, if you're using an external keyboard, you can press the Control key while you click the trackpad.

Change trackpad settings on iPad

You can change how you use a trackpad to interact with items on the iPad screen.

1. Go to Settings  > General, then choose one of the following, depending on your accessories:
 - Trackpad
 - Trackpad & Mouse

2. Do any of the following:

- *Change the tracking speed:* Drag the slider to set the tracking speed of the pointer when you move it across the screen.
- *Turn Natural Scrolling on or off:* With this option selected, the contents on the screen move in the same direction as your finger.
- *Turn Tap to Click on or off:* If you select this option, lightly tapping the trackpad with one finger has the same effect as pressing the trackpad until it clicks.
- *Turn Two-Finger Secondary Click on or off:* With this option selected, you click with two fingers to [show the quick actions menu](#) for items like icons on the Home Screen, messages in a mailbox, or the Camera button in Control Center.

Note: You can also change the appearance of the pointer, such as its color, shape, and size. See [Change the pointer appearance when using a mouse or trackpad with iPad](#).

Mouse devices

Connect a mouse to iPad

You can connect Magic Mouse, another Bluetooth mouse, or a USB mouse to your iPad.

Note: Mouse devices are sold separately. Not all mouse devices are fully compatible with all models of iPad.

Pair Magic Mouse or other Bluetooth mouse

1. For Magic Mouse, make sure the mouse is turned on and charged.

For any other Bluetooth mouse, follow the instructions that came with the mouse to put it in discovery mode.

2. On iPad, go to Settings  > Bluetooth, then turn on Bluetooth.
3. Select the device when it appears in the Other Devices list.

If you're asked for a PIN when you pair Magic Mouse, type "0000" (four zeros), then tap Pair.

Note: If the mouse is already paired with your Mac or another iPad, you must unpair them before you can connect the mouse to your iPad. For iPad, see [unpair a Bluetooth device](#). On Mac, choose Apple menu  > System Preferences > Bluetooth, select the device, then Control-click its name.

Reconnect a Bluetooth mouse to iPad

The mouse disconnects when you turn the switch on the mouse to Off or when you move the mouse or iPad out of Bluetooth range—about 33 feet (10 meters).

To reconnect, turn the mouse switch to On, or bring the mouse and iPad back into range, then click the mouse.

Connect a USB mouse

With the appropriate cable or adapters, you can connect various third-party mouse devices with iPad using USB and USB-based receivers. Refer to the device manufacturer's instructions.

Mouse actions and gestures for iPad

You can use a mouse to open apps, go to the Home Screen, open Slide Over, and more (mouse devices sold separately).

Note: Not all mouse devices are fully compatible with all models of iPad.

Mouse actions

Action

Description

Click. Press the mouse until you feel a click.

Click and hold. Press and hold the mouse.

Drag. Click and hold an item, then move the mouse.

Wake iPad. Click the mouse.

Or, if you're using an external keyboard, press any key.

Open the Dock. Move the mouse to position the pointer at the bottom of the screen.

Go Home. Move the mouse to position the pointer at the bottom of the screen. After the Dock appears, move the pointer past the bottom of the screen.

Or, click the bar at the bottom of the screen (on an iPad with Face ID).

Open the App Switcher. With the Home Screen visible, move the pointer past the bottom of the screen.

Or from an app, drag the bar at the bottom of the screen toward the middle of the screen and pause (on an iPad with Face ID).

View Slide Over. Use the mouse to move the pointer past the right edge of the screen. To hide Slide Over, move the pointer past the right edge again.

Open Control Center. Use the mouse to move the pointer to select the status icons at the top right, then click.

Or, move the pointer past the top-right corner of the screen.

Open Notification Center. Use the mouse to move the pointer to select the status icons at the top left, then click.

Or, use the mouse to move the pointer past the top of the screen (near the middle).

Mouse gestures for Magic Mouse 2

Gesture

Description

Scroll up or down. Slide a finger up or down on the surface of the mouse.

Scroll left or right. Slide a finger left or right on the surface of the mouse.

Secondary click. Use a finger on one side of the mouse to show the quick actions menu when clicking items like icons on the Home Screen, messages in a mailbox, or the Camera button in Control Center.

Note: To turn on Secondary click and choose which side of the mouse to use, go to Settings  > General > Trackpad & Mouse > Secondary Click.

If you're using an external keyboard, you can press the Control key while you click the mouse. On a multi-button mouse, click the second button.

Open Today View. When the Home Screen or the Lock Screen is visible, swipe right on the surface of the mouse.

Open search from the Home Screen. Swipe down on the surface of the mouse.

Change mouse settings on iPad

You can change how you use a mouse to interact with items on the iPad screen.

1. Go to Settings  > General, then select Trackpad & Mouse.
 2. Do any of the following:
 - *Change the tracking speed:* Drag the slider to set the tracking speed of the pointer when you move it across the screen.
 - *Turn Natural Scrolling on or off:* With this option selected, the contents on the screen move in the same direction as your finger.
 - *Specify a finger to use for Secondary Click:* You can specify either the right or left finger to [show the quick actions menu](#) when you click items like icons on the Home Screen, messages in a mailbox, or the Camera button in Control Center. To turn off Secondary Click, choose Off (Magic Mouse 2).
-

Note: You can also change the appearance of the pointer, such as its color, shape, and size. See [Change the pointer appearance when using a mouse or trackpad with iPad](#).

Connect external storage devices to iPad

You can use the Files app  and other supported apps to access files stored on external devices, such as USB drives and SD cards, connected to your iPad.

Connect a USB drive or an SD card reader

1. Attach the USB drive or SD card reader to the charging port on your iPad using a compatible connector or adapter.

Depending on your iPad model and external device, you may need the Lightning to USB Camera Adapter, Lightning to USB 3 Camera Adapter, USB-C to SD Card Camera Reader, or Lightning to SD Card Camera Reader (all sold separately).

With iPad Pro 12.9-inch (5th generation) or iPad Pro 11-inch (3rd generation), you can connect multiple USB drives and other Thunderbolt devices to each other, then connect the chain of devices to the charging port on your iPad.

Note: A USB drive must have only a single data partition, and it must be formatted as FAT, FAT32, exFAT (FAT64), or APFS. To change the formatting of a USB drive, use a Mac or PC.

2. Do any of the following:

- *Insert an SD memory card into a card reader:* Don't force the card into the slot on the reader; it fits only one way.

Note: You can import photos and videos from the memory card directly to the Photos app. See [Import photos and videos to iPad](#).

- *View the contents of the drive or memory card:* In a supported app (for example, Files), tap Browse at the bottom of the screen, then tap the name of the device below Locations. If you don't see Locations, tap Browse again at the bottom of the screen.
- *Disconnect the drive or card reader:* Remove it from the charging port on iPad.

External hard drives often require an external power source when used with iPad. If an external hard drive doesn't supply its own power, and your iPad has a USB-C or Thunderbolt / USB 4 connector, you can use a powered USB hub. If your iPad has a Lightning connector, you can use the Lightning to USB 3 Camera Adapter connected to a USB power adapter.

Set up and use Bluetooth accessories on iPad

Using a Bluetooth connection, you can use third-party devices such as wireless keyboards, headphones, speakers, car kits, game controllers, and more with iPad.

Pair a Bluetooth headphone, keyboard, game controller, or other device

1. Follow the instructions that came with the device to put it in discovery mode.

Note: To pair AirPods, see [Set up AirPods with iPad](#).

2. On iPad, go to Settings  > Bluetooth, turn on Bluetooth, then tap the name of the device.

iPad must be within about 33 feet (10 meters) of the Bluetooth device.

Customize a wireless game controller

After you pair a compatible game controller, you can customize it for supported games from Apple Arcade and the App Store.

1. Go to Settings  > General > Game Controller.

2. Tap the buttons you want to change.

3. To customize for a specific app, tap Add App.

For information about compatible controllers and button shortcuts, see [<<link to KB>>](#).

Play audio from iPad on a Bluetooth audio device

1. On your iPad, open an audio app, such as Music, then choose an item to play.
2. Tap , then choose your Bluetooth device.

While audio is playing, you can change the playback destination on the Lock Screen or in Control Center.

The playback destination returns to iPad if you move the device out of Bluetooth range.

For information about protecting your hearing from loud volume while listening to headphones with iPad, see [Use headphone audio-level features on iPad](#).

WARNING: For important information about avoiding hearing loss and avoiding distractions that could lead to dangerous situations, see [Important safety information for iPad](#).

Unpair a Bluetooth device

Go to Settings  > Bluetooth, tap the information button  next to the name of the device, then tap Forget This Device.

If you don't see the Devices list, make sure Bluetooth is on.

If you have AirPods and you tap Forget This Device, they're automatically removed from other devices where you're signed in with the same Apple ID.

Disconnect from Bluetooth devices

To quickly disconnect from all Bluetooth devices without turning Bluetooth off, open Control Center, then tap .

To learn about Bluetooth privacy settings on iPad, see the Apple Support article [If an app would like to use Bluetooth on your device](#). If you have trouble connecting a Bluetooth device, see the Apple Support article [If you can't connect a Bluetooth accessory to your iPhone, iPad, or iPod touch](#).

Note: The use of certain accessories with iPad may affect wireless performance. Not all iOS or iPadOS accessories are fully compatible with iPad. Turning on airplane mode may eliminate audio interference between iPad and an accessory. Reorienting or relocating iPad and the connected accessory may improve wireless performance.

Apple Watch with Fitness+ on iPad

Used in conjunction with Apple Watch, Apple Fitness+ is a subscription service that lets you choose from a catalog of workouts led by expert trainers. While you follow a workout on your iPad, in-session metrics like heart rate and calories burned (which are captured by your watch) appear on your screen. (watchOS 7.2 or later required; Apple Watch sold separately.)

To learn more, see [All about Apple Fitness+](#) in the Apple Watch User Guide.

Cases and covers for iPad

Many styles of cases and covers are sold separately for iPad. Magic Keyboard for iPad, Smart Keyboard Folio, and Smart Keyboard serve as keyboards as well as covers. (See [Apple external keyboards for iPad](#).)

Print from iPad

Use AirPrint to print wirelessly to an AirPrint-enabled printer from apps such as Mail, Photos, and Safari. Many apps available on the App Store also support AirPrint.

iPad and the printer must be on the same Wi-Fi network. See the Apple Support article [About AirPrint](#).

Print a document

Tap , , or  (depending on the app you're using), then tap Print. (Swipe up if you don't see Print.)

See the status of a print job

Open the App Switcher, then tap Print Center.

The badge on the icon shows how many documents are in the queue.

To cancel a print job, select it in Print Center, then tap Cancel Printing.

Use iPad with iPhone, iPod touch, Mac, and PC

Share your internet connection from iPad (Wi-Fi + Cellular)

If you have an active cellular data plan, you can use Personal Hotspot to share a cellular internet connection from your iPad (Wi-Fi + Cellular models) to other devices. Personal Hotspot is useful when the other devices don't have internet access from a Wi-Fi network. Instant Hotspot allows you to connect your devices to Personal Hotspot without entering a password.

If a nearby iPhone or iPad (Wi-Fi + Cellular models) is sharing its Personal Hotspot, you can use its cellular internet connection on your iPad. See [Join a Personal Hotspot](#).

Note: Personal Hotspot is not available with all carriers. Additional fees may apply. The number of devices that can join your Personal Hotspot at one time depends on your carrier and iPad model. Contact your carrier for more information.

Set up Personal Hotspot on iPad

Go to Settings  > Cellular > Personal Hotspot, then turn on Allow Others to Join.

Note: If you don't see the option for Personal Hotspot, but you have an active cellular data plan and Cellular Data is turned on in Settings > Cellular, contact your carrier about adding Personal Hotspot to your plan.

You can change the following settings:

- *Change the Wi-Fi password for your Personal Hotspot:* Go to Settings > Cellular > Personal Hotspot > Wi-Fi Password.
 - *Change the name of your Personal Hotspot:* Go to Settings > General > About > Name.
 - *Turn off Personal Hotspot and disconnect devices:* Go to Settings > Cellular > Personal Hotspot, then turn off Allow Others to Join.
-

Connect a Mac or PC to your Personal Hotspot

You can use a USB cable, Wi-Fi, or Bluetooth to connect a Mac or PC to your Personal Hotspot. Do one of the following:

- *Use USB:* [Connect iPad and your computer with a cable](#). If you see an alert that says Trust this Computer?, tap Trust. In your computer's Network preferences, choose iPad, then configure the network settings.

- *Use Wi-Fi and Instant Hotspot:* On your Mac, use the Wi-Fi status menu  in the menu bar to choose your iPad from the list of available networks.

You need to be signed in with the same Apple ID on your Mac and iPad, and have Bluetooth and Wi-Fi turned on.

The Wi-Fi status icon  in the menu bar changes to the Personal Hotspot icon  as long as your Mac remains connected to your Personal Hotspot.

- *Use Bluetooth:* To make sure your iPad is discoverable, go to Settings  > Bluetooth and leave the screen showing. Then on your Mac or PC, follow the manufacturer directions to set up a Bluetooth network connection.

Connect iPhone, iPod touch, or another iPad to your Personal Hotspot

On the other device, go to Settings  > Wi-Fi, then choose your iPad from the list of available networks.

If asked for a password on the other device, enter the password shown in Settings > Cellular > Personal Hotspot on your iPad.

If your iPad and the other device are set up as follows, then Instant Hotspot connects the devices without requiring a password:

- You're signed in with the same Apple ID on each device.
- Each device has Bluetooth turned on.
- Each device has Wi-Fi turned on.

When a device is connected, a blue band appears at the top of your iPad screen. The Personal Hotspot icon  appears in the status bar of the connected device.

With Family Sharing, you can share your Personal Hotspot with any member of your family automatically or after they ask for approval. See [Set up Family Sharing on iPad](#).

When you share a Personal Hotspot from your iPad, it uses cellular data for the internet connection. To monitor your cellular data network usage, go to Settings > Cellular > Usage. See [View or change your cellular data account](#).

If you need more help using Personal Hotspot, see the Apple Support article [If Personal Hotspot is not working](#).

Make and receive phone calls on iPad

You can make and receive calls on your iPad by using Wi-Fi Calling to relay phone calls through your iPhone (iOS 9 or later required).

Cellular charges may apply. Wi-Fi Calling is not available from all carriers.

Important: Wi-Fi + Cellular models do not support cellular phone service—they support cellular data transmission only. To make phone calls on any iPad model, you need to use Wi-Fi Calling and an iPhone.

Before you begin

Do the following:

- [Set up FaceTime](#) on both your iPhone and your iPad.
 - Sign in with the same Apple ID on both devices.
-

Allow phone calls on your iPad from your iPhone

You first set up your iPhone, and then set up your iPad.

1. On your iPhone, go to Settings  > Cellular.
2. If your iPhone has Dual SIM, choose a line (below Cellular Plans).
3. Do any of the following:
 - Tap Calls on Other Devices, turn on Allow Calls on Other Devices, then choose your iPad along with any other devices on which you'd like to make and receive calls.

This allows iPad and other devices where you're signed in with the same Apple ID to make and receive calls when they're nearby your iPhone and connected to Wi-Fi.
 - Tap Wi-Fi Calling, then turn on Add Wi-Fi Calling For Other Devices.

This allows iPad and other devices where you're signed in with the same Apple ID to make and receive calls even when your iPhone isn't nearby.
4. On your iPad, go to Settings > FaceTime, then turn on FaceTime and Calls from iPhone. If you're asked, turn on Wi-Fi Calling.

After you set up Wi-Fi calling on your iPhone and iPad, you can make and receive phone calls on iPad.

- *Make a call:* Tap a phone number in Contacts, Calendar, FaceTime, Messages, Search, or Safari. Or open FaceTime, enter a contact or phone number, then tap .
- *Receive a call:* Swipe or tap the notification to answer or ignore the call.

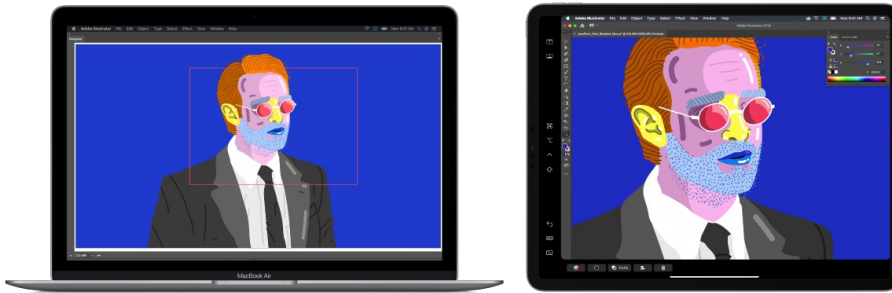

Note: If you enable Wi-Fi Calling, emergency calls may be made over Wi-Fi, and your device's location information may be used for emergency calls to aid response efforts, regardless of whether you enable Location Services. Some carriers may use the address you registered with the carrier when signing up for Wi-Fi Calling as your location.

For more information about Wi-Fi calls, see the Apple Support article [Make a call with Wi-Fi Calling](#).

Use iPad as a second display for your Mac

With Sidecar, you can extend the workspace of your Mac by using iPad as a second display. The extended workspace allows you to do the following:

- Use different apps on the different screens.
- Use the same app on both screens. For example, you can view your artwork on your Mac screen while you use Apple Pencil and an app's tools and palettes on iPad.

- Mirror the screens so that Mac and iPad display the same content.

Sidecar requires macOS 10.15 or later and iPadOS 13 or later on supported models.

Use Sidecar

1. Make sure you're signed in with the same Apple ID on your Mac and a nearby iPad.
2. Use one of the following connections:
 - *Wireless*: Make sure your Mac and your iPad have Wi-Fi and Bluetooth turned on. They need to be within Bluetooth range of one another (about 33 feet or 10 meters).
 - *USB*: [Connect your Mac and iPad](#) using the appropriate USB cable.
3. Click the AirPlay menu  in the menu bar on your Mac, then choose your iPad.

4. Do any of the following:

- *Use the Sidecar menu on Mac:* You can easily change how you work with iPad from the Sidecar menu  in the menu bar. For example, switch between using iPad as a mirrored or separate display, or show or hide the sidebar or Touch Bar on iPad.
- *Move windows from Mac to iPad:* Drag a window to the edge of the screen until the pointer appears on your iPad. Or hold the pointer over the green button in the top-left corner of the window, then choose Move to [iPad name].
- *Move windows from iPad to Mac:* Drag a window to the edge of the screen until the pointer appears on your Mac. Or hold the pointer over the green button in the top-left corner of the window, then choose Move Window Back to Mac.
- *Use the sidebar on iPad:* With your finger or Apple Pencil, tap icons in the sidebar to show or hide the menu bar , the Dock , or the keyboard . Or tap one or more modifier keys, such as Ctrl , to use keyboard shortcuts.
- *Use the Touch Bar on iPad:* With your finger or Apple Pencil, tap any button in the Touch Bar. The buttons available vary depending on the app or task.
- *Use Apple Pencil on iPad:* With your Apple Pencil, tap to select items such as menu commands, checkboxes, or files.

If you turn on “Enable double tap on Apple Pencil” in Sidecar preferences on your Mac, you can double-tap the lower section of your Apple Pencil (2nd generation) to [switch drawing tools](#) in some apps.

- *Use standard gestures on iPad:* Use your fingers to tap, touch and hold, swipe, scroll, and zoom.
- *On iPad, switch between the Mac desktop and the iPad Home Screen:* To show the Home Screen, swipe up from the bottom edge of your iPad. To return to the Mac desktop, tap the Sidecar icon  in the Dock on your iPad.

5. When you’re ready to stop using your iPad, tap the Disconnect icon at the bottom of the sidebar on iPad.

You can also disconnect from the Sidecar menu  in the menu bar and in Sidecar preferences and Displays preferences on your Mac.

Change Sidecar preferences

1. On your Mac, choose Apple menu  > System Preferences, then click Sidecar.

2. Choose from the following options:

- *Show, move, or hide the sidebar on your iPad:* To show the sidebar, select Show Sidebar, then to move it, click the pop-up menu and choose a location. To hide the sidebar, deselect Show Sidebar.
- *Show, move, or hide the Touch Bar on your iPad:* To show the Touch Bar, select Show Touch Bar, then to move it, click the pop-up menu and choose a location. To hide the Touch Bar, deselect Show Touch Bar.

When you use an app that supports the Touch Bar on your iPad, the Touch Bar is shown in the location you specified. The buttons available in the Touch Bar vary depending on the current app and task.

- *Enable double tap on Apple Pencil:* Select this option to be able to double-tap the lower section of Apple Pencil (2nd generation) to [switch drawing tools in some apps](#).
 - *Choose which iPad to connect to:* If you have more than one available iPad, click the “Connect to” pop-up menu, then choose the iPad you want.
-

Hand off tasks between iPad and your other devices

With Handoff, you can start something on one device (iPhone, iPad, Pod touch, Mac, or Apple Watch) and then pick it up on another without losing focus on what you’re doing. For example, you can start answering an email on your iPad, then finish it in Mail on your Mac. You can use Handoff with many Apple apps—for example, Calendar, Contacts, and Safari. Some third-party apps may also work with Handoff.

Before you begin

To hand off tasks between iPad and another device, make sure of the following:

- You’re signed in with the same Apple ID on both devices.
 - Your devices are connected to Wi-Fi.
 - Your devices are within Bluetooth range of one another (about 33 feet or 10 meters).
 - On your Mac, Handoff is turned on in System Preferences > General, and Bluetooth is turned on in System Preferences > Bluetooth.
 - On your iPad and on another iOS or iPadOS device, Handoff is turned on in Settings  > General > AirPlay & Handoff, and Bluetooth is turned on in Settings.
 - Each device has the minimum relevant software version installed: iOS 10, iPad OS 13, macOS 10.10, and watchOS 1.0, or later, is on each device.
-

Hand off from another device to your iPad

1. From any app, swipe up from the bottom edge of the screen and pause to reveal the Dock.
 2. On the right end of the Dock, tap the Handoff icon to continue working in the app on iPad.
-

Hand off from iPad to another device

On the other device, click or tap the Handoff icon to continue working in the app.

The Handoff icon of the app you're using on iPad appears in the following locations on other devices:

- *Mac*: The right end of the Dock (or at the bottom, depending on the Dock position).
 - *iPhone or iPod touch*: At the bottom of the App Switcher screen.
 - *iPad*: The right end of the Dock.
-

Turn off Handoff on your devices

- *iPad, iPhone, and iPod touch*: Go to Settings  > General > AirPlay & Handoff.
 - *Mac*: Choose Apple Menu > System Preferences > General, then turn off "Allow Handoff between this Mac and your iCloud devices."
-

 **Tip:** When Handoff is on, you can [use Universal Clipboard](#) to copy and paste text, images, photos, and videos across devices.

