RE: FCC ID: BCR-80315D_ATCB005234
Attention: Tom Tidwell

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that the above FCC ID requests grant of certification in the 806-824MHz and 851-869MHz bands under part 90. Please note that the operational description indicates that the device is band selectable and that other than the above mentioned bands may be selected. It appears that the particular band selected determines the model number. The operational description is not clear on this issue. As this is a part 90 only application, the user cannot make the device operate on other than the frequency bands requested. Please explain how this is prevented for this particular model device.
2. Please note that as this is a booster/amplifier operating under the license of a base station and can be used in other than a licensed station location (i.e. in buildings etc) rf exposure must be addressed at the time of certification as it cannot be addressed at the time of licensing. Please provide an MPE report for the device.
3. Please note that the report calls this device a repeater while other documentation (i.e. 731) calls the device a booster. Please explain, is this device a repeater or a booster?
4. Please provide separate internal photos of the device as required by the FCC.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
