

TCB RF Exposure Determination

The product was categorized as a fixed mounted transmitter identified in table 1 of 47 CFR Part 1.1307. When referring to the TCB exclusion list under category I the product did not meet the criteria for being excluded from TCB processing as the product is:

- a) licensed
- b) the antenna is mounted on outdoor permanent structures
- c) not a Parts 21, 74 and 101 device

Section A of the TCB RF exposure procedures was invoked. The necessary grant conditions were stated on the grant. The TCB met its obligation to inform the applicant of about applicable operating and evaluation requirements to satisfy RF exposure compliance. The TCB observed that the applicant has included reasonable RF exposure language in the manual and is therefore aware of the RF exposure requirements.
