RE: Request for Class II Permissive Change

FCC ID: BCR-IONEUAP

Attn: Director of Certification

CommScope would like to request a Class II permissive change of our ION-E UAP product that was type approved under the FCC identifier BCR-IONEUAP to obtain certification to Part 90. Nothing in the product has been changed and the hardware used for the original certification testing will be used for the Class II permissive change certification testing. Our original intent was to obtain type acceptance at the commercial bands before obtaining type acceptance in the public safety and LMR frequency bands.

Dated this 7th Day of April 20 15
