How to pair with my mobile phone 83

Introduction

Bluetooth is an open specification for a cutting-edge technology that enables short-range wireless connections between desktop and laptop computers, personal digital assistants, cellular phones, printers, scanners, digital cameras and even home appliances — on a globally available band (2.4GHz) for worldwide compatibility. In a nutshell, Bluetooth unplugs your digital peripherals and makes cable clutter a thing of the past. Now you can connect your PDA or PC to Bluetooth[™] enabled mobile phone with this Bluetooth[™] adapter.

You can access e-mail & Internet no matter where you are with just a little help from your Bluetooth[™] mobile phone.

Plus, when you are back in the office, you can hook yourself up to your office network as well as communicate with other Bluetooth[™]-enabled devices.

Chapter1

Package

- One Bluetooth adapter
- One driver and software disk
- This user manual

Features

- Bluetooth v1.1 compliant
- USB Bluetooth adapter support full speed USB v1.1 Interface.
- CF Bluetooth adapter complies with CompactFlash type I Interface.
- PCMCIA Bluetooth adapter complies with PC Card Standard, including PCMCIA release 2.1 and JEIDA 4.x standards.
- Wireless communication within a radius of 32 Feet (10 Meters) for Class 2 Bluetooth devices.
- Wireless communication within a radius of 328 Feet (100 Meters) for Class 1 Bluetooth devices.
- Connect up to 7 different Bluetooth enabled devices
- Encryption and authentication to ensure safe, secure communications
- Low power consumption

Specifications

Main chip: CSR BlueCore 02

Protocol: Bluetooth 2.4 GHz ISM band frequency hopping

Data Rate: 721 Kbps

Connect up to 7 devices in a **Piconet**

Antenna: Integrated inside the adapter

0dBm(Class 2) Bluetooth radio:

Connection within a range of up to 32 feet (10 meters)

Class1 Bluetooth radio:

Connection within a range of up to 328 feet (100 meters)

Sensitivity: -80dbm at 0.1% Bit Error Rate (BER)

Security: encrypted link, authentication

Bluetooth profile support includes:

Generic Access Profile (GAP),

Serial Port Profile (SPP),

Service Discovery Application Profile (SDAP),

Generic Object Exchange Profile (GOEP),

Object Push Profile (OPP),

File Transfer Profile (FTP),

Dial-up Network Profile (DUN),

LAN Access Profile (LAP),

Fax Profile (FAX),

Synchronization Profile,

Headset Profile,

Personal Area Network (PAN)

Human Interface Device (HID)

Hardcopy Cable Replacement Profile (HCRP)

Mechanics

USB Bluetooth Dimension:

58.6 x 19.8 x 8.1 mm (L x W x H) (for Class 2)

72.2 x 29.8 x 8.5 mm (L x W x H) (for Class 1 width including external antenna)

CF Bluetooth Dimension:

47.3 x 42.9 x 4.58 mm (L x W x H)

PCMCIA Bluetooth Dimension:

86 x 54 x 5 mm (L x W x H)

Certification

FCC, CE, BQB

Environmental Operating Ranges

•Temperature: 0 ~ 50% •Humidity: 10 ~ 90%

Power Consumption

USB Bluetooth:

Typical: 40mA/5V Maximum: 90mA/5V

CF Bluetooth:

Typical: 40mA/3.3V Maximum: 90mA/3.3V

PCMCIA Bluetooth:

Typical: 70mA/5V Maximum: 210mA/5V Idle: 25mA/5V

LED Indication

CF adapter LED: Power on, Activity

PCMCIA adapter LED: Activity

Drivers support

USB Bluetooth:

Windows 98SE, Me, 2000, XP, MAC O.S. 10.2.x

CF Bluetooth:

Windows 98SE, Me, 2000, XP, PPC2000, PPC2002

PCMCIA Bluetooth:

Windows 98SE, Me, 2000, XP,

2

Chapter2

Setup for Windows 98SE/2000/ME/XP

For PCMCIA or CF Bluetooth card, please install the driver before installing Bluetooth software, the driver can be located in BTCF (for CF Bluetooth adapter) or BTPCMCIA (for PCMCIA Bluetooth adapter) of the driver CD.

For USB Bluetooth adapter, please install Bluetooth software before inserting the USB adapter.

Install CF (PCMCIA) Bluetooth card driver

Please follow the steps below to install driver for CF Bluetooth card.

(1) Insert your CF Bluetooth card in a PCMCIA adapter.

(2) Plug the PCMCIA adapter in the PCMCIA slot of your notebook and place the installation CD in the CD-ROM.

(3) System will automatically detect the card. Select "Install the software automatically (Recommended)" and click "**Next**".