Cut, copy, and paste between iPad and other devices

You can use Universal Clipboard to cut or copy content (a block of text or an image, for example) on your iPad, then paste it on iPhone, another iPad, iPod touch, or on a Mac, and vice versa.

Note: For information about moving items within an app or copying items between apps only on your iPad, see [Move and copy items with drag and drop on iPad](#). For information about cutting, copying, and pasting text within or between apps only on your iPad, see [Select, cut, copy, and paste text on iPad](#).

Before you begin

To cut or copy and paste between iPad and another device, make sure of the following:

- You're signed in with the same Apple ID on both devices.
- Your devices are connected to Wi-Fi.

- Your devices are within Bluetooth range of one another (about 33 feet or 10 meters).
 - On your iPad and on another iPadOS or iOS device, Handoff is turned on in Settings  > General > AirPlay & Handoff, and Bluetooth is turned on in Settings .
 - On Mac, Handoff is turned on in System Preferences > General, and Bluetooth is turned on in System Preferences > Bluetooth.
 - Each device has the minimum relevant software version installed: iOS 10, iPadOS 13, or macOS 10.12, or later.
-

Copy, cut, or paste

- *Copy*: Pinch closed with three fingers.
- *Cut*: Pinch closed with three fingers two times.
- *Paste*: Pinch open with three fingers.

You can also touch and hold a selection, then tap Cut, Copy, or Paste.

Important: You need to cut, copy, and paste your content within a short period of time.

For more information about selecting text or placing the insertion point, see [Type with the onscreen keyboard on iPad](#).

Connect iPad and your computer with a cable

Using a USB cable or adapter, you can directly connect iPad and a Mac or Windows PC.

1. Make sure you have one of the following:
 - Mac with a USB port and OS X 10.9 or later
 - PC with a USB port and Windows 7 or later

2. Connect iPad to the USB port on your computer using the charging cable for your iPad.

If the cable isn't compatible with the port on your computer, do one of the following:

- If your iPad came with a USB-C Charge Cable and your computer has a USB port, use a USB-C to USB Adapter and a USB-A cable (each sold separately).
- If your iPad came with a USB-C to Lightning cable and your computer has a USB port, use a Lightning to USB Cable (sold separately).
- If your iPad came with a Lightning to USB cable and your computer has a USB-C port, connect the USB end of the cable to a USB-C to USB Adapter (sold separately), or use a USB-C to Lightning Cable (sold separately).
- If your iPad came with a Thunderbolt 4 / USB-4 charging cable and your computer has a USB port, use a USB-C to USB Adapter and a USB-A cable (each sold separately). (You can use Thunderbolt or USB cables with Thunderbolt devices like iPad Pro 12.9-inch (5th generation) and iPad Pro 11-inch (3rd generation).)

3. Do any of the following:

- [Set up your iPad](#) for the first time.
- [Use iPad as a second display](#) for your Mac.
- [Transfer files](#) between your iPad and computer.
- [Sync content](#) between your iPad and computer.
- [Share your iPad internet connection](#) (Wi-Fi + Cellular models) with your computer.
- [Use your computer to erase all content and settings](#) from iPad.
- [Update iPad](#) using your computer.

The iPad battery charges when iPad is connected to your computer and your computer is connected to power.

Sync iPad with your computer

You can [use iCloud](#) to automatically keep your photos, files, calendar, and more updated across all your devices where you're signed in with your Apple ID. (You can even use a Windows PC to access your iCloud data on [iCloud.com](#).) Other services like [Apple Music](#) allow you to access additional content across your devices. With iCloud and services like Apple Music, no syncing is required.

If you don't want to use iCloud or other services, you can connect iPad to your Mac or Windows PC to sync the following items:

- Albums, songs, playlists, movies, TV shows, podcasts, books, and audiobooks

- Photos and videos
- Contacts and calendars

With syncing, you can keep these items up to date between your computer and your iPad.

Note: If you use iCloud or other services like Apple Music, options for syncing with your computer might not be available.

Set up syncing between your Mac and iPad

1. [Connect iPad and your computer with a cable.](#)
2. In the Finder sidebar on your Mac, select your iPad.

Note: To use the Finder to sync content, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to sync with your Mac.

3. At the top of the window, click the type of content you want to sync (for example, Movies or Books).

Note: For information about using the Files option, see [Transfer files between iPad and your computer](#).

4. Select "Sync [*content type*] onto [*device name*]."

By default, all items of a content type are synced, but you can choose to sync individual items, such as selected music, movies, books, or calendars.

5. Repeat steps 3 and 4 for each type of content you want to sync, then click Apply.

Your Mac syncs to your iPad whenever you connect them.

To view or change syncing options, select your iPad in the Finder sidebar, then choose from the options at the top of the window.

Before disconnecting your iPad from your Mac, click the Eject button in the Finder sidebar.

See [Sync content between your Mac and iPhone or iPad](#) in the macOS User Guide.

Set up syncing between your Windows PC and iPad

1. Install or update to the latest version of iTunes on your PC.

See the Apple Support article [Update to the latest version of iTunes](#).

2. [Connect iPad and your computer with a cable.](#)
3. In the iTunes app on your PC, click the iPad button near the top left of the iTunes window.

4. Select the type of content you want to sync (for example, Movies or Books) in the sidebar on the left.

Note: For information about using the File Sharing option, see [Transfer files between iPad and your computer](#).

5. Select Sync to turn on syncing for that type of item.

By default, all items of a content type are synced, but you can choose to sync individual items, such as selected music, movies, books, or calendars.

6. Repeat steps 3 and 4 for each type of content you want to include on your iPad, then click Apply.

By default, your Windows PC syncs to your iPad whenever you connect them. You can have iTunes ask you before syncing, and if there are some items you never want sync, you can keep them from being synced. See [Sync iTunes content on PC with your devices](#) in the iTunes User Guide for Windows.

Turn on Wi-Fi syncing

After you set up syncing between your computer and iPad, do the following:

1. [Connect iPad and your computer with a cable](#).
2. Do one of the following:
 - *In the Finder sidebar on your Mac:* Select your iPad, click General at the top of the window, then select "Show this [device] when on Wi-Fi."
 - To use the Finder to turn on Wi-Fi syncing, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to turn on Wi-Fi syncing.
 - *In the iTunes app on a Windows PC:* Click the iPad button near the top left of the iTunes window, click Summary, then select "Sync with this [device] over Wi-Fi" (in Options).
3. Click Apply.

By default, whenever iPad is plugged into power and is connected over Wi-Fi to your Mac or to iTunes on your Windows PC, the computer syncs your selected content to iPad.

See [Sync content between your Mac and iPhone or iPad over Wi-Fi](#) in the macOS User Guide or [Sync iTunes content on PC with devices on Wi-Fi](#) in the iTunes User Guide for Windows.

WARNING: If you delete a synced item from your computer, the item is also deleted from your iPad the next time you sync.

Transfer files between iPad and your computer

You can [use iCloud Drive](#) to keep your files up to date and accessible on all your devices, including Windows PCs. You can also transfer files between iPad and other devices by [using AirDrop](#) and [sending email attachments](#).

Alternatively, you can transfer files for apps that support file sharing by connecting iPad to a Mac (with a USB port and OS X 10.9 or later) or a Windows PC (with a USB port and Windows 7 or later).

Transfer files between iPad and your Mac

1. Connect iPad to your Mac.

You can [connect using USB](#), or if you [set up Wi-Fi syncing](#), you can use a Wi-Fi connection.

2. In the Finder sidebar on your Mac, select your iPad.

Note: To use the Finder to transfer files, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to transfer files.

3. At the top of the Finder window, click Files, then do one of the following:

- *Transfer from Mac to iPad:* Drag a file or a selection of files from a Finder window onto an app name in the list.
- *Transfer from iPad to Mac:* Click the disclosure triangle beside an app name to see its files on your iPad, then drag a file to a Finder window.

To delete a file from iPad, select it below an app name, press Command-Delete, then click Delete.

Transfer files between iPad and your Windows PC

1. Install or update to the latest version of iTunes on your PC.

See the Apple Support article [Update to the latest version of iTunes](#).

2. Connect iPad to your Windows PC.

You can [connect using USB](#), or if you [set up Wi-Fi syncing](#), you can use a Wi-Fi connection.

3. In iTunes on your Windows PC, click the iPad button near the top left of the iTunes window.

4. Click File Sharing, select an app in the list, then do one of the following:

- *Transfer a file from your iPad to your computer:* Select the file you want to transfer in the list on the right, click "Save to," select where you want to save the file, then click Save To.
- *Transfer a file from your computer to your iPad:* Click Add, select the file you want to transfer, then click Add.

To delete a file from iPad, select the file, press the Delete key, then click Delete.

File transfers occur immediately. To view items transferred to iPad, go to On My iPad in the Files app  on iPad. See [View files and folders in Files on iPad](#).

Important: Syncing has no effect on file transfers, so syncing doesn't keep transferred files on iPad up to date with the files on your computer.

See [Transfer files from your Mac to iPhone or iPad](#) in the macOS User Guide or [Transfer files between your PC and devices with iTunes](#) in the iTunes User Guide for Windows.

Accessibility

Get started with accessibility features on iPad

iPad provides many accessibility features to support your vision, physical and motor, hearing, and learning needs. Learn how to configure these features and set up shortcuts for easy access.

Turn on accessibility features during setup

You can turn on many accessibility features right away when you first set up iPad. Turn on iPad, then do any of the following:

- *Turn on VoiceOver:* Triple-click the Home button (on an iPad with a Home button) or triple-click the top button (on other iPad models).
- *Turn on Zoom:* Double-tap the screen with three fingers.
- *Turn on Switch Control, Larger Text, Smart Invert, and more:* Choose a language and country, tap , then choose the features you want.

For the complete list of accessibility features you can turn on during setup, see [Use accessibility options to set up a new iPhone, iPad, or iPod touch](#).

Change accessibility settings

After you set up iPad, you can adjust accessibility settings.

1. Go to Settings  > Accessibility.
2. Choose any of the following features:
 - Vision
 - [VoiceOver](#)
 - [Zoom](#)
 - [Display & Text Size](#)
 - [Motion](#)
 - [Spoken Content](#)
 - [Audio Descriptions](#)

- Physical and Motor
 - [Touch](#)
 - [Face ID & Attention](#)
 - [Switch Control](#)
 - [Voice Control](#)
 - [Home or top button](#)
 - [Apple TV Remote](#)
 - [Pointer Control](#)
 - [Keyboards](#)
 - [Apple Pencil](#)
 - [AirPods](#)
 - Hearing
 - [Hearing Devices](#)
 - [Sound recognition](#)
 - [RTT](#)
 - [Audio/Visual](#)
 - [Background sounds](#)
 - [Subtitles & Captioning](#)
 - General
 - [Guided Access](#)
 - [Siri](#)
 - [Accessibility Shortcut](#)
 - [Per-app settings](#)
-

VoiceOver

Turn on and practice VoiceOver on iPad

With VoiceOver—a gesture-based screen reader—you can use iPad even if you can't see the screen. VoiceOver gives audible descriptions of what's on your screen—from battery level, to who's calling, to which app your finger is on. You can also adjust the speaking rate and pitch to suit your needs.

When you touch the screen or drag your finger over it, VoiceOver speaks the name of the item your finger is on, including icons and text. To interact with the item, such as a button or link, or to navigate to another item, [use VoiceOver gestures](#).

When you go to a new screen, VoiceOver plays a sound, then selects and speaks the name of the first item on the screen (typically in the top-left corner). VoiceOver tells you when the display changes to landscape or portrait orientation, when the screen becomes dimmed or locked, and what's active on the Lock Screen when you wake iPad.

Turn VoiceOver on or off

Important: VoiceOver changes the gestures you use to control iPad. When VoiceOver is on, you must use VoiceOver gestures to operate iPad.

To turn VoiceOver on or off, use any of the following methods:

- Summon Siri and say “Turn on VoiceOver” or “Turn off VoiceOver.”
 - [Triple-click the Home button](#) (on an iPad with a Home button).
 - [Triple-click the top button](#) (on other iPad models).
 - [Use Control Center](#).
 - Go to Settings  > Accessibility > VoiceOver, then turn the setting on or off.
-

Learn and practice VoiceOver gestures

You can practice VoiceOver gestures in a special area without affecting iPad or its settings. When you practice a gesture, VoiceOver describes the gesture and the resulting action.

Try different techniques to discover which works best for you. If a gesture doesn't work, try a quicker movement, especially for a double-tap or swipe gesture. To swipe, try brushing the screen quickly with your finger or fingers. For best results using multifinger gestures, touch the screen with some space between your fingers.

1. Go to Settings  > Accessibility > VoiceOver.
2. Turn on VoiceOver, tap VoiceOver Practice, then double-tap to start.

3. Practice the following gestures with one, two, three, and four fingers:

- Tap
- Double-tap
- Triple-tap
- Swipe left, right, up, or down

4. When you finish practicing, tap Done, then double-tap to exit.

Change your VoiceOver settings on iPad

You can customize the settings for VoiceOver, such as the audio options, language, voice, speaking rate, and verbosity.

Adjust the VoiceOver volume and other audio options

- To increase or decrease the volume, press the volume buttons on iPad.
 - To set other audio options, go to Settings  > Accessibility > VoiceOver > Audio, then set options such as the following:
 - *Sounds*: Adjust and preview sound effects.
 - *Audio Ducking*: Temporarily reduce media playback volume when VoiceOver speaks.
 - *Send to HDMI*: Route audio to externally connected devices, such as an instrument amplifier or a DJ mixer.
-

Set the VoiceOver language

VoiceOver uses the same language you choose for your iPad. VoiceOver pronunciation of some languages is affected by the Region Format you choose.

1. Go to Settings  > General > Language & Region.
 2. Tap iPad Language, then choose a language.
-

Adjust the speaking voice

Go to Settings  > Accessibility > VoiceOver, then do any of the following:

- *Adjust the speaking rate*: Drag the Speaking Rate slider.
- *Choose a voice*: Tap Speech > Voice, then choose a voice. To download an enhanced voice, tap .

- *Adjust the pitch:* Tap Speech, then drag the slider. You can also turn on Use Pitch Change to have VoiceOver use a higher pitch when speaking the first item of a group (such as a list or table) and a lower pitch when speaking the last item of a group.
- *Specify the pronunciation of certain words:* Tap Speech > Pronunciations, tap +, enter a phrase, then dictate or spell out how you want the phrase to be pronounced.

Note: You can dictate only if you turned on Enable Dictation in Settings > General > Keyboards.

Set how much VoiceOver tells you

Go to Settings  > Accessibility > VoiceOver, then tap any of the following:

- *Verbosity:* Choose options to have VoiceOver speak hints, punctuation, uppercase letters, embedded links, and more. VoiceOver can even confirm rotor actions and tell you when the flashlight is turned on (available on iPad models with True Tone Flash).

To change how VoiceOver speaks punctuation, tap Punctuation, then choose a group. You can also create new groups—for example, a programming group in which “[” is spoken as “left brack.”

- *Always Speak Notifications:* VoiceOver reads notifications, including incoming text messages as they occur, even if iPad is locked. Unacknowledged notifications are repeated when you unlock iPad.
-

Customize VoiceOver settings for an activity

You can customize a group of VoiceOver settings for an activity such as programming. Apply the settings automatically when you open certain apps or by adjusting the rotor.

1. Go to Settings  > Accessibility > VoiceOver > Activities.
 2. Choose an existing activity or tap Add Activity.
 3. Adjust settings for speech, verbosity, and braille.
 4. Choose Apps or Context to automatically apply the settings for this activity.
-

Use flat or grouped navigation

Go to Settings  > Accessibility > VoiceOver > Navigation Style, then choose one of the following:

- *Flat:* VoiceOver moves sequentially through each item on the screen when you use the move next and previous commands.
 - *Grouped:* VoiceOver moves through items and groups of items on the screen. To move into a group, use a two-finger swipe right. To move out of a group, use a two-finger swipe left.
-

Adjust VoiceOver visuals

Go to Settings  > Accessibility > VoiceOver, then turn on any of the following:

- *Large Cursor*: If you have difficulty seeing the black outline around the selected item, you can enlarge and thicken the outline.
 - *Caption Panel*: The text spoken by VoiceOver is displayed at the bottom of the screen.
-

Quickly adjust VoiceOver settings from anywhere on iPad

When VoiceOver is turned on, you can access VoiceOver settings by doing a two-finger quadruple-tap.

Learn VoiceOver gestures on iPad

When VoiceOver is on, standard touchscreen gestures have different effects, and additional gestures let you move around the screen and control individual items. VoiceOver gestures include two-, three-, and four-finger taps and swipes.

You can use different techniques to perform VoiceOver gestures. For example, you can perform a two-finger tap using two fingers on one hand, one finger on each hand, or your thumbs. Instead of selecting an item and double-tapping, you can use a split-tap gesture—touch and hold an item with one finger, then tap the screen with another finger.

Explore and speak items on the screen

To explore the screen, drag your finger over it. VoiceOver speaks the name of each item you touch.

You can also use VoiceOver gestures to explore the screen in order, from top to bottom and left to right.

Action	Gesture
Select and speak an item	Tap or touch the item
Select the next item	Swipe right
Select the previous item	Swipe left
Move into a group of items	Two-finger swipe right
Move out of a group of items	Two-finger swipe left
Select the first item on the screen	Four-finger tap near the top of the screen
Select the last item on the screen	Four-finger tap near the bottom of the screen

Speak the entire screen from the top	Two-finger swipe up
Speak the entire screen from the selected item	Two-finger swipe down
Pause or continue speaking	Two-finger tap
Speak additional information, such as the position within a list or whether text is selected	Three-finger tap

For more information about navigation styles, see [Use flat or grouped navigation](#).

Scroll up, down, left, and right

Use VoiceOver gestures to move to another page.

Action	Gesture
Scroll up one page	Three-finger swipe down
Scroll down one page	Three-finger swipe up
Scroll left one page	Three-finger swipe right
Scroll right one page	Three-finger swipe left

Take action on an item

Use VoiceOver gestures to perform actions on an item.

Action	Gesture
Select an item	Tap
Activate the selected item	Double-tap
Double-tap the selected item	Triple-tap
Drag a slider	Tap the slider to select it, then swipe up or down with one finger; or double-tap and hold the slider until you hear three rising tones, then drag the slider
Start or stop the current action (for example, play or pause music or a video, take a photo in Camera, start or stop a recording, start or stop the stopwatch)	Two-finger double-tap

Dismiss an alert or return to the previous screen	Two-finger scrub (move two fingers back and forth three times quickly, making a “z”)
---	--

Edit an item’s label to make it easier to find	Two-finger double-tap and hold
--	--------------------------------

 **Tip:** As an alternative to selecting an item and double-tapping to activate it, touch and hold an item with one finger, then tap the screen with another.

Use gestures to control VoiceOver

Use these gestures to control VoiceOver.

Action	Gesture
Mute or unmute VoiceOver	Three-finger double-tap. If both VoiceOver and Zoom are enabled, use the three-finger triple-tap gesture.
Turn the screen curtain on or off (When the screen curtain is on, the screen contents are active even though the display is turned off.)	Three-finger triple-tap. If both VoiceOver and Zoom are enabled, use the three-finger quadruple-tap gesture.
Use a standard gesture	Double-tap and hold your finger on the screen until you hear three rising tones, then make the gesture. When you lift your finger, VoiceOver gestures resume. For example, to drag a volume slider with your finger instead of swiping up and down, select the slider, double-tap and hold, wait for the three tones, then slide left or right.
Open the Item Chooser	Two-finger triple-tap. To move quickly through the list of items, type a name in the search field, swipe right or left to move through the list alphabetically, or tap the table index to the right of the list and swipe up or down. You can also use handwriting to select an item by writing its name. To dismiss the Item Chooser without making a selection, do a two-finger scrub (move two fingers back and forth three times quickly, making a “z”).
Open the VoiceOver quick settings	Two-finger quadruple-tap.

Use the VoiceOver rotor

You can use the rotor to change VoiceOver settings, jump from one item to the next on the screen, select special input methods such as Braille Screen Input or Handwriting, and more. For details, see [Control VoiceOver using the rotor on iPad](#).

Use these gestures to use the rotor.

Action	Gesture
Choose a rotor setting	Two-finger rotation
Move to the previous item or increase (depending on the rotor setting)	Swipe up
Move to the next item or decrease (depending on the rotor setting)	Swipe down

Operate iPad using VoiceOver gestures

When VoiceOver is on, you need to use special gestures to unlock iPad, go to the Home Screen, open Control Center, switch apps, and more.

Unlock iPad

- *On an iPad with a Home button:* Press the Home button (if Touch ID is enabled).
- *On iPad Air (4th generation):* Press the top button (if Touch ID is enabled).
- *On an iPad with Face ID:* Wake iPad and glance at it, then drag up from the bottom edge of the screen until you hear two rising tones (if Face ID is enabled).

If prompted, enter your passcode. To avoid having your passcode spoken as you enter it, [enter your passcode silently using handwriting mode](#) or [type onscreen braille](#).

Go to the Home Screen

- Drag one finger up from the bottom edge of the screen until you hear two rising tones, then lift your finger.
- Press the Home button (on an iPad with a Home button).

Use the dock

Slide one finger up from the bottom edge until you hear two rising tones, then swipe down.

Switch to another app

Swipe right or left with five fingers to cycle through the open apps. (Make sure Gestures is turned on in Settings  > General > Multitasking & Dock.)

Alternatively, you can use the App Switcher:

1. Open the App Switcher using one of the following methods:
 - Drag one finger up from the bottom edge of the screen until you hear three tones, then lift your finger.
 - Double-click the Home button (on an iPad with a Home button).
 2. To browse the open apps, swipe left or right until the app you want is selected.
 3. Double-tap to open the app.
-

Open Control Center

- Drag one finger down from the top edge of the screen until you hear two rising tones.
- Tap any item in the status bar, then swipe up with three fingers.

To dismiss Control Center, do a two-finger scrub (move two fingers back and forth three times quickly, making a "z").

View notifications

- Drag one finger down from the top edge of the screen until you hear three rising tones.
- Tap any item in the status bar, then swipe down with three fingers.

