

Date: 8<sup>th</sup> September 2022

Attestation letter for Low Power Indoor Client.

FCC ID: BCGA2759, BCGA2435, BCGA2761, BCGA2436, BCGA2764, BCGA2437

We, Apple inc., attest that these devices under FCC ID BCGA2759, BCGA2435, BCGA2761, BCGA2436, BCGA2764, BCGA2437 comply with device protocol requirements and operational restrictions: for Indoor client 6XD

- a. This device will only associate and connect with a Low-power Indoor Access Point or subordinate device and never directly connect to other client devices.
- b. This device will always initiate transmission under the control of a Low-power Indoor Access Point or subordinate device except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP, it will not continually repeat the request.
- c. Transmissions will be lower or equal to the power advertised by the Indoor Low-power Access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

Furthermore, we fully understand this device is prohibited for control of or communications with unmanned aircraft systems, including drones.

For any questions or concern please feel free to contact me.

Sincerely,

---
