7435 Oakland Mills Rd.
Columbia MD 21046d

Attn: OET Department

To whom it may concern:

We, Apple Inc., attest that these devices under **FCC ID: BCGA2993 and BCGA2995**, complies with device protocol requirements and operational restrictions for Dual Client devices (6CD).

- a) These devices do not support indoor subordinate (6PP) category and the maximum power does not exceed authorized value.
- b) These devices will only associate and connect with a Low Power Indoor Access Point, Subordinate device, or Standard Access Point and never directly link to another client device.
- c) These devices will always initiate transmission under the control of a Low Power Indoor AP or subordinate device or standard power AP except for brief communications before joining a network. These quick messages will only occur if the client has detected an Indoor AP, Subordinate, or Standard Access Point operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP, it will not continually repeat the request.
- d) These devices, when associated and connected with a Low Power Indoor Access Point, Subordinate, or Standard Access Point device, will operate at a power lower as advertised by the Low Power Indoor access point, Subordinate or Standard Access Point:
 - a. Lower than or equal to the power advertised by the Low Power Indoor Access Point or Subordinate device and never above the maximum output power level allowed by the FCC grant for clients associated with indoor clients or subordinates.
 - b. Lower than or 6dB below the power advertised by the Standard Access Point.
- e) We acknowledge that these devices are subject to and in full compliance with the device restriction listed below.
 - a. Prohibited for control of or communications with unmanned aircraft systems, including drones.

Sincerely,

Abhishek Rala