To dismiss the notifications screen, do a two-finger scrub (move two fingers back and forth three times quickly, making a "z").

Speak status bar information

1. Tap the status bar at the top of the screen.
 2. Swipe left or right to hear the time, battery state, Wi-Fi signal strength, and more.
-

Rearrange apps on your Home Screen

Use one of the following methods:

- *Drag and drop:* Tap an icon on the Home Screen, then double-tap and hold your finger on the screen until you hear three rising tones. The item's relative location is described as you drag. Lift your finger when the icon is in its new location. Drag an icon to the edge of the screen to move it to another Home Screen.
- *Move actions:* Tap an app, then swipe down to hear available actions. When you hear "Edit Mode," double-tap to start arranging apps. Find the app you want to move, then swipe down to the Move action and double-tap. Move the VoiceOver cursor to the new destination for the app, then choose from the available actions: Cancel Move, Create New Folder, Add to Folder, Move Before, or Move After.

When you're finished, tap Done, then double-tap.

Search from the Home Screen

1. Tap anywhere on the Home Screen outside the status bar.
 2. Swipe down with three fingers.
-

Control VoiceOver using the rotor on iPad

You can use the VoiceOver rotor to change how VoiceOver works. You can adjust the VoiceOver volume or speaking rate, move from one item to the next on the screen, select special input methods such as Braille Screen Input or Handwriting, and more.

When you [use an Apple external keyboard to control VoiceOver](#), use the rotor to adjust settings such as volume, speech rate, use of pitch or phonetics, typing echo, and reading of punctuation.

Use the VoiceOver rotor

1. When VoiceOver is turned on, rotate two fingers on your screen as if you're turning a dial. If you prefer to use one finger on each hand, simultaneously drag up with one finger and drag down with the other.

VoiceOver speaks the rotor setting. Keep rotating your fingers to hear more settings. Stop rotating your fingers when you hear the setting you want.

2. Swipe your finger up or down on the screen to use the setting.

The available rotor settings and their effects depend on what you're doing. For example, if you choose Headings when you're browsing a webpage, swipe down or up to move the VoiceOver cursor to the next or previous heading.

Customize the VoiceOver rotor

1. Go to Settings  > Accessibility > VoiceOver.
 2. Do any of the following:
 - *Add or reorder the rotor settings:* Tap Rotor, then choose the settings you want, or drag  to reorder settings.
 - *Add another language:* Tap Speech > Add New Language (below Rotor Languages), then choose a language.
 - *Have VoiceOver confirm rotor actions:* Tap Verbosity, then turn on Speak Confirmation.
-

Use the onscreen keyboard with VoiceOver on iPad

VoiceOver changes how you use the onscreen keyboard when you activate an editable text field. You can enter, select, and delete text; change the keyboard language; and more.

Enter text with the onscreen keyboard

1. Select a text field, then double-tap.

The insertion point and the onscreen keyboard appear.

2. Enter text using one of the following methods:
 - *Standard typing (default):* Select a key on the keyboard by swiping left or right, then double-tap to enter the character. Or move your finger around the keyboard to select a key and, while continuing to touch the key with one finger, tap the screen with another finger. VoiceOver speaks the key when it's selected, and again when the character is entered.
 - *Touch typing:* Touch a key on the keyboard to select it, then lift your finger to enter the character. If you touch the wrong key, slide your finger to the key you want. VoiceOver speaks the character for each key as you touch it, but doesn't enter a character until you lift your finger.
 - *Direct Touch typing:* VoiceOver is disabled for the keyboard only, so you can type just as you do when VoiceOver is off.
 - *Dictation:* Use a two-finger double-tap on the keyboard to start and stop dictation.

To enter an accented character, use one of the following methods:

- *Standard typing (default)*: Select the plain character, then double-tap and hold until you hear a tone indicating alternate characters have appeared. Drag left or right to select and hear the choices. Release your finger to enter the current selection.
 - *Touch typing*: Touch and hold a character until the alternate characters appear.
-

Edit text with the onscreen keyboard

- *Move the insertion point*: Swipe up or down to move the insertion point forward or backward in the text. Use the rotor to choose whether you want to move the insertion point by character, by word, or by line. To jump to the beginning or end, double-tap the text.

VoiceOver makes a sound when the insertion point moves, and speaks the character, word, or line that the insertion point moves across. When moving forward by words, the insertion point is placed at the end of each word, before the space or punctuation that follows. When moving backward, the insertion point is placed at the end of the preceding word, before the space or punctuation that follows it.

- *Move the insertion point past the punctuation at the end of a word or sentence*: Use the rotor to switch back to character mode.

When moving the insertion point by line, VoiceOver speaks each line as you move across it. When moving forward, the insertion point is placed at the beginning of the next line (except when you reach the last line of a paragraph, when the insertion point is moved to the end of the line just spoken). When moving backward, the insertion point is placed at the beginning of the line that's spoken.

- *Delete a character*: Use .
- *Select text*: Use one of the following methods.
 - Set the rotor to Text Selection, swipe up or down to choose Character, Word, Line, or Sentence, then swipe left or right to move backward or forward. (You may need to enable Text Selection—go to Settings  > Accessibility > VoiceOver > Rotor.)
 - Set the rotor to Edit, swipe up or down to choose Select or Select All, then double-tap. If you choose Select, the word closest to the insertion point is selected when you double-tap. To increase or decrease the selection, do a two-finger scrub (move two fingers back and forth three times quickly, making a "z") to dismiss the pop-up menu, then pinch.
- *Cut, copy, or paste*: Set the rotor to Edit, select the text, swipe up or down to choose Cut, Copy, or Paste, then double-tap.
- *Fix misspelled words*: Set the rotor to Misspelled Words, then swipe up or down to jump to the previous or next misspelled word. Swipe left or right to choose a suggested replacement, then double-tap to use the replacement.

- *Undo*: Shake iPad, swipe left or right to choose the action to undo, then double-tap.
-

Change the keyboard settings

1. Go to Settings  > Accessibility > VoiceOver.
 2. Tap any of the following:
 - *Typing Style*: You can choose a new style. Or, set the rotor to Typing Mode, then swipe up or down.
 - *Phonetic Feedback*: Speak text character by character. VoiceOver first speaks the character, then its phonetic equivalent—for example, "f" and then "foxtrot."
 - *Typing Feedback*: Choose to speak characters, words, both, or nothing.
 - *Rotor*: Select the settings you want to include in the rotor.
 - *Speech*: Tap Add New Language (below Rotor Languages), then choose a language.
 - *Verbosity*: Tap Deleting Text. To have VoiceOver speak deleted characters in a lower pitch, tap Change Pitch.
-

Write with your finger using VoiceOver on iPad

With Handwriting mode, you can enter text by writing characters on the screen with your finger. In addition to normal text entry, use handwriting mode to enter your iPad passcode silently or to open apps from the Home Screen.

Use handwriting mode

1. Set the rotor to Handwriting.

If Handwriting isn't in the rotor, go to Settings  > Accessibility > VoiceOver > Rotor, then add it.
2. To choose a character type (lowercase, numbers, uppercase, or punctuation), swipe up or down with three fingers.

To hear the selected character type, tap with three fingers.

3. Trace a character on the screen with your finger.

You can also do any of the following:

- *Enter an alternate character (a character with an accent, for example):* Write the character, then swipe up or down with two fingers until you hear the type of character you want.
 - *Enter a space:* Swipe right with two fingers.
 - *Go to a new line:* Swipe right with three fingers.
 - *Delete the previous character:* Swipe left with two fingers.
4. To exit handwriting mode, do a two-finger scrub (move two fingers back and forth three times quickly, making a "z"), or set the rotor to a different setting.
-

Enter your passcode silently with handwriting mode

1. On the passcode screen, set the rotor to Handwriting.
 2. Write the characters of your passcode with your finger.
-

Select an item on the Home Screen

1. On the Home Screen, set the rotor to Handwriting.
2. Start writing the name of the item with your finger.

If there are multiple matches, continue to spell the name until it's unique, or swipe up or down with two fingers to choose from the current matches.

Quickly navigate a long list

1. Select the index to the right of the list (for example, next to your Contacts list or in the VoiceOver Item Chooser).
 2. Set the rotor to Handwriting, then use your finger to write the letter you want to navigate to.
-

Use VoiceOver on iPad with an Apple external keyboard

If you [use an Apple external keyboard](#) with iPad, you can use keyboard shortcuts to activate VoiceOver commands.

Additionally, you can use VoiceOver Help to learn the keyboard layout and the actions associated with various key combinations. VoiceOver Help speaks keys and keyboard commands as you type them, without performing the associated action.

Choose the VoiceOver modifier

The modifier is a key or set of keys you press with one or more other keys to enter VoiceOver commands. You can set the modifier to be the Caps Lock key or the Control and Option keys pressed at the same time.

1. Go to Settings  > Accessibility > VoiceOver > Typing > Modifier Keys.
2. Choose the modifier for VoiceOver commands: the Caps Lock key or the Control and Option keys.

This modifier is abbreviated as "VO" in the tables below.

VoiceOver keyboard commands

VO = modifier keys

Action	Shortcut
Turn on VoiceOver Help	VO-K
Turn off VoiceOver Help	Esc (Escape)
Select the next or previous item	VO-Right Arrow or VO-Left Arrow
Activate the selected item	VO-Space bar
Touch and hold the selected item	VO-Shift-M
Read from the current position	VO-A
Read from the top	VO-B
Pause or resume reading	Control
Copy the last spoken text to the clipboard	VO-Shift-C
Search for text	VO-F
Mute or unmute VoiceOver	VO-S
Go to the Home Screen	VO-H
Move to the status bar	VO-M
Open the notifications screen	Move to the status bar (VO-M), then Option-Up Arrow
Open Control Center	Move to the status bar (VO-M), then Option-Down Arrow
Open Search	Option-Up Arrow

Open the App Switcher	VO-H-H
Switch apps	Command-Tab or Command-Shift-Tab
Open the Item Chooser	VO-I
Change the label of the selected item	VO-/
Start, stop, or pause an action	VO-Hyphen
Swipe up or down	VO-Up Arrow or VO-Down Arrow
Adjust the rotor	VO-Command-Left Arrow or VO-Command-Right Arrow
Adjust the setting specified by the rotor	VO-Command-Up Arrow or VO-Command-Down Arrow
Turn the screen curtain on or off	VO-Shift-F11
Return to the previous screen	Esc

Quick Nav using the arrow keys

Turn on Quick Nav to control VoiceOver using the arrow keys.

Action	Shortcut
Turn Quick Nav on or off	Left Arrow-Right Arrow
Select the next or previous item	Right Arrow or Left Arrow
Select the next or previous item specified by the rotor	Up Arrow or Down Arrow
Select the first or last item	Control-Up Arrow or Control-Down Arrow
Tap an item	Up Arrow-Down Arrow
Scroll up, down, left, or right	Option-Up Arrow, Option-Down Arrow, Option-Left Arrow, or Option-Right Arrow
Adjust the rotor	Up Arrow-Left Arrow or Up Arrow-Right Arrow

Single-key Quick Nav for web browsing

To navigate a webpage quickly, turn on Quick Nav (VO-Q), then press keys on the keyboard to navigate to specific item types, such as headings or links. To move to the previous item, hold the Shift key as you press a key for the item type.

Item type	Shortcut
Heading	H
Link	L
Text field	R
Button	B
Form control	C
Image	I
Table	T
Static text	S
ARIA landmark	W
List	X
Item of the same type	M
Level 1 heading	1
Level 2 heading	2
Level 3 heading	3
Level 4 heading	4
Level 5 heading	5
Level 6 heading	6

Text editing

Use these commands (with Quick Nav turned off) to work with text. VoiceOver reads the text as you move the insertion point.

Action	Shortcut
--------	----------

Go forward or back one character	Right Arrow or Left Arrow
Go forward or back one word	Option-Right Arrow or Option-Left Arrow
Go up or down one line	Up Arrow or Down Arrow
Go to the beginning or end of the line	Command-Left Arrow or Command-Down Arrow
Go to the beginning or end of the paragraph	Option-Up Arrow or Option-Down Arrow
Go to the previous or next paragraph	Option-Up Arrow or Option-Down Arrow
Go to the top or bottom of the text field	Command-Up Arrow or Command-Down Arrow
Select text as you move	Shift + any of the insertion point movement commands above
Select all text	Command-A
Copy, cut, or paste the selected text	Command-C, Command-X, or Command-V
Undo or redo last change	Command-Z or Shift-Command-Z

Use a braille display with VoiceOver on iPad

iPad supports many international braille tables and refreshable braille displays. You can connect a Bluetooth wireless braille display to read VoiceOver output, including contracted and uncontracted braille and equations using Nemeth Code. When you edit text, the braille display shows the text in context, and your edits are automatically converted between braille and printed text. You can also use a braille display with input keys to control your iPad when VoiceOver is turned on.

For a list of supported braille displays, see the Apple Support article [Braille displays supported by iPhone, iPad, and iPod touch](#).

Connect a braille display and learn commands to control iPad

1. Turn on the braille display.
2. On iPad, go to Settings  > Bluetooth, turn on Bluetooth, then choose the display.
3. On iPad, go to Settings > Accessibility > VoiceOver > Braille, then choose the display.
4. To see the braille commands for controlling iPad, tap More Info, then tap Braille Commands.

See the Apple Support article [Common braille commands for VoiceOver on your iPhone, iPad, and iPod touch](#).

Change the braille display settings

1. On iPad, go to Settings  > Accessibility > VoiceOver > Braille.
2. Set any of the following:

Setting	Description
Output	Choose uncontracted six-dot, uncontracted eight-dot, or contracted braille.
Input	Choose uncontracted six-dot, uncontracted eight-dot, or contracted braille; you can also turn on Automatic Translation.
Braille Screen Input	Choose the input method for entering braille using the screen. See Type braille directly on iPad using VoiceOver .
Braille Tables	Add tables that appear in the Braille Table rotor.
Status Cells	Turn on the general and text status cells and choose their location.
Equations use Nemeth Code	Turn on Nemeth Code for mathematical equations.
Show On-screen Keyboard	Display the keyboard on the screen.
Turn Pages when Panning	Automatically turn pages when panning.
Word Wrap	Wrap words to the next line.
Braille Alert Messages	When turned on, your braille display shows an alert message for the specified duration.
Ignore Chord Duration	Adjust the amount of time required before subsequent key presses are recognized as braille chords.
Auto Advance Duration	Adjust this setting to your preferred reading speed.

Output closed captions in braille during media playback

1. On iPad, go to Settings  > Accessibility > VoiceOver > Verbosity.
 2. Choose Braille or Speech and Braille.
-

Type braille directly on iPad using VoiceOver

If you turn on Braille Screen Input, you can use your fingers to enter six-dot, eight-dot, or contracted braille directly on the iPad screen, without a physical braille keyboard.

Enter braille on the screen

1. Set the rotor to Braille Screen Input.

If you don't see Braille Screen Input in the rotor, go to Settings  > Accessibility > VoiceOver > Rotor, then select it from the list.

2. Place iPad in one of the following positions:

- *Tabletop mode*: Lay iPad flat in front of you.
- *Screen away mode*: Hold iPad with the screen facing away so your fingers curl back to tap the screen.

3. Enter braille characters by tapping the screen with one or more fingers at the same time.

 **Tip:** To have iPad read dots aloud, tap and hold the dots, then when you hear the timer tones and announcement, release the dots.

To move the entry dots to match your natural finger positions, double-tap all the dots.

You can also use gestures to perform actions such as the following:

Action	Gesture
Enter a space	Swipe right with one finger; in screen away mode, swipe to <i>your</i> right
Delete the previous character	Swipe left with one finger
Move to a new line	Swipe right with two fingers
Cycle through spelling suggestions	Swipe up or down with one finger
Enter a carriage return, or send a message (in Messages)	Swipe up with three fingers
Cycle through the braille modes	Swipe left or right with three fingers
Translate immediately (when contractions are enabled)	Swipe down with two fingers
Switch to the next keyboard	Swipe up with two fingers

4. To exit Braille Screen Input, do a two-finger scrub (move two fingers back and forth three times quickly, making a "z"), or adjust the rotor to another setting.
-

Change Braille Screen Input settings

1. Go to Settings  > Accessibility > VoiceOver > Braille > Braille Screen Input.
 2. Do any of the following:
 - Set six-dot, eight-dot, or contracted braille as the default.
 - Reverse the dot positions for six-dot and eight-dot braille.
 3. To view or edit the commands and gestures you can perform when Braille Screen Input is turned on, go to Settings > Accessibility > VoiceOver > Commands > Braille Screen Input.
-

Customize VoiceOver gestures and keyboard shortcuts on iPad

You can customize the gestures and keyboard shortcuts that activate VoiceOver commands.

1. Go to Settings  > Accessibility > VoiceOver > Commands.
 2. Tap any of the following:
 - *All Commands*: Navigate to the command you want to customize, then tap Edit, Add Gesture, or Add Keyboard Shortcut.
 - *Touch Gestures*: List the gestures and the associated commands.
 - *Handwriting*: List the gestures for handwriting and the associated commands.
 - *Braille Screen Input*: List the gestures for Braille Screen Input and the associated commands.
-

To clear your custom gestures and keyboard shortcuts, tap Reset VoiceOver Commands.

Use VoiceOver on iPad with a pointer device

If you use a pointer device with iPad, you can adjust how it works with VoiceOver.

1. Go to Settings  > Accessibility > VoiceOver.
 2. Below Pointer Control, tap any of the following:
 - *Pointer*: Set the pointer to ignore, follow, or move the VoiceOver cursor.
 - *Speak Under Pointer*: You can adjust the delay to speak the item under the pointer.
-

Use VoiceOver in apps on iPad

You can use VoiceOver to interact with apps, even if you can't see the screen. VoiceOver is supported in the built-in Apple apps that came with your iPad—such as Maps 🗺️, Camera 📷, Photos 📱, Voice Memos 🗣️, Safari 🌐, and more. With VoiceOver Recognition, you can get descriptions of images and screen elements even on webpages and in apps without accessibility information.

Read PDF documents in Apple Books or Files using VoiceOver

VoiceOver can read detailed information—such as forms, tables, and lists—in PDF documents.

Browse the web in Safari using VoiceOver

- *Search the web:* Select the address field, double-tap to invoke the keyboard, then enter a search term, phrase, or URL. Select a search suggestion, then double-tap.
- *Skip to the next element on a webpage:* Set the rotor to the element type—such as headings, links, and form controls—then swipe up or down.
- *Set the rotor settings for web browsing:* Go to Settings 📱 > Accessibility > VoiceOver > Rotor. Select or deselect items, or drag ≡ up or down to reposition an item.
- *Skip images while navigating:* Go to Settings > Accessibility > VoiceOver > Navigate Images. You can choose to skip all images or only those without descriptions.
- *Reduce page clutter for easier reading and navigation:* In the Safari address field, select the Format Options button, double-tap, select Show Reader View (not available for all webpages), then double-tap.

 **Tip:** If you [use an Apple external keyboard](#) with iPad, you can [use single-key Quick Nav for web browsing](#).

Read math equations using VoiceOver

VoiceOver can read math equations on the web (encoded using MathML) and in supported Apple apps such as Numbers and Keynote.

- *Hear an equation:* Have VoiceOver read the text as usual. VoiceOver says “math” before it starts reading an equation.
- *Explore the equation:* Double-tap the selected equation to display it in full screen and move through it one element at a time. Swipe left or right to read elements of the equation. Use the rotor to select Symbols, Small Expressions, Medium Expressions, or Large Expressions, then swipe up or down to hear the next element of that size. You can continue to double-tap the selected element to “drill down” into the equation to focus on the selected element, then swipe left or right, or up or down, to read one part at a time.

Equations spoken by VoiceOver can also be output to a braille device using Nemeth Code, as well as the codes used by Unified English Braille, British English, French, and Greek. See [Use a braille display with VoiceOver on iPad](#).

Navigate in Maps using VoiceOver

- *Control how the map tracks your current location:* Select ↶, then double-tap until you hear the tracking option you want.
 - *Tracking on:* The map automatically centers on your current location.
 - *Tracking on with heading:* The map automatically centers on your current location and rotates so that the heading you're facing is at the top of the screen. In this mode, iPad speaks street names and points of interest as you approach them.
 - *Tracking off:* The map doesn't automatically center on your current location.
 - *Explore the map:* Drag your finger around the screen, or swipe left or right to move to another item.
 - *Zoom in or out:* Select the map, set the rotor to Zoom, then swipe up or down with one finger.
 - *Pan the map:* Swipe with three fingers.
 - *Browse points of interest shown on the map:* Set the rotor to Points of Interest, then swipe up or down with one finger.
 - *Get information about a location:* Select the location (for example, a business, landmark or pin), then double-tap to open the information card. Swipe left or right to hear information such as directions, street address, phone number, business hours, and customer reviews.
-

Take photos and videos in Camera using VoiceOver

When you use Camera, VoiceOver describes objects in the viewfinder.

To take a photo or start, pause, or resume a video recording, double-tap the screen with two fingers.

Trim videos in Photos using VoiceOver

1. Select the video you want to trim, then double-tap.
 2. Select Edit, then double-tap.
 3. Select Start or End (on the media scrubber), then swipe up or down to adjust the start or end time.
 4. When you're finished, select Done, then double-tap.
-

Trim recordings in Voice Memos using VoiceOver

1. Select the recording you want to trim, then double-tap.
 2. Select Edit at the top right, then double-tap.
 3. Select , then double-tap.
 4. In the Waveform Overview, select Trim Beginning or Trim End, then swipe up or down to adjust the start or end time.
 5. Select Trim, then double-tap.
 6. Select Save, then double-tap.
 7. Select Done, then double-tap.
-

Use VoiceOver Recognition on the web or in apps without accessibility information

1. Go to Settings  > Accessibility > VoiceOver > VoiceOver Recognition.
 2. Turn on any of the following:
 - *Image Descriptions*: Get descriptions of images in apps and on the web.
 - *Screen Recognition*: Get descriptions of screen elements in apps.
 - *Text Recognition*: Get descriptions of text found in images.
 3. Tap Feedback Style, then choose Speak, Play Sound, or Do Nothing.
-

Vision

Zoom in on the iPad screen

In many apps, you can zoom in or out on specific items. For example, you can double-tap or pinch to look closer in Photos or expand webpage columns in Safari. You can also use the Zoom feature to magnify the screen no matter what you're doing. You can magnify the entire screen (Full Screen Zoom), magnify part of the screen with a resizable lens (Window Zoom), or magnify a portion of the screen that stays in one place (Pinned Zoom). And, you can use Zoom together with VoiceOver.

