Allen telecom response: To clarify the previuos response, The application of this repeater is intended to be used as an outdoor site with fixed pole mount or roof top antennas. We have corrected the above warning statement by add a new installer warning statement to the beginning of the users manual. This is to alert the installers that antenna placement must be within the FCC RF exposure guidelines. We have also clarified the intended use of the product in the introduction section. (please refer to the updated manual pages).