Found New Hardware Wiz	zard			
	Welcome to the Found New Hardware Wizard This wizard helps you install software for: Compact_Flash Bluetooth_Card			
	If your hardware came with an installation CD or floppy disk, insert it now. What do you want the wizard to do?			
1	 Install the software automatically (Recommended) Install from a list or specific location (Advanced) 			
a statistic second second	Click Next to continue.			
	< Back Next > Cancel			

(4) If the driver was not found automatically, please click "Install from a list or specific location (Advanced)" and direct the system to the BTCF directory on your CD-ROM for the appropriate driver.

(5) When the driver is found, Windows 2000/XP will pop up a warning message as below. Click **"Continue Anyway**" to continue.

Hardwa	re Installation
<u>.</u>	The software you are installing for this hardware: CF Bluetooth Communication Card has not passed Windows Logo testing to verify its compatibility with Windows XP. (Tell me why this testing is important.) Continuing your installation of this software may impair or destabilize the correct operation of your system either immediately or in the future. Microsoft strongly recommends that you stop this installation now and contact the hardware vendor for software that has passed Windows Logo testing.
	Continue Anyway

(6) Click the "**Finish**" button to complete the driver installation process for CF Bluetooth card.

(7) The driver installation process of PCMCIA Bluetooth card is similar to the CF Bluetooth card, please refer to the section above.

Installing Bluetooth software for Windows

(1) Place installation CD into PC and the setup menu should launch automatically.

If the setup menu does not launch automatically, use Windows Explorer to navigate to the appropriate CD-ROM drive and run **"Bsetup"**.

(2) Please select your device and O.S.

- (3) Complete the following steps to install Bluetooth software:
- (a) Exit all applications.
- (b) InstallShield Wizard setup dialog box will automatically be displayed.
- (c) Follow the instructions on screen:
- (d) On the *Welcome* screen, click the **Next** button.

🔀 Bluetooth Software 1.4.1 Build 7 - InstallShield Wizard 🛛 🔀

(h) For Windows 2000/XP users, system will popup a **"Driver Signature Notice"**, please click the **"OK"** button.

Driver Signature Notice
Currently Microsoft does not have a certification program in place for Bluetooth devices. As a result, at this time it is not possible to provide certified drivers for Bluetooth devices. In the event that Microsoft implements a Windows Logo certification process for Bluetooth devices, signed drivers will be made available.
To avoid receiving several prompts for signed drivers during the installation process, select OK to disable unsigned driver warnings, and proceed with the installation. The default warning option will be re-enabled at the completion of the installation of the Bluetooth drivers. This option is an effort to provide the best customer experience while using this product. If you select Cancel, the installation will continue without disabling the warnings and you will be required to select Continue at each prompt to proceed with the installation.
Cancel

(i) During the installation of USB Bluetooth adapter, system will try to detect your Bluetooth device, please make sure your Bluetooth device is plugged in properly. If the USB Bluetooth adapter was not plugged in previously, a message box as below will pop up,

please plug it in now and click "**OK**" to continue, or you can click "**Cancel**" to continue the installation without the Bluetooth device.

Bluetoot	h device not found				
No Bluetooth device was detected. Please make sure that your Bluetooth device is plugged in properly and click 'OK' to continue installation. Click 'Cancel' to continue installation without the Bluetooth device.					
	Cancel

Setup for Mac

Mac O.S.X 10.2

Mac O.S. 10.2.x has build-in Bluetooth software for USB Bluetooth adapters, therefore no additional Bluetooth software is required. Simply plug in the USB Bluetooth adapter and a Bluetooth icon will appear in the System folder. Open the Bluetooth applet to configure the Bluetooth functions on your Mac system.

3.2. Network sharing setting for Windows

The Network Access service permits a Bluetooth enabled PC (client) to access the Internet via another Bluetooth enabled PC (Server) that already has an Ethernet connection. **Windows network sharing setting**

PC to PC (Windows 2000 or Windows XP)

1. To enable Internet Connection Sharing on the server PC

2. Click on **Start menu-->Settings -->Network and Dial-up Connections** and find your Local Area Connection (LAN) that is connected to the Internet.

3. Right click the active LAN connection to open the "Properties" dialog box.

àeneral Connec	Authentication using: tel 21143-Based F	Advanced PCI Fast Etherne	t Adapter (Gener	ic)

9. This allows the server PC to act as a DHCP server towards the client PCs. NOTE: For Win98SE and WinMe, please download and install WinRoute (or similar program) on the Server PC to allow DHCP service.

10. On the client PC, launch the Bluetooth software stack by clicking the **"My Bluetooth Places"** icon located on the desktop.

11. Double click the **"Entire Bluetooth Neighborhood"** icon to search for other Bluetooth devices nearby.

The search for devices has finished

12. After searching is completed, locate the computer name of the server PC and double click it to discover the Bluetooth services it has to offer. (i.e. Bluetooth Serial Port, Dial-up Networking, File Transfer, Network Access, etc.).