Set up Zoom

1. Go to Settings  > Accessibility > Zoom, then turn on Zoom.

2. Adjust any of the following:

- *Follow Focus*: Track your selections, the text insertion point, and your typing.
- *Smart Typing*: Switch to Window Zoom when a keyboard appears.
- *Keyboard Shortcuts*: Control Zoom using shortcuts on an external keyboard.
- *Zoom Controller*: Turn the controller on, set controller actions, and adjust the color and opacity.
- *Zoom Region*: Choose Pinned Zoom, Full Screen Zoom, or Window Zoom.
- *Zoom Filter*: Choose None, Inverted, Grayscale, Grayscale Inverted, or Low Light.
- *Maximum Zoom Level*: Drag the slider to adjust the level.

3. If you use iPad with a pointer device, you can also set the following below Pointer Control:

- *Zoom Pan*: Choose Continuous, Centered, or Edges to set how the screen image moves with the pointer.
- *Adjust Size with Zoom*: Allow the pointer to scale with zoom.

4. To add Zoom to Accessibility Shortcut, go to Settings > Accessibility > Accessibility Shortcut, then tap Zoom.

Use Zoom

1. Double-tap the screen with three fingers or [use accessibility shortcuts](#) to turn on Zoom.

2. To see more of the screen, do any of the following:

- *Adjust the magnification*: Double-tap the screen with three fingers (without lifting your fingers after the second tap), then drag up or down. Or triple-tap with three fingers, then drag the Zoom Level slider.
- *Move the Zoom lens*: (Window Zoom) Drag the handle at the bottom of the Zoom lens.
- *Pan to another area*: (Full Screen Zoom) Drag the screen with three fingers.

3. To adjust the settings with the Zoom menu, triple-tap with three fingers, then adjust any of the following:

- *Choose Region*: Choose Pinned Zoom, Full Screen Zoom, or Window Zoom.
- *Resize Lens*: (Window Zoom) Tap Resize Lens, then drag any of the round handles that appear.
- *Choose Filter*: Choose Inverted, Grayscale, Grayscale Inverted, or Low Light.
- *Show Controller*: Show the Zoom Controller.

4. To use the Zoom Controller, do any of the following:

- *Show the Zoom menu:* Tap the controller.
- *Zoom in or out:* Double-tap the controller.
- *Pan:* When zoomed in, drag the controller.

While using Zoom with an Apple external keyboard, the Zoom region follows the insertion point, keeping it in the center of the display. See [Apple external keyboards for iPad](#).

To turn off Zoom, double-tap the screen with three fingers or [use accessibility shortcuts](#).

Adjust the display and text size on iPad

If you have color blindness or other vision challenges, you can customize the display settings to make the screen easier to see.

Use display accommodations

1. Go to Settings  > Accessibility > Display & Text Size.

2. Adjust any of the following:

- ***Bold Text:*** Display the text in boldface characters.
- ***Larger Text:*** Turn on Larger Accessibility Sizes, then adjust the text size using the Font Size slider.

This setting adjusts to your preferred text size in apps that support Dynamic Type, such as Settings, Calendar, Contacts, Mail, Messages, and Notes.

- ***Button Shapes:*** This setting underlines text you can tap.
- ***On/Off Labels:*** This setting indicates switches turned on with "1" and switches turned off with "0".
- ***Reduce Transparency:*** This setting reduces the transparency and blurs on some backgrounds.
- ***Increase Contrast:*** This setting improves the contrast and legibility by altering color and text styling.

Apps that support Dynamic Type—such as Settings, Calendar, Contacts, Mail, Messages, and Notes—adjust to your preferred text size.

- ***Differentiate Without Color:*** This setting replaces user interface items that rely on color to convey information with alternatives.
- ***Smart Invert or Classic Invert:*** Smart Invert Colors reverses the colors of the display, except for images, media, and some apps that use dark color styles.
- ***Color Filters:*** Tap a filter to apply it. To adjust the intensity or hue, drag the sliders.
- ***Reduce White Point:*** This setting reduces the intensity of bright colors.
- ***Auto-Brightness:*** This setting automatically adjusts the screen brightness for current light conditions using the built-in ambient light sensor.

To learn about applying these effects to specific apps, see [Customize accessibility settings for specific apps on iPad](#). To learn about applying these effects to only the contents of the zoom window, see [Zoom in on the iPad screen](#).

Reduce or stop the motion of screen elements on iPad

If you have sensitivity to motion effects or screen movement on your iPad, you can stop or reduce the movement of some screen elements, such as:

- Parallax effect of wallpaper, apps, and alerts
- Screen transitions
- Siri animations

- Typing autocompletion
 - Animated effects in Messages
-

1. Go to Settings  > Accessibility > Motion.

2. Turn on or off any of the following controls:

- *Reduce Motion*: This setting reduces the motion of the user interface, including the parallax effect of icons.
 - *Prefer Cross-Fade Transitions*: This setting reduces the motion of user interface controls that slide in and out when appearing and disappearing.
 - *Auto-Play Message Effects*: This setting allows the Messages app to automatically play full-screen effects. If you turn this setting off, you can still manually play effects by tapping Replay below the message bubble.
 - *Auto-Play Video Previews*: This setting allows apps such as the App Store to automatically play video previews.
 - *Limit Frame Rate*: This setting limits the frame rate of the display to 60 frames per second (on supported iPad models).
-

To learn about applying these effects to specific apps, see [Customize accessibility settings for specific apps on iPad](#).

Hear iPad speak the screen, selected text, and typing feedback

Even if VoiceOver is turned off, you can have iPad speak selected text or the entire screen. iPad can also provide feedback and speak text corrections and suggestions as you type.

Change the speech settings

1. Go to Settings  > Accessibility > Spoken Content.

2. Adjust any of the following:

- *Speak Selection*: To hear text you selected, tap the Speak button.
- *Speak Screen*: To hear the entire screen, swipe down with two fingers from the top of the screen.
- *Speech Controller*: Show the controller for quick access to Speak Screen and Speak on Touch.
- *Highlight Content*: iPad can highlight words, sentences, or both as they're spoken. You can change the highlight color and style.
- *Typing Feedback*: You can configure typing feedback for the onscreen and external keyboards and choose to have iPad speak each character, entire words, auto-corrections, auto-capitalizations, and typing predictions.

To hear typing predictions, you also need to go to Settings > General > Keyboards, then turn on Predictive.

- *Voices*: Choose a voice and dialect.
- *Speaking Rate*: Drag the slider.
- *Pronunciations*: Dictate or spell out how you want certain phrases to be spoken.

Hear iPad speak

 **Ask Siri.** Say something like: "Speak screen." [Learn how to ask Siri.](#)

Or do any of the following:

- *Hear selected text*: Select the text, then tap Speak.
- *Hear the entire screen*: Swipe down with two fingers from the top of the screen. Use the controls that appear to pause speaking or adjust the rate.
- *Hear typing feedback*: Start typing. To hear typing predictions (when turned on), touch and hold each word.

Hear audio descriptions for video content on iPad

If you have video content that includes audio descriptions of scenes, iPad can play the descriptions for you.

-
1. Go to Settings  > Accessibility > Audio Descriptions.
 2. Turn on Audio Descriptions.
-

Touch

Use AssistiveTouch on iPad

AssistiveTouch helps you use iPad if you have difficulty touching the screen or pressing the buttons. You can use AssistiveTouch without any accessory to perform actions or gestures that are difficult for you. You can also use a compatible adaptive accessory (such as a joystick) together with AssistiveTouch to control iPad.

With AssistiveTouch, you can use a simple tap (or the equivalent on your accessory) to perform actions such as the following:

- Open the AssistiveTouch menu
 - Go to the Home Screen
 - Double-tap
 - Perform multifinger gestures
 - Perform scroll gestures
 - Summon Siri
 - Access Control Center, notifications, the Lock Screen, or the App Switcher
 - Adjust the volume on iPad
 - Shake iPad
 - Take a screenshot
 - Use Apple Pay
 - Speak screen
 - Adjust dwell settings
 - Control Analytics
 - Restart iPad
-

Set up AssistiveTouch

 **Ask Siri.** Say something like: “Turn on AssistiveTouch” or “Turn off AssistiveTouch.” [Learn how to ask Siri.](#)

Or do the following:

1. Go to Settings  > Accessibility > Touch > AssistiveTouch.

2. Turn on AssistiveTouch.

3. To customize AssistiveTouch, tap any of the following:

- *Customize Top Level Menu:* Tap an icon to change its action. Tap  or  to change the number of icons in the menu. The menu can have up to eight icons.
- *Single-Tap, Double-Tap, or Long Press:* Assign custom actions that run when you interact with the menu button.
- *Create New Gesture:* Add your favorite gestures.
- *Idle Opacity:* Adjust the visibility of the menu button when not in use.
- *Confirm with AssistiveTouch:* On an iPad with Face ID, use AssistiveTouch to confirm payments with Face ID instead of double-clicking the top button. Or on iPad Air (4th generation), use AssistiveTouch to confirm payments with your passcode instead of double-clicking the top button.

 **Tip:** To turn AssistiveTouch on or off quickly, [triple-click the Home button](#) (on an iPad with a Home button) or [triple-click the top button](#) (on other iPad models).

Add a pointer device

You can connect Bluetooth and USB assistive pointer devices, such as trackpads, joysticks, and mouse devices.

1. Go to Settings  > Accessibility > Touch > AssistiveTouch.
2. Turn on AssistiveTouch.

3. Below Pointer Devices, tap any of the following:

- *Devices*: Pair or unpair devices and customize buttons.
- *Mouse Keys*: Allow the AssistiveTouch pointer to be controlled using the keyboard number pad.
- *Pointer Style*: Adjust the size, color, and auto-hide settings.
- *Show Onscreen Keyboard*: Display the onscreen keyboard.
- *Always Show Menu*: Show the AssistiveTouch menu when a pointer device is connected.
- *Tracking speed*: Drag the slider to adjust the speed.
- *Drag Lock*: Turn on to enable dragging.
- *Zoom Pan*: Choose Continuous, Centered, or Edges.
- *Dwell Control*: Turn on to perform a dwell action when the cursor is held still. To adjust the amount of time needed to initiate a dwell action, tap **-** or **+**.
- *Fallback Action*: Turn on to revert the dwell action to the selected fallback action after performing an operation.
- *Movement Tolerance*: Adjust the distance you can move while dwelling on an item.
- *Hot Corners*: Perform a selected action—such as take a screenshot, open Control Center, summon Siri, scroll, or use a shortcut—when the cursor dwells in a corner of the screen.

Move the AssistiveTouch menu button

Drag the menu button to a new location on the screen.

Use AssistiveTouch

Tap the menu button, then choose an action or gesture.

For a multifinger gesture, do the following:

- *Pinch*: Tap Custom, then tap Pinch. When the pinch circles appear, touch anywhere on the screen to move the pinch circles, then drag them in or out to perform a pinch gesture. When you finish, tap the menu button.
- *Multifinger swipe or drag*: Tap Device > More > Gestures, then tap the number of digits needed for the gesture. When the circles appear on the screen, swipe or drag in the direction required by the gesture. When you finish, tap the menu button.

To return to the previous menu, tap the arrow in the center of the menu. To exit the menu without performing a gesture: Tap anywhere outside the menu.

Create custom gestures

You can add your favorite gestures (such as touch and hold or two-finger rotation) to the AssistiveTouch menu. You can even create several gestures with different degrees of rotation.

1. Go to Settings  > Accessibility > Touch > AssistiveTouch > Create New Gesture.
2. Perform your gesture on the recording screen. For example:
 - *Touch-and-hold gesture*: Touch and hold your finger in one spot until the recording progress bar reaches halfway, then lift your finger. Be careful not to move your finger while recording, or the gesture will be recorded as a drag.
 - *Two-finger rotation gesture*: Rotate two fingers on the iPad screen around a point between them. (You can do this with a single finger or stylus—just create each arc separately, one after the other.)

If you record a sequence of taps or drag gestures, they're all played back at the same time. For example, using one finger or a stylus to record four separate, sequential taps at four locations on the screen creates a simultaneous four-finger tap.

3. If your gesture doesn't turn out quite right, tap Cancel, then try again.
4. When you're satisfied with your gesture, tap Save, then name the gesture.

To use your custom gesture, tap the AssistiveTouch menu button, tap Custom, then choose the gesture. When the blue circles representing your gesture appear, drag them to where you want to use the gesture, then release.

Adjust touch settings on iPad

If you have difficulty using the touchscreen or buttons, you can change how iPad responds to your touch.

Adjust Haptic Touch settings

You can adjust the time needed for touch-and-hold gestures.

1. Go to Settings  > Accessibility > Touch > Haptic Touch, then choose Fast or Slow.
 2. Test your new settings on the image at the bottom of the screen.
-

Use touch accommodations

1. Go to Settings  > Accessibility > Touch > Touch Accommodations.

2. You can configure iPad to do any of the following:

- *Respond to touches of a certain duration:* Turn on Hold Duration, then tap **-** or **+** to adjust the duration (the default is 0.10 seconds).

To perform swipe gestures without waiting for the specified hold duration, tap Swipe Gestures, then turn on Swipe Gestures. You can choose the amount of required movement before a swipe gesture begins.

- *Ignore multiple touches:* Turn on Ignore Repeat, then tap **-** or **+** to adjust the amount of time allowed between multiple touches. Then, if you touch the screen several times quickly, iPad treats the touches as one.
- *Respond to the first or last place you touch:* Choose Use Initial Touch Location or Use Final Touch Location.

If you choose Use Initial Touch Location, iPad uses the location of your first tap—when you tap an app on the Home Screen, for example. If you choose Use Final Touch Location, iPad registers the tap where you lift your finger. iPad responds to a tap when you lift your finger within a certain period of time. Tap **-** or **+** to adjust the timing. Your device can respond to other gestures, such as a drag gesture, if you wait longer than the gesture delay.

Turn off Shake to Undo

If you tend to shake iPad by accident, go to Settings  > Accessibility > Touch, then turn off Shake to Undo.

Route audio calls

You can automatically route the audio of phone or FaceTime calls to your headphones, speaker, or hearing devices.

1. Go to Settings  > Accessibility > Touch > Call Audio Routing.
2. Choose an audio destination for calls.
3. To have iPad answer calls automatically, tap Auto-Answer Calls, turn on Auto-Answer Calls, then tap **-** or **+** to set the duration of time before the call is answered.

During a call, you can switch the audio routing from your hearing aid to the iPad speaker by removing the hearing aid from your ear. See [Use hearing devices with iPad](#).

Physical and Motor

Change Face ID and attention settings on iPad

On an iPad with Face ID, you can adjust Face ID and attention settings if you have physical or vision limitations.

Set up Face ID with Accessibility Options

By default, setting up Face ID requires you to gently move your head in a circle to show all the angles of your face. If you can't perform the full range of head motion, you can still set up Face ID without moving your head.

1. Go to Settings  > Face ID & Passcode.
2. Position your face within the frame, then tap Accessibility Options.

Face ID is still secure but requires more consistency in how you look at iPad.

Change attention settings

For additional security, Face ID is *attention aware*. It unlocks iPad only when your eyes are open and looking at the screen. iPad can also reveal notifications and messages, keep the screen lit when you're reading, or lower the volume of alerts.

If you don't want iPad to check for your attention, do the following:

1. Go to Settings  > Face ID & Passcode.
2. Turn on or off any of the following:
 - Require Attention for Face ID
 - Attention Aware Features

These settings are turned off by default if you turn on VoiceOver when you first set up iPad.

Note: Requiring attention makes Face ID more secure.

Switch Control

Set up Switch Control on iPad

If you have physical difficulties, you can use Switch Control to operate iPad using one or more switches. With switches, you can select, tap, drag, type, and even draw freehand. You use a switch to select an item or location on the screen, then use the same (or a different) switch to choose an action.

Add a switch

You can use the iPad screen, camera, microphone, or an external adaptive switch.

Before you add an external switch, connect it to iPad, following the instructions that came with the switch. If the switch connects using Bluetooth, pair it with iPad—turn on the switch, go to Settings  > Bluetooth, turn on Bluetooth, tap the name of the switch, then follow the onscreen instructions.

1. Go to Settings > Accessibility > Switch Control > Switches.
2. Tap Add New Switch, then choose any of the following:
 - *External*: Choose a Bluetooth switch or Made For iPhone (MFi) switch that plugs into the Lightning connector on iPad.
 - *Screen*: Tap the iPad screen to activate the switch.
 - *Camera*: Move your head left or right while facing the camera.
 - *Sound*: Make voiced and voiceless sounds such as “Oo” or a pop.
3. Assign an action to the switch.

To ensure Switch Control functions correctly, you must assign the Select Item action to at least one switch.

Choose a scanning style and customize Switch Control

You can adjust the behavior of Switch Control in a variety of ways, to suit your specific needs and style.

1. Go to Settings  > Accessibility > Switch Control.
2. Tap Scanning Style, then choose one of the following:
 - *Auto Scanning*: The focus automatically moves to the next item after a specified duration.
 - *Manual Scanning*: You trigger a switch to move the focus to the next item (requires multiple switches).
 - *Single Switch Step Scanning*: You trigger a switch to move the focus to the next item; if no action is taken with a specified duration, the item with the focus is automatically activated.

3. Customize Switch Control by setting options such as the following:

- *Switches*: Add switches and specify their function.
- *Recipes*: Create, edit, and choose recipes to temporarily assign special actions to switches.
- *Auto Scanning Time*: Adjust the item scanning speed.
- *Pause on First Item*: Set scanning to pause on the first item in a group.
- *Loops*: Choose how many times to cycle through the screen before hiding Switch Control.
- *Move Repeat*: Set the delay before moving to the previous or next item while a switch is pressed.
- *Long Press*: Set whether a different action occurs when you press and hold a switch, and how long to wait before performing that action.
- *Tap Behavior*: Choose a tap behavior and set the interval for performing a second switch action to show the Scanner Menu.
- *Focused Item After Tap*: Choose whether Switch Control resumes scanning at an item you tap or from the beginning.
- *Hold Duration*: Set whether and how long you need to hold a switch down before it's accepted as a switch action.
- *Ignore Repeat*: Ignore accidental repeated switch triggers.
- *Gliding Cursor*: Adjust the point scanning style and speed.
- *Head Tracking*: Adjust settings for head tracking (on an iPad with Face ID) and assign actions to facial expressions.
- *Sound Effects*: Turn on sound effects.
- *Speech*: Speak items as they're scanned.
- *Menu Items*: Choose the actions shown in the Scanner Menu and the order in which they appear.
- *Group Items*: Group items for faster navigation.
- *Large Cursor*: Make the selection cursor larger.
- *Cursor Color*: Choose a different color.
- *Saved Gestures*: Create and save custom gestures to the Scanner Menu.
- *Confirm with Switch Control*: On an iPad with Face ID, use Switch Control to confirm payments with Face ID instead of double-clicking the top button. Or on iPad Air (4th generation), use Switch Control to confirm payments with your passcode instead of double-clicking the top button.

Turn Switch Control on or off

Important: Switch Control changes the gestures you use to control iPad.

To turn Switch Control on or off, use any of the following methods:

- Go to Settings  > Accessibility > Switch Control.
- [Triple-click the Home button](#) (on an iPad with a Home button).
- [Triple-click the top button](#) (on other iPad models).
- [Use Control Center](#).

Use Switch Control on iPad

With Switch Control, you can use the following methods to select an item on the screen:

- *Item scanning:* The focus moves (automatically or manually) from one item to the next until you select an item; this is the default scanning method.
- *Point scanning:* You select an item on the screen by pinpointing it with scanning crosshairs.
- *Head tracking:* (on an iPad with Face ID) You move your head to control a pointer on the screen. You can also use facial expressions to perform actions.

After you select an item, you can choose an action (for example, tap, drag, or pinch) in the Scanner Menu.

Use item scanning

With item scanning, the focus sequentially moves from one item to the next item on the screen.

1. If you use Auto Scanning, watch or listen as the focus moves. If you use Manual Scanning, trigger your Move to Next Item action to move the focus.
2. When the focus surrounds the item you want, trigger your Select Item switch.

3. In the Scanner Menu, choose an action such as the following:

- Tap
- Gestures
- Scroll
- Media Controls
- More (the dots at the bottom of the menu) for more options
- Home (to return to the Home Screen)
- Device (for other hardware actions)
- Settings (to adjust Switch Control behavior)

The available actions in the Scanner Menu depend on the selected item.

To dismiss the Scanner menu without choosing an action, trigger your switch while the original item is highlighted and all the icons in the Scanner Menu are dimmed.

Use point scanning

With point scanning, you select an item on the screen by pinpointing it with scanning crosshairs.

1. Use item scanning to select an item.
2. In the Scanner Menu, choose Gliding Cursor.
3. To position the vertical crosshair, do the following:
 - Trigger your Select Item switch when the wide vertical band is over the item you want.
 - Trigger your Select Item switch again when the fine vertical line is over the item.
4. Repeat to position the horizontal crosshair.
5. Choose an action from the Scanner Menu.

To return to item scanning, choose Item Mode in the Scanner Menu.

Use head tracking

On an iPad with Face ID, you can move your head to control a pointer on the screen. You can also use facial expressions to perform actions.

1. Go to Settings  > Accessibility > Switch Control > Head Tracking.

2. Turn on Head Tracking, then do any of the following:

- *Assign actions to facial expressions:* Choose actions to perform when you smile, open your mouth, stick out your tongue, or raise your eyebrows.
 - *Choose how the pointer tracks your head movement:* Tap Tracking Mode, then choose With Face, When Facing Screen Edges, or Relative to Head.
 - *Adjust the pointer speed:* Tap  or .
-

Use Voice Control to interact with iPad

You can control iPad with just your voice. Speak commands to perform gestures, interact with screen elements, dictate and edit text, and more.

Set up Voice Control

Before you turn on Voice Control for the first time, make sure iPad is connected to the internet over a Wi-Fi network. After iPad completes a one-time file download from Apple, you don't need an internet connection to use Voice Control.

1. Go to Settings  > Accessibility > Voice Control.
2. Tap Set Up Voice Control, then tap Continue to start the file download.

When the download is complete,  appears in the status bar to indicate Voice Control is turned on.

