

ION-B TFAH-US4B Tune-up Procedure

Gain for the ION-B TFAH-US4B High Power Remote is set at the factory and no provisions are made for user accessible controls. Output power is a function of the input power and the fixed gain of the TFAH-US4B.

The user should provide an input signal that will produce an output power not exceeding the levels included in the product data sheet for the medium power remote.