13. Click on the "Network Access" icon to connect to the shared Internet connection on the server PC.

14. Click OK without entering any username or password. If one is already present, click OK anyway and it will still connect.

15. Now you can access the Internet via Bluetooth.

Note: If your PC accesses the Internet via a proxy server, remember to configure the proxy setting of you browser program in the client PC. Consult your MIS personnel if you're not sure what to set.

Proxy setup

1. To set up proxy, right click "Internet Explorer", select "Properties", select "Connections" tab. Select "BluetoothNull Connection" and click on "Settings...".

2. Select the **"Proxy server"** checkbox and enter the proxy address of you company and Port number. Then click **"OK**" to save the changes.

3.3. File transfer setting for Windows

The File Transfer service allows one Bluetooth device to perform file operations on the default File Transfer directory (and the folders and files it contains) of another Bluetooth device.

File transfer setting for Windows PC to PC

1. After successful USB adapter setup on two PCs, launch the Bluetooth software stack on both PCs by clicking the **"My Bluetooth Places"** icon located on the desktop.

2. On one PC only, double click on "Entire Bluetooth Neighborhood" icon to search for other Bluetooth devices nearby.

3. After searching is completed, locate the name of PC that you wish to transfer the file to and double click it to discover the Bluetooth services it has to offer (i.e. Bluetooth Serial Port, Dial-up Networking, File Transfer, Network Access, etc.).

4. Double click the **"Public Folder**" icon to open the Bluetooth shared folder on the other PC.

5. Locate the file you wish to transfer to that PC and drag it into the **"Public Folder"** window.

6. At this time, a window will pop up to indicate that a file transfer connection is being established, and then file transfer will begin.

Copying	
BTplace.bmp	
From 'H:\' to 'Public Folder\'	
	Cancel
Copied 173,892 bytes of 286,422 bytes.	

7. The file will be opened once the transfer is completed, if the **"Start Automatically"** checkbox is selected.

3.4. Dial-up networking setting for Windows

The Dial-up Networking service permits a Bluetooth client to use a modem that is physically connected to a different Bluetooth device (the server). After the Bluetooth wireless connection is established the client can use the server's modem as if it were a local device on the client.

To establish a Dial-up Networking session:

Dial-up networking setting for Windows

Connections are initiated from the client:

1. On the client, in the Folders pane of **"My Bluetooth Places"**, select **"Entire Bluetooth Neighborhood"**.

2. In the right pane of **"Entire Bluetooth Neighborhood"**, right-click anywhere *except on a device name* and select **"Refresh**" from the pop-up menu.

3. In the Folders pane of **"My Bluetooth Places"**, right-click the server that will provide the Dial-up Networking Service and select Discover Available Services from the pop-up menu to update the available services list. The available services will be displayed in the right pane of **"My Bluetooth Places"**.

To close a Dial-up Networking connection

1. On the client, in the Folders pane of **"My Bluetooth Places"**, select (highlight) the device that is providing the Dial-up Networking service.

2. In the right pane of "My Bluetooth Places", right-click "Dial-up Networking" and then select "Disconnect Dial-up Networking" from the pop-up menu.

3.5. FAX setting

The Fax service allows a Bluetooth client to wirelessly send a fax using a device that is physically attached to a Bluetooth server.

FAX setting for Windows

To send a Fax

Connections are initiated from the client:

1. On the client, in the Folders pane of **"My Bluetooth Places"**, select **"Entire Bluetooth Neighborhood"**.

2. In the right pane of **"Entire Bluetooth Neighborhood"**, right-click anywhere except on a device name and select Refresh from the pop-up menu.

3. In the Folders pane of **"My Bluetooth Places"**, right-click the server that will provide the Fax service and select **"Discover Available Services"** from the pop-up menu to update the available services list. The available services will be displayed in the right pane of **"My Bluetooth Places"**.

4. In the right pane of **"My Bluetooth Places"**, double-click Fax. After the Fax connection is established, open or create the document to be faxed and use the **"Print"** or **"Send to Fax Recipient"** option available in most applications. The Fax connection closes automatically when the transmission is completed.

3.6. PIM Item Transfer setting

Overview

The Bluetooth PIM Item Transfer application allows this computer to send and receive Personal Information Manager items to-and-from a remote Bluetooth device. Item transfer can be accomplished several ways:

To send, receive or exchange business cards:

1. From Windows Explorer, My Bluetooth Places, right-click the PIM Item Transfer service on a remote device and select the appropriate option.

or In the Windows system tray, right-click the Bluetooth icon, select Quick Connect Business Card Exchange, select a device from the list, select the appropriate option from the shortcut menu, and then click OK.