3. Set options such as the following:

- *Language:* Set the language and download languages for offline use.
 - *Customize Commands:* View the available commands and create new commands.
 - *Vocabulary:* Teach Voice Control new words.
 - *Show Confirmation:* When Voice Control recognizes a command, a visual confirmation appears at the top of the screen.
 - *Play Sound:* When Voice Control recognizes a command, an audible sound is played.
 - *Show Hints:* See command suggestions and hints.
 - *Overlay:* Display numbers, names, or a grid over screen elements.
 - *Attention Aware:* On an iPad with Face ID, Voice Control wakes up when you look at your iPad and goes to sleep when you look away.
-

Turn Voice Control on or off

Turn Voice Control on or off

After you set up Voice Control, you can turn it on or off quickly by using any of the following methods:

- Summon Siri and say "Turn on Voice Control."
 - Say "Turn off Voice Control."
 - Add Voice Control to Accessibility Shortcuts—go to Settings  > Accessibility > Accessibility Shortcut, then tap Voice Control.
-

Learn Voice Control commands

When Voice Control is turned on, you can say commands such as the following:

- "Open Control Center"
- "Go home"
- "Tap *item name*"
- "Open *app name*"
- "Take screenshot"
- "Turn up volume"

To learn more Voice Control commands, say "Show me what to say" or "Show commands."

Use a screen overlay

For faster interactions, you can navigate iPad with a screen overlay that shows item names, numbers, or a grid.

- *Item names*: Say "Show names" or "Show names continuously," then say "Tap *item name*."
- *Numbers*: Say "Show numbers" or "Show numbers continuously," then say the number next to the item you want. You can also give a command to perform a gesture, such as "Tap *number*," "Long press *number*," "Swipe up at *number*," or "Double tap *number*."
- *Grid*: To interact with a screen location not represented by an item name or number, say "Show grid" or "Show grid continuously," then do any of the following:
 - *Drill down*: Say a number to show a more detailed grid.
 - *Say a command to interact with an area of the grid*: Say something like, "Tap *number*" or "Zoom in *number*."

 **Tip:** To adjust the number of grid rows and columns, go to Settings  > Accessibility > Voice Control > Overlay, then select Numbered Grid. When Voice Control is turned on, you can also say something like, "Show grid with five rows," or "Show grid continuously with three columns."

To turn off the overlay, say “Hide names,” “Hide numbers,” or “Hide grid.”

Switch between Dictation Mode and Command Mode

When you’re working in a text input area—for example, writing a document, email, or message—you can easily switch between Dictation mode and Command mode as needed. In Dictation mode (the default), any words you say that aren’t Voice Control commands are entered as text. In Command mode, those words are ignored and aren’t entered as text; Voice Control responds only to commands. Command mode is especially helpful when you need to use a series of commands and want to prevent what you say from inadvertently being entered in a text input area.

To switch to Command mode, say “Command mode.” When Command mode is on, a dark icon of a crossed-out character appears in the text input area to indicate you can’t dictate. To switch back to Dictation mode, say “Dictation mode.”

Adjust settings for the Home or top button

You can adjust accessibility settings for the Home button (on an iPad with a Home button) or top button (on other iPad models).

1. Go to Settings  > Accessibility, then tap Home Button (on an iPad with a Home button) or Top Button (on other iPad models).
 2. Set any of the following:
 - *Click Speed*: Choose the speed required to double-click or triple-click the button—Default, Slow, or Slowest.
 - *Press and Hold to Speak*: Choose whether Siri responds when you press and hold the button.
 - *Rest Finger to Open*: On an iPad with Touch ID, you can unlock iPad by resting your finger on the button.
-

On an iPad with Face ID, you can also [use AssistiveTouch](#) or [use Switch Control](#) to confirm payments with Face ID instead of double-clicking the top button.

Use buttons on the Apple TV Remote on iPad

On the Apple TV Remote on iPad, you can use buttons instead of swipe gestures.

Go to Settings  > Accessibility > Apple TV Remote, then turn on Directional Buttons.

Change the pointer appearance when using a mouse or trackpad with iPad

If you [use a mouse or trackpad](#) with iPad, you can change the appearance of the pointer by adjusting its color, shape, size, scrolling speed, and more.

Go to Settings  > Accessibility > Pointer Control, then adjust any of the following:

- Increase Contrast
- Automatically Hide Pointer
- Color
- Pointer size
- Pointer Animations
- Trackpad Inertia (available when connected to a supported multi-touch trackpad)
- Scrolling Speed

To customize the buttons of the pointing device, go to Settings > Accessibility > Touch > AssistiveTouch > Devices.

See [Use VoiceOver on iPad with a pointer device](#) and [Zoom in on the iPad screen](#).

Adjust the onscreen and external keyboard settings on iPad

You can adjust the onscreen (software) keyboard on iPad. If you use an external (hardware) keyboard with iPad, you can customize keyboard shortcuts and change settings such as the key repeat rate.

Set the onscreen keyboard to display only uppercase letters

If you have difficulty seeing the onscreen keyboard, you can set it to display only uppercase letters.

Go to Settings  > Accessibility > Keyboards, then turn off Show Lowercase Keys.

Type on a larger onscreen keyboard

Rotate iPad to landscape orientation to use a larger keyboard for typing in many apps, including Mail, Safari, Messages, Notes, and Contacts.

For information about other ways to adjust the onscreen keyboard, see [Set typing options](#).

Control iPad with an external keyboard

If you have difficulty using the touchscreen, you can control your iPad using shortcuts on an [Apple external keyboard](#) (sold separately).

1. Go to Settings  > Accessibility > Keyboards, tap Full Keyboard Access, then turn on Full Keyboard Access.

2. Control your iPad using keyboard shortcuts.

Action	Shortcut
Go to the next item	Tab
Go to the previous item	Shift-Tab
Activate the selected item	Space bar
Go to the Home Screen	Command-H
Open the App Switcher	Tab-A
Open Control Center	Tab-C
Open Notification Center	Tab-N
Show Help	Tab-H

3. To customize the keyboard shortcuts, tap Commands.

4. To customize the appearance of the focus, tap any of the following:

- Auto-Hide
- Increase Size
- High Contrast
- Color

Change how the keys respond on an external keyboard

If you have difficulty using an external keyboard, you can adjust the settings.

Go to Settings  > Accessibility > Keyboards, then tap any of the following:

- *Key Repeat*: You can adjust the repeat interval and delay.
 - *Sticky Keys*: Use Sticky Keys to press and hold modifier keys, such as Command and Option, as you press another key.
 - *Slow Keys*: Use Slow Keys to adjust the time between when a key is pressed and when it's activated.
-

Adjust the settings for AirPods Max and AirPods Pro on iPad

If you have AirPods Max or AirPods Pro, you can adjust the accessibility settings to suit your motor or hearing needs.

1. Go to Settings  > Accessibility > AirPods.
 2. If you have multiple AirPods, select one.
 3. Set any of the following options:
 - *Press Speed*: Adjust how quickly you must press two or three times before an action occurs.
 - *Press and Hold Duration*: Adjust the duration required to press and hold on your AirPods.
 - *Follow iPad*: Turn on spatial audio so surround sound (available with supported media content) seems to come from your iPad, even as you turn your head or move your device.
 - *Noise Cancellation with One AirPod*: (AirPods Pro) Turn on noise cancellation even when you're using only one of your AirPods.
 4. For more options—such as Headphone Accommodations—tap Audio Accessibility Settings.
-

Change Apple Pencil (2nd generation) settings

If you have difficulty using the gestures for Apple Pencil (2nd generation) on supported iPad models, you can adjust the settings.

1. Go to Settings  > Accessibility > Apple Pencil.
 2. Do any of the following:
 - Turn off Double Tap Gesture.
 - Change the duration of the double tap gesture to Slow or Slowest.
-

Hearing

Use hearing devices with iPad

You can use Made for iPhone (MFi) hearing aids or sound processors with iPad and adjust their settings.

Pair a hearing device with iPad

If your hearing devices aren't listed in Settings  > Accessibility > Hearing Devices, you need to pair them with iPad.

1. Open the battery doors on your hearing devices.
2. On iPad, go to Settings > Bluetooth, then make sure Bluetooth is turned on.
3. Go to Settings > Accessibility > Hearing Devices.
4. Close the battery doors on your hearing devices.
5. When their names appear below MFi Hearing Devices (this could take a minute), tap the names and respond to the pairing requests.

Pairing can take as long as 60 seconds—don't try to stream audio or otherwise use the hearing devices until pairing is finished. When pairing is finished, you hear a series of beeps and a tone, and a checkmark appears next to the hearing devices in the Devices list.

You need to pair your devices only once (and your audiologist might do it for you). After that, your hearing devices automatically reconnect to iPad whenever they turn on.

Adjust the settings and view the status of your hearing devices

- *In Settings:* Go to Settings  > Accessibility > Hearing Devices > MFi Hearing Devices.
- *Using accessibility shortcuts:* See [Use accessibility shortcuts on iPad](#).
- *On the Lock Screen:* Go to Settings > Accessibility > Hearing Devices > MFi Hearing Devices, then turn on Control on Lock Screen. From the Lock Screen, you can do the following:
 - Check battery status.
 - Adjust ambient microphone volume and equalization.
 - Choose which hearing device (left, right, or both) receives streaming audio.
 - Control Live Listen.

 **Tip:** You can quickly adjust the settings or view the status of your hearing devices with the following accessibility shortcuts:

- [Triple-click the Home button](#) (on an iPad with a Home button)
 - [Triple-click the top button](#) (on other iPad models)
 - [Use Control Center](#)
-

Use your hearing devices with more than one device

If you pair your hearing devices with more than one device (both iPhone and iPad, for example), the connection for your hearing devices automatically switches from one to the other when you do something that generates audio on the other device, or when you receive a phone call on iPhone.

Changes you make to hearing device settings on one device are automatically sent to your other devices.

1. Sign in with your Apple ID on all the devices.
 2. Connect all the devices to the same Wi-Fi network.
-

Turn on Hearing Aid Compatibility

Hearing Aid Compatibility may reduce interference and improve audio quality with some hearing aid models.

1. Go to Settings  > Accessibility > Hearing Devices.
 2. Turn on Hearing Aid Compatibility.
-

Stream audio from iPad to your hearing devices

Stream audio from iPad and its apps to your hearing devices. You can even use Live Listen to stream sound from the microphone to your Made For iPhone (MFi) hearing devices or AirPods.

Stream audio to your hearing devices

You can stream audio from Siri, Apple Music, Apple Podcasts, Apple TV, and more. Tap  in Control Center, on the Lock Screen, or in the Now Playing controls for the app you're listening to, then choose your hearing device.

You can also automatically [route audio calls](#) to a hearing device.

Use iPad as a remote microphone with Live Listen

Stream sound from the microphone on iPad to your Made For iPhone (MFi) hearing devices or AirPods. This can help you hear better in some situations—for example, when having a conversation in a noisy environment.

1. If you're using AirPods, place them in your ears.

If your AirPods don't automatically connect to iPad, tap  in Control Center or on the Lock Screen, then choose your AirPods.

2. Turn Live Listen on or off with one of the following methods:

- Open Control Center, tap , tap your hearing device or AirPods, then tap Live Listen.

(If you don't see , add it to Control Center—go to Settings  > Control Center, then choose Hearing.

- [Triple-click the Home button](#) (on an iPad with a Home button) or [triple-click the top button](#) (on other iPad models), tap Hearing Devices, then tap Live Listen.

3. Position iPad near the sound source.

Recognize sounds using iPad

Your iPad can continuously listen for certain sounds—such as a crying baby, doorbell, or siren—and notify you when it recognizes these sounds.

Note: Don't rely on your iPad to recognize sounds in circumstances where you may be harmed or injured, in high-risk or emergency situations, or for navigation.

Set up Sound Recognition

1. Go to Settings  > Accessibility > Sound Recognition, then turn on Sound Recognition.

2. Tap Sounds, then turn on the sounds you want iPad to recognize.

 **Tip:** To quickly turn Sound Recognition on or off, [use Control Center](#).

Set up and use RTT on iPad

With real-time text (RTT) and Wi-Fi calling on your iPhone, you can also make and receive RTT calls in the FaceTime app  on your iPad.

Important: RTT isn't supported by all carriers or in all countries or regions. RTT functionality depends on your carrier and network environment. When making an emergency call in the U.S., iPhone sends special characters or tones to alert the operator. The operator's ability to receive or respond to these tones can vary depending on your location. Apple doesn't guarantee that the operator will be able to receive or respond to an RTT call.

Set up RTT

1. Make sure you can [make and receive Wi-Fi calls on iPad](#).

2. Go to Settings  > Accessibility > RTT.

3. Turn on Software RTT, then do any of the following.

- Tap Relay Number, then enter the phone number to use for relay calls using Software RTT/TTY.
- Turn on Send Immediately to send each character as you type. Turn off to complete messages before sending.

When RTT is turned on,  appears in the status bar at the top of the screen.

Start an RTT call

1. In FaceTime, tap  at the top of the screen.
 2. Type the name or number you want to call in the entry field at the top, then tap Audio.
 3. Tap Call, then tap RTT Call.
-

Type text during an RTT call

1. Enter your message in the text field.

If you turned on Send Immediately in Settings, your recipient sees each character as you type. Otherwise, tap  to send the message.

2. To also transmit audio, tap .
-

Note: Standard voice call rates apply for RTT calls.

Adjust audio and visual settings on iPad

You can adjust audio and visual accessibility settings to suit your hearing needs. For example, set mono audio, volume balance, LED Flash for Alerts, and headphone accommodations.

Adjust the volume balance and mono audio

1. Go to Settings  > Accessibility > Audio & Visual.
 2. Adjust any of the following:
 - *Mono Audio:* Combine the left and right channels into a mono signal played on both channels.
 - *Balance:* Drag the Left Right Stereo Balance slider.
-

Flash the LED for alerts

On an iPad with a flash, if you can't hear the sounds that announce incoming calls and other alerts, iPad can flash its LED (next to the camera lens on the back of iPad). The LED flashes only if iPad is locked.

 **Tip:** LED Flash for Alerts is a useful feature for anyone who might miss the tones associated with calls and other alerts in a noisy environment.

1. Go to Settings  > Accessibility > Audio & Visual, then turn on LED Flash for Alerts.
 2. To prevent LED flashes when iPad is in silent mode, turn off Flash on Silent.
-

Set headphone accommodations

With supported Apple and Beats headphones, you can amplify soft sounds and adjust certain frequencies for your hearing. These adjustments help music, movies, phone calls, and podcasts sound more crisp and clear.

1. Go to Settings  > Accessibility > Audio & Visual > Headphone Accommodations, then turn on Headphone Accommodations.
 2. Tap Custom Audio Setup, then follow the onscreen instructions. Or manually set any of the following:
 - *Tune Audio For:* Choose Balanced Tone, Vocal Range, or Brightness.
 - *Level:* Choose Slight, Moderate, or Strong amplification of soft sounds.
 - *Phone:* Apply these audio settings to phone calls.
 - *Media:* Apply these audio settings to media playback.
 - *Transparency Mode:* Turn on Custom Transparency Mode and adjust the amplification, balance, and tone to help you hear what's happening around you (available when you have AirPods Pro connected to iPad).
 3. To preview your audio settings, tap Play Sample.
-

Play background sounds on iPad to mask environmental noise

You can play calming sounds—such as ocean or rain—to mask unwanted environmental noise and help minimize distractions so you can focus or rest.

1. Go to Settings  > Accessibility > Audio/Visual > Background Sounds, then turn on Background Sounds.

2. Set any of the following:

- *Sound*: Choose a sound; the audio file downloads to your iPad.
 - *Volume*: Drag the slider.
 - *Use When Media is Playing*: Adjust the volume of the background sound when iPad is playing music or other media.
-

Display subtitles and captions for videos and HomePod announcements on iPad

When you play video content in a supported app, you can turn on subtitles and closed captions (if available). iPad usually shows standard subtitles and captions, but you can also choose special accessible captions—such as subtitles for the deaf and hard of hearing (SDH)—if available.

iPad can also display transcriptions of announcements made through HomePod.

Turn on subtitles and captions in the Apple TV app

1. While playing video content, tap .
 2. Choose from the list of available subtitles and captions.
-

Customize the subtitles and captions in supported video apps

1. Go to Settings  > Accessibility > Subtitles & Captioning.
 2. If you prefer closed captioning or subtitles for the deaf and hard of hearing when available, turn on Closed Captions + SDH.
 3. Tap Style, then choose an existing caption style or create a new style based on the following:
 - Font, size, and color
 - Background color and opacity
 - Text opacity, edge style, and highlight
-

Show transcriptions for announcements on HomePod

Go to Settings  > Accessibility > Subtitles & Captioning, then turn on Show Audio Transcriptions.

General

Use Guided Access on iPad

Guided Access helps you stay focused on a task by temporarily restricting iPad to a single app, and allowing you to control which app features are available. You can do any of the following:

- Disable areas of the screen that aren't relevant to a task, or areas where an accidental gesture might cause a distraction
 - Disable the iPad hardware buttons
 - Limit how long someone can use the app
-

Set up Guided Access

1. Go to Settings  > Accessibility > Guided Access, then turn on Guided Access.

2. Adjust any of the following:

- *Passcode Settings*: Tap Set Guided Access Passcode, then enter a passcode.

You can also turn on Face ID or Touch ID as a way to end a Guided Access session.

- *Time Limits*: Play a sound or speak the time remaining before a Guided Access session ends.
 - *Accessibility Shortcut*: Turn the shortcut on or off during Guided Access sessions.
 - *Display Auto-Lock*: Set how long it takes iPad to automatically lock during a Guided Access session.
-

Start a Guided Access session

1. Open the app you want to use.

2. Turn on Guided Access using one of the following methods:

- Ask Siri. Say something like: "Turn on Guided Access." [Learn how to ask Siri.](#)
- [Use accessibility shortcuts.](#)

3. Circle any areas of the screen you want to disable. Drag the mask into position or use the handles to adjust its size.

4. Tap Options, then turn on or off any of the following:

- Top Button (or Sleep/Wake Button)
- Volume Buttons
- Motion (to prevent iPad from switching from portrait to landscape or from responding to other motions)
- Keyboards
- Touch
- Time Limit

5. Tap Start.

End a Guided Access session

Do any of the following:

- *On an iPad with a Home button:* Double-click the Home button, then unlock with Touch ID (if enabled). Or triple-click the Home button, then enter the Guided Access passcode.
 - *On iPad Air (4th generation):* Double-click the top button, then unlock with Touch ID (if enabled). Or triple-click the top button, then enter the Guided Access passcode.
 - *On an iPad with Face ID:* Double-click the top button, then unlock with Face ID (if enabled). Or triple-click the top button, then enter the Guided Access passcode.
-

Use accessibility features with Siri on iPad

Siri is often the easiest way to start using accessibility features with iPad. With Siri, you can open apps, turn many settings on or off, or use Siri for what it does best—acting as your intelligent personal assistant.

 **Ask Siri.** Say something like: “Turn on VoiceOver” or “Turn off VoiceOver.” [Learn how to ask Siri.](#)

Siri knows when VoiceOver is on, so will often read more information back to you than appears on the screen. You can also use VoiceOver to read what Siri shows on the screen.

Type instead of speaking to Siri

1. Go to Settings  > Accessibility > Siri, then turn on Type to Siri.
 2. To make a request, summon Siri, then interact with Siri by using the keyboard and text field.
-

Control voice feedback for Siri

1. Go to Settings  > Accessibility > Siri.
 2. Choose Don't Speak in Silent Mode, Only Speak with Hey Siri, or Always Speak Responses.
-

Turn on "Hey Siri" when iPad is covered or facing down

To allow iPad to listen for "Hey Siri" when it's covered or facing down, go to Settings  > Accessibility > Siri, then turn on Always Listen for "Hey Siri."

Hide apps when Siri is active

To hide the current app when you summon Siri, go to Settings  > Accessibility > Siri, then turn off Show Apps Behind Siri.

Use accessibility shortcuts on iPad

After you set up accessibility features, you can quickly turn them on or off with any of the methods below.

Ask Siri to turn on an accessibility feature

Say something like: "Turn on VoiceOver." [Learn how to ask Siri.](#)

Triple-click the Home button

On an iPad with a Home button, you can turn accessibility features on or off by triple-clicking the Home button.

- *Set up Accessibility Shortcut:* Go to Settings  > Accessibility > Accessibility Shortcut, then select the features you use the most.
 - *Slow down the double-click or triple-click speed for the Home button:* Go to Settings > Accessibility > Home Button.
 - *Use Accessibility Shortcut:* Triple-click the Home button.
-

Triple-click the top button

On iPad Air (4th generation), iPad Pro 12.9-inch (3rd generation and later), or iPad Pro 11-inch, you can turn accessibility features on or off by triple-clicking the top button.

- *Set up Accessibility Shortcut:* Go to Settings  > Accessibility > Accessibility Shortcut, then select the features you use the most.
 - *Slow down the double-click or triple-click speed for the top button:* Go to Settings > Accessibility > Top Button.
 - *Use Accessibility Shortcut:* Triple-click the top button.
-

Use Control Center

You can also add accessibility features to Control Center and then activate them from there.

1. Go to Settings  > Control Center, then tap  next to the accessibility features you use the most.
 2. To activate the accessibility feature, open Control Center, then tap the control.
-

Customize accessibility settings for specific apps on iPad

You can choose different display and motion settings for certain apps, the Home Screen, and Settings.

Change the settings for an app

1. Go to Settings  > Accessibility > Per-App Settings.
 2. Tap Add App, then choose an app, Home Screen, or Settings.
 3. Tap the app or Home Screen, then adjust the settings.
-

Adjust the text size when you're using an app

1. Open Control Center, then tap [the Text Size button].

(If you don't see [the Text Size button], add it to Control Center—go to Settings  > Control Center, then choose Text Size).

2. Drag the slider up or down to increase or decrease the text size.

To change the text size for all apps, tap All Apps at the bottom of the screen.

Security and privacy

Use the built-in security and privacy protections of iPad

iPad is designed to protect your data and your privacy. Built-in security features help prevent anyone but you from accessing the data on your iPad and in iCloud. Built-in privacy features minimize how much of your information is available to anyone but you, and you can adjust what information is shared and where you share it.

To take maximum advantage of the security and privacy features built into iPad, follow these practices:

Set a strong passcode

Setting a passcode to unlock iPad is the most important thing you can do to safeguard your device. See [Set a passcode on iPad](#).

Use Face ID or Touch ID

Face ID (supported models) or Touch ID (supported models) provides a secure and convenient way to unlock your iPad, authorize purchases and payments, and sign in to many third-party apps. See [Set up Face ID on iPad](#) or [Set up Touch ID on iPad](#).

