

ION-B TFAM80/92/19E Tune-Up Procedure

Gain for the ION-B TFAM80/92/19E is set at the factory and no provisions are made for user accessible controls. Output power is a function of the input power and the fixed gain of the TFAM80/92/19E.

The user should provide an input signal that will produce an output power not exceeding the levels included in the product data sheet for the TFAM80/92/19E remote.