Turn on Find My iPad

Find My helps you find your iPad if it's lost or stolen and prevents anyone else from activating or using your iPad if it's missing. See [Add your iPad to Find My](#).

Keep your Apple ID secure

Your Apple ID provides access to your data in iCloud and your account information for services like the App Store and Apple Music. To learn how to protect the security of your Apple ID, see [Keep your Apple ID secure on iPad](#).

Use Sign in with Apple when it's available

To help you set up accounts, many apps and websites offer Sign in with Apple. Sign in with Apple limits the information shared about you, it conveniently uses the Apple ID you already have, and it provides the security of two-factor authentication. See [Sign in with Apple on iPad](#).

Let iPad create a strong password if Sign in with Apple isn't available

For a strong password that you don't have to remember, let iPad create it when you sign up for a service on a website or in an app. See [Automatically fill in strong passwords on iPad](#).

Control the app data and location information you share

You can review and adjust [the data you share with apps](#), [the location information you share](#), and [how Apple delivers advertising to you in the App Store, Apple News, and Stocks](#).

Review the privacy practices of apps

Review the privacy practices of apps before you download them. Every app's product page in the App Store shows a developer-reported summary of the app's privacy practices, including what data is collected. See [Get apps in the App Store on iPad](#). For the apps that you download, review the App Privacy Report, which shows you how apps are using the permissions you've granted them, which third-party domains they contact, and how recently they made contact. See [Review how apps are using the permissions you grant them](#).

Protect your Mail activity

Turn on Mail Privacy Protection to make it harder for senders to follow your Mail activity. See [Use Mail Privacy Protection on iPad](#). When you subscribe to iCloud+, you can generate unique, random email addresses that forward to your personal email account, so you don't have to share your personal email address when filling out forms on the web or signing up for newsletters. See [Hide your personal email address in Safari on iPad](#).

Better understand the privacy of your browsing activities in Safari and help protect yourself against malicious websites

Safari helps prevent trackers from following you across websites. You can review the Privacy Report to see a summary of trackers that have been encountered and prevented by Intelligent Tracking Prevention on the current webpage you're visiting. You can also review and adjust Safari settings to keep your browsing activities private from others who use the same device, and help protect yourself from malicious websites. See [Browse privately in Safari on iPad](#).

Control app tracking

All apps must receive your permission before tracking you across apps and websites owned by other companies to target advertising to you or share your information with a data broker. After you grant or deny permission to an app, you can [change permission](#) later, and you can stop all apps from requesting permission.

Use the internet more securely with iCloud Private Relay

When you subscribe to iCloud+, iCloud Private Relay helps you use the internet in an even more secure and private way by encrypting the traffic from your iPad and by sending it through two separate internet relays. No one can use your IP address, location, and browsing activity to create a detailed profile about you. See [Turn on iCloud Private Relay on iPad](#).

To get personalized support for these practices, go to the [Apple Support website](#) (not available in all countries or regions).

To learn more about how Apple protects your information, go to the [Privacy website](#).

Protect your iPad

Set a passcode on iPad

For better security, set a passcode that needs to be entered to unlock iPad when you turn it on or wake it. Setting a passcode also turns on data protection, which encrypts your iPad data with 256-bit AES encryption. (Some apps may opt out of using data protection.)

Set or change the passcode

1. Go to Settings , then depending on your model, tap one of the following:
 - Face ID & Passcode
 - Touch ID & Passcode
 - Passcode
2. Tap Turn Passcode On or Change Passcode.

To view options for creating a password, tap Passcode Options. The most secure options are Custom Alphanumeric Code and Custom Numeric Code.

To view options for creating a password, tap Passcode Options. The most secure options are Custom Alphanumeric Code and Custom Numeric Code.

After you set a passcode, on supported models you can use [Face ID](#) or [Touch ID](#) to unlock iPad. For additional security, however, you must always enter your passcode to unlock your iPad under the following conditions:

- You turn on or restart your iPad.
 - You haven't unlocked your iPad for more than 48 hours.
 - You haven't unlocked your iPad with the passcode in the last 6.5 days, and you haven't unlocked it with Face ID or Touch ID in the last 4 hours.
 - Your iPad receives a remote lock command.
 - There are five unsuccessful attempts to unlock your iPad with Face ID or Touch ID.
-

Change when iPad automatically locks

Go to Settings  > Display & Brightness > Auto-Lock, then set a length of time.

Erase data after 10 failed passcodes

Set iPad to erase all information, media, and personal settings after 10 consecutive failed passcode attempts.

1. Go to Settings , then depending on your model, tap one of the following:
 - Face ID & Passcode
 - Touch ID & Passcode
 - Passcode
2. Turn on Erase Data.

After all data is erased, you must [restore iPad from a backup](#) or [set it up again as new](#).

Turn off the passcode

1. Go to Settings , then depending on your model, tap one of the following:
 - Face ID & Passcode
 - Touch ID & Passcode
 - Passcode
2. Tap Turn Passcode Off.

Reset the passcode

If you enter the wrong passcode six times in a row, you'll be locked out of your device, and you'll receive a message that says iPad is disabled. If you can't remember your passcode, you can erase your iPad with a computer or with recovery mode, then set a new passcode. (If you made an iCloud or computer backup before you forgot your passcode, you can restore your data and settings from the backup.)

See the Apple Support article [If you forgot the passcode on your iPad, or your iPad is disabled](#).

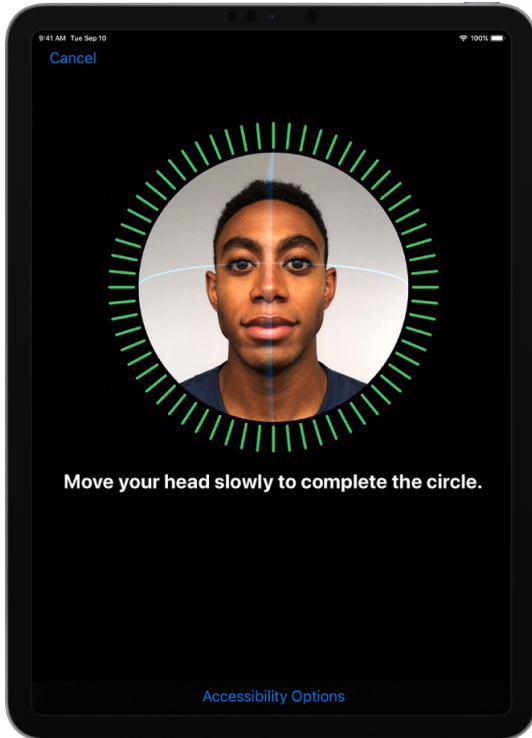

Set up Face ID on iPad

Use Face ID (supported models) to securely and conveniently unlock iPad, authorize purchases and payments, and sign in to many third-party apps by simply glancing at your iPad.

To use Face ID, you must also [set a passcode](#) on your iPad.

Set up Face ID or add an alternate appearance

- If you didn't set up Face ID when you first set up your iPad, go to Settings  > Face ID & Passcode > Set up Face ID, then follow the onscreen instructions.
- To set up an additional appearance for Face ID to recognize, go to Settings > Face ID & Passcode > Set Up an Alternate Appearance, then follow the onscreen instructions.

If you have physical limitations, you can tap Accessibility Options during Face ID set up. When you do this, setting up facial recognition doesn't require the full range of head motion. Using Face ID is still secure, but it requires more consistency in how you look at iPad.

Face ID also has an accessibility feature you can use if you're blind or have low vision. If you don't want Face ID to require that you look at iPad with your eyes open, go to Settings > Accessibility > Face ID & Attention, then turn off Require Attention for Face ID. This feature is automatically turned off if you turn on VoiceOver when you first set up iPad. See [Change Face ID and attention settings on iPad](#).

Temporarily disable Face ID

You can temporarily prevent Face ID from unlocking your iPad.

1. Press and hold the top button and either volume button for 2 seconds.
2. After the sliders appear, press the top button to immediately lock iPad.

iPad locks automatically if you don't touch the screen for a minute or so.

The next time you unlock iPad with your passcode, Face ID is enabled again.

Turn off Face ID

1. Go to Settings  > Face ID & Passcode.
2. Do one of the following:
 - *Turn off Face ID for specific items only:* Turn off one or more options: iPad Unlock, Apple Pay, iTunes & App Store, or Safari AutoFill.
 - *Turn off Face ID:* Tap Reset Face ID.

If your device is lost or stolen, you can prevent Face ID from being used to unlock your device with Find My iPhone Lost Mode. (See [Add your iPad to Find My.](#))

For more information about Face ID, see [About Face ID advanced technology](#).

Set up Touch ID on iPad

Use Touch ID (supported models) to securely and conveniently unlock iPad, authorize purchases and payments, and sign in to many third-party apps by pressing the top button (iPad Air (4th generation)) or the Home button (other models) with your finger or thumb.

To use Touch ID, you must [set a passcode](#) on your iPad.

Turn on fingerprint recognition

1. If you didn't turn on fingerprint recognition when you first set up your iPad, go to Settings  > Touch ID & Passcode.
2. Turn on any of the options, then follow the onscreen instructions.

If you turn on iTunes & App Store, you're asked for your Apple ID password when you make your first purchase from the App Store, Apple Books, or the iTunes Store. When you make your next purchases, you're asked to use Touch ID.

Note: If you can't add a fingerprint or unlock your iPad using Touch ID, see the Apple Support article [If Touch ID isn't working](#).

Add a fingerprint

You can add multiple fingerprints (both of your thumbs and forefingers, for example).

1. Go to Settings  > Touch ID & Passcode.
2. Tap Add a Fingerprint.

3. Follow the onscreen instructions.
-

Name or delete a fingerprint

1. Go to Settings  > Touch ID & Passcode.

If you added more than one fingerprint, place a finger on the top button (iPad Air (4th generation)) or Home button (other models) to identify its print.

2. Tap the fingerprint, then enter a name (such as "Thumb") or tap Delete Fingerprint.
-

Unlock iPad by touching instead of pressing with your finger or thumb

Go to Settings  > Accessibility, tap Top Button (iPad Air (4th generation)) or Home Button (other models), then turn on Rest Finger to Open.

Turn off Touch ID

Go to Settings  > Touch ID & Passcode, then turn off one or more of the options.

Control access to information on the iPad Lock Screen

You can easily access a few commonly used features (such as widgets, media playback controls, and Control Center) from the Lock Screen. (For security, USB connections aren't allowed when iPad is locked.) You can control access to these items when iPad is locked.

If you turn off Lock Screen access to a feature, you prevent someone who has your iPad from viewing any personal information that it might contain (such as an upcoming event in the Calendar widget). However, you also lose quick access to the information yourself.

1. Go to Settings , then depending on your model, tap one of the following:
 - Face ID & Passcode
 - Touch ID & Passcode
 - Passcode

2. Select your options.

You can turn access on or off to the following features while iPad is locked:

- Widgets (see [Add widgets on iPad](#))
- Recent notifications (see [View and respond to notifications on iPad](#))
- Control Center (see [Use and customize Control Center on iPad](#))
- Siri (see [Ask Siri on iPad](#))
- Home Control (see [Intro to Home on iPad](#))
- Returning Missed Calls (see [Make and receive FaceTime calls on iPad](#))
- Connecting to a Mac, a Windows PC, or an accessory with USB (such as when you connect iPad to your computer using USB)

Important: If you change the default setting and allow USB connections when iPad is locked, you disable an important security feature of your iPad.

Protect your accounts

Keep your Apple ID secure on iPad

Your Apple ID is the account you use to access Apple services like the App Store, Apple Music, iCloud, iMessage, FaceTime, and more. Your account includes the email address and password you use to sign in as well as the contact, payment, and security details you use across Apple services. Apple employs industry-standard practices to safeguard your Apple ID.

Best practices for maximizing the security of your Apple ID

- Don't share your Apple ID with other people, even family members. (You can name one or more people you trust as Account Recovery Contacts to help you regain access to your account if you ever get locked out.)

To share purchases, subscriptions, a family calendar, and more without sharing Apple IDs, [set up Family Sharing](#).

- Never provide your password, security questions, verification codes, recovery key, or any other account security details to anyone else. Apple will never ask you for this information.
- When accessing your Apple ID account page in Safari or another web browser, look for the lock icon  in the address field to verify that your session is encrypted and secure.

- When using a public computer, always sign out when your session is complete to prevent other people from accessing your account.
 - Avoid phishing scams. Don't click links in suspicious email or text messages and never provide personal information on any website you aren't certain is legitimate. See the Apple Support article [Recognize and avoid phishing messages, phony support calls, and other scams](#).
 - Don't use your password with other online accounts.
 - Let two-factor authentication protect your account. If you create a new Apple ID on a device with iOS 13.4, iPadOS 13.4, macOS 10.15.4, or later, your account automatically uses two-factor authentication. If you previously created an Apple ID account without two-factor authentication, turn on two-factor authentication. See [Manage two-factor authentication for your Apple ID from iPad](#).
-

Add Account Recovery Contacts

Choose one or more people you trust as Account Recovery Contacts to help you reset your Apple ID password and regain access to your account if you ever forget your password or get locked out.

Go to Settings  > *[your name]* > Password & Security > Account Recovery, tap Add Recovery Contact, then follow the onscreen instructions.

For more information, go to Settings  > *[your name]* > Password & Security, then tap "Learn more" below Add Recovery Contact.

Note: Another option for resetting your password if you forget it is a recovery key. A recovery key lets you reset your password either by using another device already signed in with your Apple ID or by entering your recovery key. See the Apple Support article [How to generate a recovery key](#).

Add Legacy Contacts

The Digital Legacy program allows you to designate people as Legacy Contacts so they can access your account and personal information in the event of your death.

Go to Settings  > *[your name]* > Password & Security > Legacy Contact, tap Add Legacy Contact, then follow the onscreen instructions.

For more information, go to Settings  > *[your name]* > Password & Security, then tap "Learn more" below Legacy Contact.

For more information about best practices, see the Apple Support article [Security and your Apple ID](#).

To set up or manage your Apple ID, go to the [Apple ID website](#).

If you forgot your Apple ID or password, see the [Recover your Apple ID website](#).

Sign in with Apple on iPad

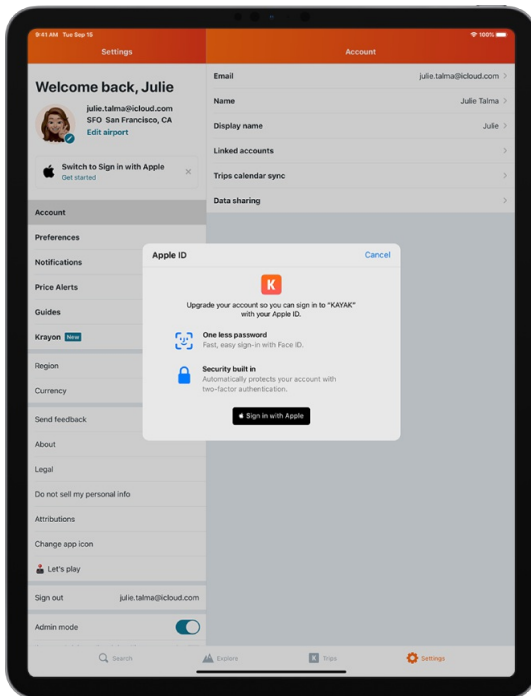

With Sign in with Apple, you can sign in to participating apps and websites with your Apple ID. You don't need to create and remember new passwords, and your account is protected with two-factor authentication.

Sign in with Apple is designed to respect your privacy. Apps and websites can ask only for your name and email address to set up your account, and Apple won't track you as you use them.

Set up or upgrade an account to Sign in with Apple

When a participating app or website asks you to set up or upgrade an account, do the following:

1. Tap Sign in with Apple.
2. Follow the onscreen instructions.

Some apps (and websites) don't request your name and email address. In this case, you simply authenticate with Face ID or Touch ID (depending on your model), then start using the app.

Others may ask for your name and email address to set up a personalized account. When an app asks for this information, Sign in with Apple displays your name and the personal email address from your Apple ID account for you to review.

To edit your name, tap it, then use the keyboard to make changes.

To specify an email address, do one of the following:

- *Use your personal email address:* Tap Share My Email.

If you have multiple email addresses associated with your Apple ID, choose the address you want.

- *Hide your email address:* Tap Hide My Email.

This option allows you to receive email from the app without sharing your personal email address. When you choose this option, Apple creates a unique, random email address for you, and any email sent from the app to this address is forwarded to your personal address.

After you review your information and choose an email option, tap Continue, authenticate with Face ID or Touch ID (depending on your model), then start using the app.

Sign in to access your account

After you set up an account with an app or website using Sign in with Apple, you typically don't need to sign in to it again on your iPad. But if you're asked to sign in (for example, after you sign out of an account), do the following:

1. Tap Sign in with Apple.
 2. Review the Apple ID that appears, then tap Continue.
 3. Authenticate with Face ID or Touch ID (depending on your model).
-

Change the address used to forward email

If you chose to hide your email address when you created an account and you have more than one address associated with your Apple ID, you can change the address that receives your forwarded email.

1. Go to Settings > [your name] > Name, Phone Numbers, Email > Forward To.
 2. Choose a different email address, then tap Done.
-

Change Sign in with Apple settings for an app or website

1. Go to Settings > [your name] > Password and Security.
2. Tap Apps Using Your Apple ID.
3. Choose an app, then do either of the following:
 - *Turn off forwarding email:* Turn off Forward To. You won't receive any further emails from the app.
 - *Stop using Sign in with Apple:* Tap Stop Using Apple ID. You may be asked to create a new account the next time you try to sign in with the app.

Sign in with Apple also works on your other devices—iPhone, Apple Watch, Mac, Apple TV, and iPod touch—where you’re signed in with the same Apple ID.

To sign in from an Android app, a Windows app, or any web browser, tap Sign in with Apple, then enter your Apple ID and password.

Sign in with Apple requires two-factor authentication for your Apple ID. This protects your Apple ID, your app accounts, and your app content. For information about how two-factor authentication works, see the Apple Support article [Two-factor authentication for Apple ID](#).

For more information, see the Apple Support article [What is Sign in with Apple?](#).

Automatically fill in strong passwords on iPad

When you sign up for services on websites and in apps, you can let iPad create strong passwords for many of your accounts.

iPad stores the passwords in iCloud Keychain and fills them in for you automatically, so you don’t have to memorize them.

Note: Instead of creating an account and password, [use Sign in with Apple](#) when a participating app or website invites you to set up an account. Sign in with Apple uses the Apple ID you already have, and it limits the information shared about you.

Create a strong password for a new account

1. On the new account screen for the website or app, enter a new account name.

For supported websites and apps, iPad suggests a unique, complex password.

2. Do one of the following:

- *Choose the suggested password:* Tap Use Strong Password.
- *Make up your own password:* Tap Choose My Own Password.

3. To later allow iPad to automatically fill in the password for you, tap Yes when you’re asked if you want to save the password.

Note: For iPad to create and store passwords, iCloud Keychain must be turned on. Go to Settings  > [your name] > iCloud > Keychain.

Automatically fill in a saved password

1. On the sign-in screen for the website or app, tap the account name field.

2. Do one of the following:

- Tap the account suggested at the bottom of the screen or near the top of the keyboard.
- Tap , tap Other Passwords, then tap an account.

The password is filled in. To see the password, tap .

To enter an account or password that isn't saved, tap  on the sign-in screen.

View your saved passwords

 **Ask Siri.** Say something like: "Show me my passwords." [Learn how to ask Siri.](#)

To view the password for an account, tap it.

You can also view your passwords without asking Siri. Do one of the following, then tap an account to view its password:

- Go to Settings  > Passwords.
 - On a sign-in screen, tap .
-

Prevent iPad from automatically filling in passwords

Go to Settings  > Passwords > AutoFill Passwords, then turn off AutoFill Passwords.

Change a weak password on iPad

If you create your own passwords and any are weak (for example, they're easily guessed or used multiple times), iPad identifies them for you automatically.

1. Go to Settings  > Passwords > Security Recommendations.

If an account has a weak password, a message explains the problem.

2. Tap the account.

3. Tap Change Password, then change your password on the website or in the app.

If the website or app allows you to [upgrade to Sign in with Apple](#), you can take advantage of the security and convenience of that feature. If you aren't given the upgrade option when you change your password, for many accounts you can let iPad [automatically create a strong password](#) that you don't have to remember.

Note: The Delete Password button allows you to remove the password from your iCloud Keychain only. It doesn't remove the weak password from your website or app account.

iPad also securely monitors your passwords and alerts you if they appear in known data leaks. If you don't want iPad to perform this monitoring, go to Settings > Passwords > Security Recommendations, then turn off Detect Compromised Passwords.

If iPad warns you of a weak password for a website or app that is no longer available, you can remove the account from your iCloud Keychain. To remove an account, go to Settings > Passwords, then swipe left on the account.

Share passwords securely with AirDrop on iPad

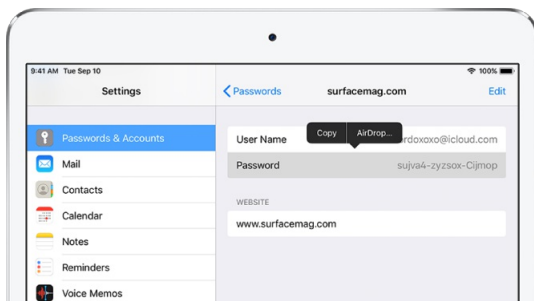

Use AirDrop to securely share passwords with someone using an iPhone, iPad, iPod touch, or Mac.

[iCloud Keychain must be set up](#) on your iPad.

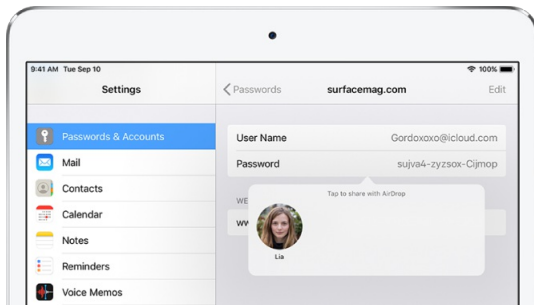

Send a password

To use AirDrop to share a password, the person you're sharing with must be in your Contacts. To share with someone on iPad, iPhone, or iPod touch, ask them to open Control Center and [allow AirDrop to receive items](#). To share with someone on a Mac, ask them to allow themselves to be discovered in AirDrop in the Finder.

1. On your iPad, go to Settings  > Passwords.
2. Tap the account you want to share.
3. Tap Password, then tap AirDrop.

4. Tap the contact you want to send the password to.

Receive a password

To receive a password, you must be in the sender's contacts.

1. If you haven't already done so, [allow AirDrop to receive items](#).
2. When you receive a request to accept a password from someone else, tap Accept.

The password is saved on your iPad, where you can [view it](#) and let iPad [automatically fill it in](#) on the sign-in screen for the account.

Make your passwords available on all your devices with iPad and iCloud Keychain

Use iCloud Keychain to keep your website and app passwords, credit card information, Wi-Fi network information, and other account information up to date across all of your approved devices and Mac computers. (iOS 7, iPadOS 13, OS X 10.9, or later required.) iCloud Keychain is secured with 256-bit AES encryption during storage and transmission, and its data cannot be read by Apple.

iCloud Keychain can also keep the accounts you use in Mail, Contacts, Calendar, and Messages up to date across all of your iPhone, iPad, and iPod touch devices and Mac computers.

Set up iCloud Keychain

If you didn't turn on iCloud Keychain when you first set up your iPad, go to Settings  > [your name] > iCloud > Keychain, turn on iCloud Keychain, then follow the onscreen instructions.

When you set up iCloud Keychain, you create an iCloud Security Code, which you can use to authorize additional devices that use your iCloud Keychain. It's also used for verification so that you can perform other iCloud Keychain actions, such as recovering your iCloud Keychain if you lose all your devices.

Set up iCloud Keychain on an additional device

When you turn on iCloud Keychain on an additional device, your other devices using iCloud Keychain receive a notification requesting your approval of the additional device.

On one of your other devices, approve the additional device. Your iCloud Keychain automatically begins updating on the additional device.

To approve iCloud Keychain when you don't have access to your other devices, follow the onscreen instructions to use your iCloud Security Code.

Reset or create an iCloud Security Code

If you enter the wrong iCloud Security Code too many times when using iCloud Keychain, your iCloud Keychain is disabled on that device, and your keychain in iCloud is deleted.

To reset or create a new iCloud Security Code, see the Apple Support article [If you enter your iCloud Security Code incorrectly too many times](#).

To learn more about iCloud Keychain, see the Apple Support article [Set up iCloud Keychain](#).

Manage Hide My Email addresses in Settings on iPad

When you [subscribe to iCloud+](#), you can use Hide My Email to keep your personal email address private. With Hide My Email, you can generate unique, random email addresses that forward to your personal email account, so you don't have to share your real email address when filling out forms on the web or signing up for newsletters.

You can generate Hide My Email addresses in Safari wherever email addresses are required. See [Hide your personal email address in Safari on iPad](#).

You can also create and administer Hide My Email addresses in Settings . Go to Settings > [your name] > iCloud > Hide My Email, then do any of the following:

- *Create a Hide My Email address:* Tap Create New Address, then follow the onscreen instructions.
- *Delete a Hide My Email address:* Tap an address (below Create New Address), then tap Deactivate Email Address. After you deactivate the address, it no longer forwards emails to you.
- *Change which personal email address to forward to:* Tap Forward To, then choose an email address. Options consist of addresses that are reachable with your AppleID.
- *Copy a forwarding address to use elsewhere:* Tap an address (below Create New Address), touch and hold the Hide My Email section, then tap Copy. To immediately supply that address elsewhere, touch and hold in a text field, then press Paste.

Manage two-factor authentication for your Apple ID from iPad

Two-factor authentication helps prevent others from accessing your Apple ID account, even if they know your Apple ID password. Two-factor authentication is built into iOS 9, iPadOS 13, OS X 10.11, or later.

Certain features in iOS, iPadOS, and macOS require the security of two-factor authentication, which is designed to protect your information. If you create a new Apple ID on a device with iOS 13.4, iPadOS 13.4, macOS 10.15.4, or later, your account automatically uses two-factor authentication. If you previously created an Apple ID account without two-factor authentication, you can turn on its extra layer of security at any time.

Note: Certain account types may be ineligible for two-factor authentication at the discretion of Apple. Two-factor authentication isn't available in all countries or regions. See the Apple Support article [Availability of two-factor authentication for Apple ID](#).

For information about how two-factor authentication works, see the Apple Support article [Two-factor authentication for Apple ID](#).

Turn on two-factor authentication

1. If your Apple ID account isn't already using two-factor authentication, go to Settings  > [your name] > Password & Security.
2. Tap Turn On Two-Factor Authentication, then tap Continue.
3. Enter a *trusted phone number* (a phone number where you want to receive verification codes for two-factor authentication).

You can choose to receive the codes by text message or automated phone call.

4. Tap Next.
5. Enter the verification code sent to your trusted phone number.

To send or resend a verification code, tap "Didn't get a verification code?"

You won't be asked for a verification code again on your iPad unless you sign out completely, erase your iPad, sign in to your [Apple ID account](#) page in a web browser, or need to change your Apple ID password for security reasons.

After you turn on two-factor authentication, you have a two-week period during which you can turn it off. After that period, you can't turn off two-factor authentication. To turn it off, open your confirmation email and click the link to return to your previous security settings. Keep in mind that turning off two-factor authentication makes your account less secure and means you can't use features that require a higher level of security.

Note: If you use two-step verification and upgrade to iPadOS 13 or later, your account might be migrated to use two-factor authentication. See the Apple Support article [Two-step verification for Apple ID](#).

Add another device as a trusted device

A trusted device is one that can be used to verify your identity by displaying a verification code from Apple when you sign in on a different device or browser. A trusted device must meet these minimum system requirements: iOS 9, iPadOS 13, or OS X 10.11.

1. After you turn on two-factor authentication on one device, sign in with the same Apple ID on another device.
2. When you're asked to enter a six-digit verification code, do one of the following:
 - *Obtain the verification code on your iPad or another trusted device that's connected to the internet:* Look for a notification on that device, then tap or click Allow to make the code appear on that device. (A trusted device is an iPhone, iPad, iPod touch, or Mac on which you've already turned on two-factor authentication and on which you're signed in with your Apple ID.)
 - *Obtain the verification at a trusted phone number:* If a trusted device isn't available, tap "Didn't get a verification code?" then choose a phone number.
 - *Obtain the verification code on a trusted device that's offline:* On a trusted iPhone, iPad, or iPod touch, go to Settings > [your name] > Password & Security, then tap Get Verification Code. On a trusted Mac with macOS 10.15 or later, choose Apple menu  > System Preferences > Apple ID > Password & Security, then click Get Verification Code. On a trusted Mac with macOS 10.14 and earlier, choose Apple menu > System Preferences > iCloud > Account Details > Security, then click Get Verification Code.
3. Enter the verification code on the new device.

You won't be asked for a verification code again unless you sign out completely, erase your device, sign in to your Apple ID account page in a web browser, or need to change your Apple ID password for security reasons.

Add or remove a trusted phone number

When you enrolled in two-factor authentication, you had to verify one trusted phone number. You should also consider adding other phone numbers you can access, such as a home phone, or a number used by a family member or close friend.

1. Go to Settings  > [your name] > Password & Security.
2. Tap Edit (above the list of trusted phone numbers), then do one of the following:
 - *Add a number:* Tap Add a Trusted Phone Number.
 - *Remove a number:* Tap  next to the phone number.

Trusted phone numbers don't automatically receive verification codes. If you can't access any trusted devices when setting up a new device for two-factor authentication, tap "Didn't get a verification code?" on the new device, then choose one of your trusted phone numbers to receive the verification code.

View or remove trusted devices

1. Go to Settings  > [your name].

A list of the devices associated with your Apple ID appears near the bottom of the screen.

2. To see if a listed device is trusted, tap it, then look for "This device is trusted and can receive Apple ID verification codes."
3. To remove a device, tap it, then tap Remove from Account.

Removing a trusted device ensures that it can no longer display verification codes and that access to iCloud (and other Apple services on the device) is blocked until you sign in again with two-factor authentication.

Generate a password for an app that signs in to your Apple ID account

With two-factor authentication, you need an app-specific password to sign in to your Apple ID account from a third-party app or service—such as an email, contacts, or calendar app. After you generate the app-specific password, use it to sign in to your Apple ID account from the app and access the information you store in iCloud.

1. Sign in to your [Apple ID account](#).
2. Tap Generate Password (below App-Specific Passwords).
3. Follow the onscreen instructions.

After you generate your app-specific password, enter or paste it into the password field of the app as you would normally.

For more information, see the Apple Support article [Using app-specific passwords](#).

Privacy protections on iPad

Control access to information in apps on iPad

You control whether third-party apps have access to information in Contacts, Photos, Calendar, and other apps.

Review or change access to information in apps

The first time an app wants to use information from another app, you receive a request with an explanation. For example, a messaging app may request access to your contacts to find friends who are using the same app. After you grant or deny access, you can change access later.

1. Go to Settings  > Privacy.
2. Tap a category of information, such as Calendars, Reminders, or Motion & Fitness.

The list shows the apps that requested access. You can turn access on or off for any app on the list.

Review how apps are using the permissions you grant them

The App Privacy Report shows you how apps are using the permissions you've granted them, which third-party domains they contact, and how recently they made contact.

1. Go to Settings  > Privacy > Record App Activity, then turn on Record App Activity.

Note: To understand how a third-party app uses the data it's requesting, review its terms and privacy policy. See the Apple Support article [About privacy and Location Services](#).

Control access to hardware features on iPad

Before apps use the camera or microphone on your iPad, they're required to request your permission and explain why they're asking. For example, a social networking app may ask to use your camera so that you can take and upload pictures to that app. Apps are similarly required to request your permission to use various other hardware features, including Bluetooth connectivity, motion and fitness sensors, and devices on your local network.

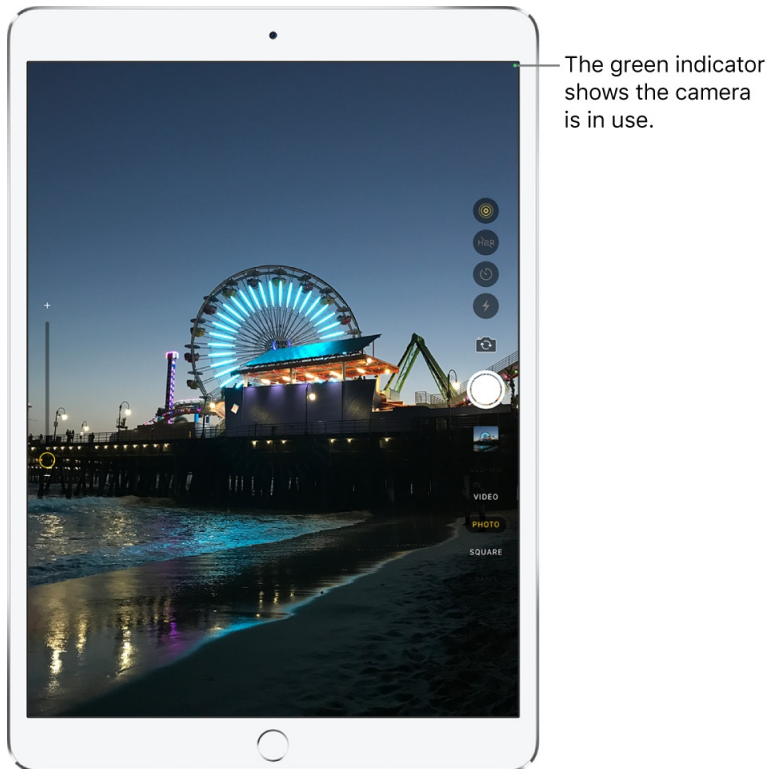

You can review which apps have requested access to these hardware features, and you can change their access at your discretion.

Review or change access to the camera, microphone, and other hardware features

1. Go to Settings  > Privacy.
2. Tap a hardware feature, such as Camera, Bluetooth, Local Network, or Microphone.

The list shows the apps that requested access. You can turn access on or off for any app on the list.

Note: An orange indicator appears at the top of the screen whenever an app uses the microphone (without the camera). Whenever an app uses the camera (including when the camera and microphone are used together), a green indicator appears. Also, a message appears at the top of Control Center to inform you when an app has recently used either.

Control app tracking permissions on iPad

All apps are required to ask your permission before tracking you or your iPad across apps or websites owned by other companies to target advertising to you or share your information with data brokers. After you grant or deny permission to an app, you can change permission later. You can also stop all apps from requesting permission.

Review or change an app's permission to track you

1. Go to Settings  > Privacy > Tracking.

The list shows the apps that requested permission to track you. You can turn permission on or off for any app on the list.

2. To stop all apps from asking permission to track you, turn off Allow Apps to Request to Track (at the top of the screen).

For more information about app tracking, tap Learn More near the top of the screen.

Control the location information you share on iPad

You control whether iPad and apps have information about your location.

To figure out where you are when getting directions, setting up meetings, and more, Location Services uses information (when available) from GPS networks (iPad models with Wi-Fi + Cellular), your Bluetooth connections, your local Wi-Fi networks, and your cellular network (iPad models with Wi-Fi + Cellular, if you have Cellular Data turned on). When an app is using Location Services,  appears in the status bar.

When you set up iPad, you're asked if you want to turn on Location Services. Afterward, you can turn Location Services on or off at any time.

The first time an app wants location data from your iPad, you receive a request with an explanation. Some apps may make a one-time only request for your location. Other apps may ask you to share your location now and in the future. Whether you grant or deny ongoing access to your location, you can change an app's access later.

Turn on Location Services

If you didn't turn on Location Services when you first set up iPad, go to Settings  > Privacy > Location Services, then turn on Location Services.

Important: If you turn off Location Services, many important iPad features stop working.

Review or change an app's ongoing access to location information

1. Go to Settings  > Privacy > Location Services.
2. To review or change access settings for an app or to see its explanation for requesting Location Services, tap the app.

To allow an app to use your specific location, leave Precise Location turned on. To share only your approximate location—which may be sufficient for an app that doesn't need your exact location—turn Precise Location off.

Note: If you set the access for an app to Ask Next Time, you're asked to turn on Location Services again the next time an app tries to use it.

To understand how a third-party app uses the information it's requesting, review its terms and privacy policy. See the Apple Support article [About privacy and Location Services](#).

Hide the map in Location Services alerts

When you allow an app to always use your location in the background, you may receive alerts about the app's use of that information. (These alerts let you change your permission, if you want to.) In the alerts, a map shows locations recently accessed by the app.

To hide the map, go to Settings  > Privacy > Location Services > Location Alerts, then turn off Show Map in Location Alerts.

With the setting off, you continue to receive location alerts, but the map isn't shown.

Review or change Location Services settings for system services

Several system services, such as location-based suggestions and location-based ads, use Location Services.

To see the status for each service, to turn Location Services on or off for each service, or to show  in the status bar when enabled system services use your location, go to Settings  > Privacy > Location Services > System Services.

Turn on iCloud Private Relay on iPad

When you [subscribe to iCloud+](#), you can turn on iCloud Private Relay to help keep your internet activity private (not available in all countries or regions).

iCloud Private Relay ensures that as you browse with the Safari app  or use any other browsers or apps that access the internet, the traffic leaving your iPad has the following characteristics:

- Your traffic is encrypted.
- Your traffic uses two separate internet relays.

No one can use your IP address, location, and browsing activity to create a detailed profile about you.

If a network or website doesn't support iCloud Private Relay, you can turn it off. When you finish your task on the network or website, turn iCloud Private Relay on again.

Turn iCloud Private Relay on or off for all networks

Go to Settings  > *[your name]* > iCloud > Private Relay.

Note: You need to turn on iCloud Private Relay on each device where you want to use it.

Turn iCloud Private Relay on or off for an individual Wi-Fi or cellular network

Do any of the following:

- *For a connected Wi-Fi network:* Go to Settings  > Wi-Fi, tap , then turn iCloud Private Relay on or off.
- *For a cellular network:* Go to Settings  > Cellular, select a plan (below Cellular Plans), then turn iCloud Private Relay on or off.

Note: The network settings are specific to your iPad.

Set the specificity of your IP address location

Go to Settings  > [your name] > iCloud > Private Relay > IP Address Location, then choose one of the following:

- Maintain General Location (for example, to see local content in Safari)
 - Use Country and Time Zone (to make your location more obscure)
-

Use a private network address on iPad

To help protect your privacy, your iPad uses a unique private network address, called a *media access control (MAC) address*, on each Wi-Fi network it joins.

If a network can't use a private address (for example, to provide parental controls or to identify your iPad as authorized to join), you can stop using a private address for that network.

Turn a private address off for a network

1. Go to Settings  > Wi-Fi, then tap  for a network.
2. Turn Private Address off.

Important: For better privacy, leave Private Address turned on for all networks that support it. Using a private address helps reduce tracking of your iPad across different Wi-Fi networks.

Control how Apple delivers advertising to you on iPad

You control how Apple delivers advertising.

Ads delivered by Apple may appear in the App Store, Apple News, and Stocks. These ads don't access data from any other apps. In the App Store and Apple News, your search and download history may be used to serve you relevant search ads. In Apple News and Stocks, ads are served based partly on what you read or follow. This includes publishers you've enabled notifications for and the type of publishing subscription you have. The articles you read are not used to serve targeted ads to you outside these apps, and information collected about what you read is linked to a random identifier rather than your Apple ID.

Review the information Apple uses to deliver ads

Go to Settings  > Privacy > Apple Advertising > View Ad Targeting Information.

The information is used by Apple to deliver more relevant ads in the App Store, Apple News, and Stocks. Your personal data isn't provided to other parties.

Turn personalized ads on or off

Go to Settings  > Privacy > Apple Advertising, then turn Personalized Ads on or off.

Note: Turning off personalized ads limits Apple's ability to deliver relevant ads to you. It may not reduce the number of ads you receive.

Learn more about privacy and Apple's advertising platform

Go to Settings  > Privacy > Apple Advertising > About Advertising & Privacy.

Restart, update, reset, and restore

Turn iPad off and on

Use buttons on your iPad or use Settings  to turn iPad off and on.

Note: If your iPad isn't working right, you can try restarting it by turning it off then on. If iPad still doesn't turn on, or if it gets stuck during start up, see the Apple Support article [If your iPhone, iPad, or iPod touch won't turn on or is frozen](#). Or if your iPad isn't working correctly after you restart it, see the [iPad Support website](#).

Turn iPad off and on (models with Face ID or Touch ID in the top button)

If your iPad doesn't have the Home button, do the following:

- *Turn off iPad:* Simultaneously press and hold the top button and either volume button, then drag the slider.
 - *Turn on iPad:* Press and hold the top button until the Apple logo appears.
-

Turn iPad off and on (models with the Home button)

- *Turn off iPad:* Press and hold the top button, then drag the slider.
 - *Turn on iPad:* Press and hold the top button until the Apple logo appears.
-

On all models, you can go to Settings  > General > Shut Down, then drag the slider.

Force restart iPad

If iPad isn't responding, and you can't [turn it off and on](#), try forcing it to restart.

Note: If iPad still doesn't turn on, or if it gets stuck during start up, see the Apple Support article [If your iPhone, iPad, or iPod touch won't turn on or is frozen](#). Or if your iPad isn't working correctly after you restart it, see the [iPad Support website](#).

Force restart iPad with Face ID or with Touch ID in the top button

If your iPad, doesn't have the Home button, do the following:

1. Press and quickly release the volume up button.
2. Press and quickly release the volume down button.
3. Press and hold the top button.

4. When the Apple logo appears, release the top button.

Force restart models with the Home button

- Press and hold the top button and the Home button at the same time. When the Apple logo appears, release both buttons.
-

Update iPadOS

When you update to the latest version of iPadOS, your data and settings remain unchanged.

Before you update, set up iPad to [back up](#) automatically, or back up your iPad manually.

Update iPad automatically

If you didn't turn on automatic updates when you first set up your iPad, do the following:

1. Go to Settings  > General > Software Update.
2. Tap Customize Automatic Updates (or Automatic Updates). You can choose to automatically download and install updates.

When an update is available, iPad downloads and installs the update overnight while charging and connected to Wi-Fi. You're notified before an update is installed.

Update iPad manually

At any time, you can check for and install software updates.

Go to Settings  > General > Software Update.

The screen shows the currently installed version of iPadOS and whether an update is available.

To turn off automatic updates, go to Settings > General > Software Update > Customize Automatic Updates (or Automatic Updates).

Update using your computer

1. [Connect iPad and your computer with a cable.](#)

2. Do one of the following:

- *In the Finder sidebar on your Mac:* Select your iPad, then click General at the top of the window.

To use the Finder to update your iPad, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to update your iPad.

- *In the iTunes app on your Windows PC:* Click the iPad button near the top left of the iTunes window, then click Summary.

3. Click Check for Update.

4. To install an available update, click Update.

See the Apple Support articles [Update to the latest iOS](#) and [If you can't update or restore your iPhone, iPad, or iPod touch](#).

Back up iPad

You can back up iPad using iCloud or your computer. To decide which method is best for you, see [About backups for iPhone, iPad, and iPod touch](#).

 **Tip:** If you replace your iPad, you can use its backup to transfer your information to the new device. See [Restore all content to iPad from a backup](#).

Back up iPad using iCloud

1. Go to Settings  > [your name] > iCloud > iCloud Backup.
2. Turn on iCloud Backup. iCloud automatically backs up your iPad daily when iPad is connected to power, locked, and on Wi-Fi.
3. To perform a manual backup, tap Back Up Now.

To view your iCloud backups, go to Settings > [your name] > iCloud > Manage Storage > Backups. To delete a backup, choose a backup from the list, then tap Delete Backup.

Note: If you turn on an iCloud feature (such as iCloud Photos or Contacts) in Settings > [your name] > iCloud, its information is stored in iCloud. Because the information is automatically kept up to date on all your devices, it's not included in your iCloud backup. (See the Apple Support article [What does iCloud back up?](#))

Back up iPad using your Mac

1. [Connect iPad and your computer with a cable](#).

2. In the Finder sidebar on your Mac, select your iPad.

To use the Finder to back up iPad, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to back up iPad.

3. At the top of the Finder window, click General.
4. Select "Back up all of the data on your iPad to this Mac."
5. To encrypt your backup data and protect it with a password, select "Encrypt local backup."
6. Click Back Up Now.

Note: You can also connect iPad to your computer wirelessly if you [set up Wi-Fi syncing](#).

Back up iPad using your Windows PC

1. [Connect iPad and your computer with a cable](#).
2. In the iTunes app on your PC, click the iPad button near the top left of the iTunes window.
3. Click Summary.
4. Click Back Up Now (below Backups).
5. To encrypt your backups, select "Encrypt local backup," type a password, then click Set Password.

To see the backups stored on your computer, choose Edit > Preferences, then click Devices. Encrypted backups have a lock icon in the list of backups.

Note: You can also connect iPad to your computer wirelessly if you [set up Wi-Fi syncing](#).

Return iPad settings to their defaults

You can return settings to their defaults without erasing your content.

If you want to save your settings, [back up iPad](#) before returning them to their defaults. For example, if you're trying to solve a problem but returning settings to their defaults doesn't help, you might want to restore your previous settings from a backup.

1. Go to Settings  > General > Transfer or Reset iPad > Reset.

2. Choose an option:

WARNING: If you choose the Erase All Content and Settings option, all of your content is removed. See [Erase iPad](#).

- *Reset All Settings:* All settings—including network settings, the keyboard dictionary, the Home Screen layout, location settings, privacy settings, and Apple Pay cards—are removed or reset to their defaults. No data or media are deleted.
- *Reset Network Settings:* All network settings are removed. In addition, the device name assigned in Settings > General > About is reset to “iPad,” and manually trusted certificates (such as for websites) are changed to untrusted. Cellular data roaming may also be turned off. (See [View or change cellular data settings on iPad \(Wi-Fi + Cellular models\)](#).)

When you reset network settings, previously used networks and VPN settings that weren't installed by a configuration profile or mobile device management (MDM) are removed. Wi-Fi is turned off and then back on, disconnecting you from any network you're on. The Wi-Fi and Ask to Join Networks settings remain turned on.

To remove VPN settings installed by a configuration profile, go to Settings > General > Profiles & Device Management, select the configuration profile, then tap Remove Profile. This also removes other settings and accounts provided by the profile. See [Install or remove configuration profiles on iPad](#) in this guide.

To remove network settings installed by MDM, go to Settings > General > Profiles & Device Management, select the management, then tap Remove Management. This also removes other settings and certificates provided by MDM. See “Mobile device management (MDM)” in the [iOS Deployment Reference](#).

- *Reset Keyboard Dictionary:* You add words to the keyboard dictionary by rejecting words iPad suggests as you type. Resetting the keyboard dictionary erases only the words you've added.
- *Reset Home Screen Layout:* Returns the built-in apps to their original layout on the Home Screen.
- *Reset Location & Privacy:* Resets the location services and privacy settings to their defaults.

If you want to completely erase your iPad, see [Erase all content and settings from iPad](#). If you want or need to use a computer to erase your iPad, see [Use a computer to erase all content and settings from iPad](#).

Restore all content to iPad from a backup

You can restore content, settings, and apps from a backup to a new or newly erased iPad.

Important: You must first create a backup of your iPad. See [Back up iPad](#).

Restore iPad from an iCloud backup

1. Turn on a new or newly erased iPad.
2. Follow the online instructions to choose a language and region.
3. Tap Set Up Manually.
4. Tap Restore from iCloud Backup, then follow the onscreen instructions.

You're asked for your Apple ID. If you've forgotten your Apple ID, see the [Recover your Apple ID website](#).

Restore iPad from a computer backup

1. [Using USB](#), connect a new or newly erased iPad to the computer containing your backup.
2. Do one of the following:
 - *In the Finder sidebar on your Mac:* Select your iPad, then click Trust.

To use the Finder to restore iPad from a backup, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to restore from a backup.
 - *In the iTunes app on a Windows PC:* If you have multiple devices connected to your PC, click the device icon near the top left of the iTunes window, then select your new or newly erased iPad from the list.
3. On the welcome screen, click "Restore from this backup," choose your backup from the list, then click Continue.

If your backup is encrypted, you must enter the password before restoring your files and settings.

See the Apple Support articles [Restore your iPhone, iPad, or iPod touch from a backup](#) and [If you can't update or restore your iPhone, iPad, or iPod touch](#).

Restore purchased and deleted items to iPad

You can redownload items from the App Store, Book Store, and iTunes Store without repurchasing them. If you're part of a [Family Sharing](#) group, you can download items purchased by other family members, too. To restore purchases that aren't on your iPad, see the Apple Support article [Redownload apps, music, movies, TV shows, and books from the App Store, iTunes Store, and Apple Books](#).

You can also [recover recently deleted email, photos, notes, and voice memos](#).

Sell or give away your iPad

Before you sell or give away your iPad, see the Apple Support article [What to do before you sell, give away, or trade in your iPhone, iPad, or iPod touch](#), and be sure to perform the following tasks:

- **Back up iPad.** If you replace one iPad with another, you can [use the setup assistant](#) to restore the backup to your new iPad.

You can use extra free storage on iCloud to move your apps and data from one iPad to another. Go to Settings  > General > Transfer or Reset iPad > Get Started, then follow the onscreen instructions.

- **Erase all content and settings** that contain personal information. If you previously [turned on Find My](#) for your iPad, Activation Lock is removed when you erase iPad, making it ready for a new owner.

Erase iPad

When you delete data, it's no longer accessible through the iPad interface, but it isn't erased from iPad storage. To remove all of your content and settings from storage, erase iPad. For example, erase iPad before you [sell it or give it away](#). If you want to save your content and settings, [back up iPad](#) before erasing it.

You can erase iPad from Settings . If you're unable to open Settings, you can use a computer to erase iPad.

Erase all content and settings from iPad

1. Go to Settings  > General > Transfer or Reset iPad.

If you're erasing your iPad because you're replacing it, you can use extra free storage on iCloud to move your apps and data from one iPad to another. Tap Get Started iPad, follow the onscreen instructions, then return to Settings > General > Transfer or Reset iPad.

2. Tap Erase All Content and Settings.

When iPad restarts with all content and settings erased, you have the option to set up iPad as new or restore it from a backup. See [Turn on and set up iPad](#).

Note: If you're asked to enter your passcode and you've forgotten it, see [Reset the passcode](#). If you're asked to enter your Apple ID password and you've forgotten it, see the [Recover your Apple ID website](#).

Use a computer to erase all content and settings from iPad

You can use a Mac or Windows PC to erase all data and settings from your iPad, restore iPad to factory settings, and install the latest version of iPadOS. For example, if you can't open Settings  on iPad, you can use this approach to restore iPad to factory settings.

Before iPad is erased, you have the option to back it up. If you make a backup, you can use the backup to restore your data and settings on your iPad or on a new device. See [Restore iPad from a computer backup](#).

1. [Connect iPad and your computer with a cable](#).
2. Do one of the following:
 - *In the Finder sidebar on your Mac:* Select your iPad, click General at the top of the window, then click Restore iPad.

To use the Finder to restore iPad to factory settings, macOS 10.15 or later is required. With earlier versions of macOS, [use iTunes](#) to restore iPad.
 - *In the iTunes app on a Windows PC:* Click the iPad button near the top left of the iTunes window, click Summary, then click Restore iPad.
3. Follow the onscreen instructions.

See the Apple Support article [If you can't update or restore your iPhone, iPad, or iPod touch](#).

Install or remove configuration profiles on iPad

Configuration profiles define settings for using iPad with corporate or school networks or accounts. You might be asked to install a configuration profile that was sent to you in an email, or one that is downloaded from a webpage. You're asked for permission to install the profile and, when you open the file, information about what it contains is displayed. You can see the profiles you have installed in Settings  > General > Profiles & Device Management. If you delete a profile, all of the settings, apps, and data associated with the profile are also deleted.

Safety, handling, and support

Important safety information for iPad

⚠ WARNING: Failure to follow these safety instructions could result in fire, electric shock, injury, or damage to iPad or other property. Read all the safety information below before using iPad.

Handling Handle iPad with care. It is made of metal, glass, and plastic and has sensitive electronic components inside. iPad or its battery can be damaged if dropped, burned, punctured, or crushed, or if it comes in contact with liquid. If you suspect damage to iPad or the battery, discontinue use of iPad, as it may cause overheating or injury. Don't use iPad with a cracked screen, as it may cause injury. If you're concerned about scratching the surface of iPad, consider using a case or cover.

Repairing Don't open iPad and don't attempt to repair iPad yourself. Disassembling iPad may damage it or may cause injury to you. iPad Pro 11-inch and iPad Pro 12.9-inch (3rd generation and later) contain lasers that could be damaged during repair or disassembly, which could result in hazardous exposure to infrared laser emissions that are not visible. If iPad is damaged, malfunctions, or comes in contact with liquid, contact Apple or an Apple Authorized Service Provider. Repairs by service providers other than Apple or an Apple Authorized Service Provider may not involve the use of Apple genuine parts and may affect the safety and functionality of the device. You can find more information about repairs and service at the [iPad Repair website](#).

Battery Don't attempt to replace the iPad battery yourself. The lithium-ion battery in iPad should be serviced or recycled by Apple or an authorized service provider. Improper service could damage the battery, cause overheating, or result in injury. The battery must be recycled or disposed of separately from household waste. Don't incinerate the battery. For information about battery services and recycling, see the [Battery Service and Recycling website](#).

Distraction Using iPad in some circumstances may distract you and might cause a dangerous situation (for example, avoid using headphones while riding a bicycle and avoid typing a text message while driving a car). Observe rules that prohibit or restrict the use of mobile devices or headphones.

Navigation Maps depends on data services. These data services are subject to change and may not be available in all countries or regions, resulting in maps and location-based information that may be unavailable, inaccurate, or incomplete. Compare the information provided in Maps to your surroundings. Use common sense when navigating. Always observe current road conditions and posted signs to resolve any discrepancies. Some Maps features require Location Services.

Charging Charge iPad with the included USB cable and power adapter. You can also charge iPad with "Made for iPad" or other third-party cables and power adapters that are compliant with USB 2.0 or later and with applicable country regulations and international and regional safety standards. Other adapters may not meet applicable safety standards, and charging with such adapters could pose a risk of death or injury.

Using damaged cables or chargers, or charging when moisture is present, can cause fire, electric shock, injury, or damage to iPad or other property. When you charge iPad, make sure the USB cable is fully inserted into the power adapter before you plug the adapter into a power outlet. It's important to keep iPad, the USB cable, and the power adapter in a well-ventilated area when in use or charging.

Charging cable and connector Avoid prolonged skin contact with the charging cable and connector when the charging cable is connected to a power source because it may cause discomfort or injury. Sleeping or sitting on the charging cable or connector should be avoided.

Prolonged heat exposure iPad and its USB power adapter comply with required surface temperature limits defined by applicable country regulations and international and regional safety standards. However, even within these limits, sustained contact with warm surfaces for long periods of time may cause discomfort or injury. Use common sense to avoid situations where your skin is in contact with a device or its power adapter when it's operating or connected to a power source for long periods of time. For example, don't sleep on a device or power adapter, or place them under a blanket, pillow, or your body, when it's connected to a power source. Keep your iPad and its power adapter in a well-ventilated area when in use or charging. Take special care if you have a physical condition that affects your ability to detect heat against the body.

USB power adapter To operate the Apple USB power adapter safely and reduce the possibility of heat-related injury or damage, plug the power adapter directly into a power outlet. Don't use the power adapter in wet locations, such as near a sink, bathtub, or shower stall, and don't connect or disconnect the power adapter with wet hands. Stop using the power adapter and any cables if any of the following conditions exist:

- The power adapter plug or prongs are damaged.
- The charge cable becomes frayed or otherwise damaged.
- The power adapter is exposed to excessive moisture, or liquid is spilled into the power adapter.
- The power adapter has been dropped, and its enclosure is damaged.

USB power adapter specifications:

Frequency	50 to 60 Hz, single phase
Line voltage	100 to 240 Vac
Output voltage	Refer to the output marking on the power adapter

Hearing loss Listening to sound at high volumes may damage your hearing. Background noise, as well as continued exposure to high volume levels, can make sounds seem quieter than they actually are. Turn on audio playback and check the volume before inserting anything in your ear. For information about how to set a maximum volume limit on iPad, see [Reduce loud headphone sounds in Settings](#). For more information about hearing loss, see the [Sound and Hearing website](#).

The Apple headsets sold with iPhone in China (identifiable by dark insulating rings on the plugs) are designed to comply with Chinese standards and are only compatible with iPad, iPhone, and iPod touch.

⚠ WARNING: To prevent possible hearing damage, do not listen at high volume levels for long periods.

Radio frequency exposure iPad uses radio signals to connect to wireless networks. For information about radio frequency (RF) energy resulting from radio signals, and steps you can take to minimize exposure, go to Settings  > General > Legal & Regulatory > RF Exposure, or see the [RF Exposure website](#).

Radio frequency interference Observe signs and notices that prohibit or restrict the use of mobile devices. Although iPad is designed, tested, and manufactured to comply with regulations governing radio frequency emissions, such emissions from iPad can negatively affect the operation of other electronic equipment, causing them to malfunction. When use is prohibited, such as while traveling in aircraft, or when asked to do so by authorities, turn off iPad, or [use airplane mode](#) or Settings  > Wi-Fi and Settings > Bluetooth to turn off the iPad wireless transmitters.

Medical device interference iPad contains components and radios that emit electromagnetic fields. iPad also contains magnets along the left and right edges and back of the device and on the right side of the front glass, which may interfere with medical devices, such as pacemakers and defibrillators. All models of iPad Smart Cover, Smart Folio, Smart Keyboard, Smart Keyboard Folio, Magic Keyboard for iPad, and Apple Pencil (each sold separately) also contain magnets. These electromagnetic fields and magnets may interfere with medical devices. Consult your physician and medical device manufacturer for information specific to your medical device and whether you need to maintain a safe distance of separation between your medical device and iPad or any of its accessories. If you suspect iPad is interfering with your medical device, stop using iPad.

Not a medical device iPad is not a medical device and should not be used as a substitute for professional medical judgment. It is not designed or intended for use in the diagnosis of disease or other conditions, or in the cure, mitigation, treatment, or prevention of any condition or disease. Please consult your healthcare provider prior to making any decisions related to your health.

Medical conditions If you have any medical condition or experience symptoms that you believe could be affected by iPad or flashing lights (for example, seizures, blackouts, eyestrain, or headaches), consult with your physician prior to using iPad.

Explosive and other atmospheric conditions Charging or using iPad in any area with a potentially explosive atmosphere, such as areas where the air contains high levels of flammable chemicals, vapors, or particles (such as grain, dust, or metal powders), may be hazardous. Exposing iPad to environments having high concentrations of industrial chemicals, including near evaporating liquified gasses such as helium, may damage or impair iPad functionality. Obey all signs and instructions.

Repetitive motion When you perform repetitive activities such as typing, swiping, or playing games on iPad, you may experience discomfort in your hands, arms, wrists, shoulders, neck, or other parts of your body. If you experience discomfort, stop using iPad and consult a physician.

High-consequence activities This device is not intended for use where the failure of the device could lead to death, personal injury, or severe environmental damage.

Choking hazard Some iPad accessories may present a choking hazard to small children. Keep these accessories away from small children.

Important handling information for iPad

Cleaning Clean iPad immediately if it comes in contact with anything that may cause stains or other damage—for example, dirt or sand, ink, makeup, soap, detergent, acids or acidic foods, and lotions. To clean:

- Disconnect all cables, then do one of the following to turn off iPad:
 - *On an iPad with a Home button:* Press and hold the top button until the slider appears, then drag the slider.
 - *On other iPad models:* Simultaneously press and hold the top button and either volume button until the sliders appear, then drag the top slider.
 - *All models:* Go to Settings  > General > Shut Down, then drag the slider.
- Use a soft, slightly damp, lint-free cloth—for example, a lens cloth.
- Avoid getting moisture in openings.
- Don't use cleaning products or compressed air.

The front of iPad is made of glass with a fingerprint-resistant oleophobic (oil-repellant) coating. This coating wears over time with normal usage. Cleaning products and abrasive materials will further diminish the coating and may scratch the glass.

Using connectors, ports, and buttons Never force a connector into a port or apply excessive pressure to a button, because this may cause damage that is not covered under the warranty. If the connector and port don't join with reasonable ease, they probably don't match. Check for obstructions and make sure that the connector matches the port and that you have positioned the connector correctly in relation to the port.

Lightning to USB Cable ([models](#) with a Lightning connector) Discoloration of the Lightning connector after regular use is normal. Dirt, debris, and exposure to moisture may cause discoloration. If your Lightning cable or connector become warm during use or your iPad won't charge or sync, disconnect it from your computer or power adapter and clean the Lightning connector with a soft, dry, lint-free cloth. Do not use liquids or cleaning products when cleaning the Lightning connector.

Lightning to USB Cable or USB-C Charge Cable (depending on [model](#)) Certain usage patterns can contribute to the fraying or breaking of cables. The included cable, like any other metal wire or cable, is subject to becoming weak or brittle if repeatedly bent in the same spot. Aim for gentle curves instead of angles in the cable. Regularly inspect the cable and connector for any kinks, breaks, bends, or other damage. Should you find any such damage, discontinue use of the cable.

Operating temperature iPad is designed to work in ambient temperatures between 32° and 95° F (0° and 35° C) and stored in temperatures between -4° and 113° F (-20° and 45° C). iPad can be damaged and battery life shortened if stored or operated outside of these temperature ranges. Avoid exposing iPad to dramatic changes in temperature or humidity. When you're using iPad or charging the battery, it is normal for iPad to get warm.

If the interior temperature of iPad exceeds normal operating temperatures (for example, in a hot car or in direct sunlight for extended periods of time), you may experience the following as it attempts to regulate its temperature:

- iPad stops charging.
- The screen dims.
- A temperature warning screen appears.
- Some apps may close.

Important: You may not be able to use iPad while the temperature warning screen is displayed. If iPad can't regulate its internal temperature, it goes into deep sleep mode until it cools. Move iPad to a cooler location out of direct sunlight and wait a few minutes before trying to use iPad again.

See the Apple Support article [Keeping iPhone, iPad, and iPod touch within acceptable operating temperatures](#).

Find more resources for iPad software and service

Refer to the following resources to get more iPad-related safety, software, service, and support information.

To learn about	Do this

To learn about	Do this
Finding your iPad serial number or IMEI	You can find your iPad serial number or International Mobile Equipment Identity (IMEI) on the iPad packaging. Or, on iPad, go to Settings ⓘ > General > About. See the Apple Support article Find the serial number or IMEI on your iPhone, iPad or iPod touch .
Obtaining warranty service	First follow the advice in this guide, then see the iPad Support website .
Viewing iPad regulatory information	On iPad, go to Settings ⓘ > General > Legal & Regulatory.
Battery service	See the Battery Service and Recycling website .
Using iPad in an enterprise environment	See the Apple at Work website .
Using iPad in education	See the Education website .

FCC compliance statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications to this product not authorized by Apple could void the electromagnetic compatibility (EMC) and wireless compliance and negate your authority to operate the product.

This product has demonstrated EMC compliance under conditions that included the use of compliant peripheral devices and shielded cables between system components. It is important that you use compliant peripheral devices and shielded cables between system components to reduce the possibility of causing interference to radios, televisions, and other electronic devices.

Responsible party (contact for FCC matters only):

Apple Inc.
One Apple Park Way, MS 911-AHW
Cupertino, CA 95014
USA

ISED Canada compliance statement

This device complies with ISED Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

Le présent appareil est conforme aux CNR d'ISDE Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage, et (2) l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

La bande 5150–5250 MHz est réservée uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux.

Apple and the environment

At Apple, we recognize our responsibility to minimize the environmental impacts of our operations and products. For more information, see our [Environment website](#).

Class 1 Laser information for iPad

iPad Pro 11-inch and iPad Pro 12.9-inch (3rd generation and later) are classified as Class 1 Laser products per IEC 60825-1 Ed. 3. These devices comply with 21 CFR 1040.10 and 1040.11, except for conformance with IEC 60825-1 Ed. 3., as described in Laser Notice No. 56, dated May 8, 2019.

Caution: These devices contain one or more lasers. Use other than as described in the user guide, repair, or disassembly may cause damage, which could result in hazardous exposure to infrared laser emissions that are not visible. This equipment should be serviced by Apple or an authorized service provider.

CLASS 1 LASER PRODUCT

Disposal and recycling information for iPad

Apple Recycling Program (available in some countries or regions)

For free recycling of your old iPad, a prepaid shipping label, and instructions, see the [Apple Trade In website](#).

Disposal and Recycling Information

The symbol above means that according to local laws and regulations your product and/or its battery shall be disposed of separately from household waste. When this product reaches its end of life, take it to a collection point designated by local authorities. The separate collection and recycling of your product and/or its battery at the time of disposal will help conserve natural resources and ensure that it is recycled in a manner that protects human health and the environment. For information about Apple's recycling program, recycling collection points, restricted substances, and other environmental initiatives, visit apple.com/environment.

Brasil – Informações sobre descarte e reciclagem

O símbolo acima indica que este produto e/ou sua bateria não devem ser descartados no lixo doméstico. Quando decidir descartar este produto e/ou sua bateria, faça-o de acordo com as leis e diretrizes ambientais locais. Para informações sobre substâncias de uso restrito, o programa de reciclagem da Apple, pontos de coleta e telefone de informações, visite apple.com/br/environment.

Información sobre eliminación de residuos y reciclaje

El símbolo de arriba indica que este producto y/o su batería no debe desecharse con los residuos domésticos. Cuando decidas desechar este producto y/o su batería, hazlo de conformidad con las leyes y directrices ambientales locales. Para obtener información sobre el programa de reciclaje de Apple, puntos de recolección para reciclaje, sustancias restringidas y otras iniciativas ambientales, visita apple.com/mx/environment o apple.com/la/environment.

Turkey environmental information

Türkiye Cumhuriyeti: AEEE Yönetmeliğine Uygundur.

Battery service

The lithium-ion battery in iPad should be serviced by Apple or an authorized service provider. See the [Battery Service and Recycling website](#).

Dispose of batteries according to your local environmental laws and guidelines.

China mainland battery statement

警告：不要刺破或焚燒。該電池不含水銀。

Taiwan battery statement

廢電池請回收

警告：請勿戳刺或焚燒。此電池不含汞。

ENERGY STAR® compliance statement for iPad

To save energy, iPad is set to lock after two minutes of user inactivity. To change this setting, go to Settings  > Display & Brightness > Auto-Lock, then select an option. To unlock an iPad with a Home button, press the top button or the Home button. To unlock other iPad models, tap the screen or press the top button.

iPad meets the ENERGY STAR guidelines for energy efficiency. Reducing energy consumption saves money and helps conserve valuable resources; see the [Energy Star website](#).