2. From Windows Explorer, My Bluetooth Places, highlight the PIM Item Transfer service on a remote device, and then, from the Bluetooth menu on the Windows menu bar, select the appropriate action.

In addition to the business card options listed above, you can also send Notes (*.vnt), Email (*.vmg) and Calendar (*.vcs) items from this menu.

3. From within a supported Personal Information Manager, select one or more items and then, from the PIM's File menu, select Send to Bluetooth.

Whether sent items are accepted by the remote device is determined by how the remote device's PIM Item Transfer service is configured.

Close a PIM Item Transfer Connection

This application closes the open connection automatically when its task is complete.

Configure PIM Item Transfer

The Bluetooth Configuration Panel > Client Applications > PIM Item Transfer > General tab provides options to configure:

- Click the application name to change it, highlight the existing name and enter the new name.
- Enable or disable secure connection. To enable secure connection, place a checkmark in the box.
- How your business card is handled when it is requested by a remote device. The Send My Business Card options are:

Choose a business card as needed-each time a remote device requests your business card you must select a card from your PIM. If you ignore the request the remote device will receive a timeout notice.

Always send the same business card-when this option is selected a dialog appears that allows you to set a default business card, which will be sent automatically when requests are received.

Where to store received business cards. The Received Business Cards options are:

Microsoft Outlook

Outlook Express

Lotus Notes

NOTE: The selected Received Business Cards option does not influence the settings on other PIM-related property pages.

For example, even if the PIM Item Transfer *service* business card option on this computer is configured to "Do Not Accept", the PIM Item Transfer *application* will still accept business cards that the application has specifically requested via its "Receive" or "Exchange" functions.

Email attachments. The only option is include or do not include attachments with email that is sent or received on this computer using this service.

3.7. PIM Synchronization setting

Overview

The PIM Synchronization Application is used to synchronize the Personal Information Manager (PIM) database of this computer with the PIM database of a remote Bluetooth device.

The supported PIMs are:

- Microsoft Outlook
- Microsoft Outlook Express
- Lotus Notes.

The supported data types are:

- Business cards
- Calendar items
- Email (with or without attachments)
- Notes.

Configure PIM Synchronization

The Bluetooth Configuration Panel > Client Applications > PIM Synchronization > General tab provides options to configure:

- The application name- to change it, highlight the existing name and enter the new name.
- Enable or disable secure connection. To enable secure connection, place a checkmark in the box.
- The PIM items to be synchronized and the PIM on this computer with which those items should be synced.

NOTE: If synchronization is enabled for a specific item type, but is not enabled for that item type on the remote device, synchronization WILL NOT take place for that item.

The data item types which can be synchronized are:

- . Business cards
- . Calendar items
- . Email (with or without attachments-see below)

. Notes

Possible synchronization options for each of these data item types include:

Do Not Synchronize-this item type will not be synchronized

Synchronize Microsoft Outlook-this item type will be synced with its matching entry in Microsoft Outlook, regardless of the PIM that contains this entry on the remote device. If a matching Outlook entry does not exist, it will be created

Synchronize Outlook-Express-this item type will be synced with its matching entry in Express, regardless of the PIM that contains this entry on the remote device. If a matching Express entry does not exist, it will be created

Synchronize Lotus Notes-this item type will be synced with its matching entry in Lotus Notes, regardless of the PIM that contains this entry on the remote device. If a matching Notes entry does not exist, it will be created.

NOTE: All choices are not available for all items. For example, Notes items can only be synchronized in Microsoft Outlook, therefore Lotus Notes and Outlook Express do not appear as options in the "Notes" item shortcut menu.

Personal Information Managers that are not installed on this computer do not appear as options in the shortcut menus.

Email attachments. The only option is include or do not include attachments with email that is sent or received on this computer using this service.

3.8. Serial port setting

The Bluetooth Serial Port service allows two Bluetooth devices to establish a wireless connection through virtual communications ports and then use that connection as if it were a hardwired serial cable between the devices.

To establish a Bluetooth serial port connection:

Connections are initiated from the client:

1. On the client, in the Folders pane of **"My Bluetooth Places"**, select **"Entire Bluetooth Neighborhood"**.

2. In the right pane of **"Entire Bluetooth Neighborhood"**, right-click anywhere *except on a device name* and select **"Refresh"** from the pop-up menu.

3. In the Folders pane of **"My Bluetooth Places"**, right-click the server you want to establish a connection with and select **"Discover Available Services"** from the popup menu to update the available services list. The available services will be displayed in the right pane of **"My Bluetooth Places"**.

4. In the right pane of **"My Bluetooth Places"**, double-click **"Bluetooth Serial Port"**. A dialog box appears that contains the communications port number assigned to this connection by the client. The application that will use this connection must be configured to send data to this port.

Depending on the security configuration, the dialog box that provides communications port information may not appear until after Authentication and Authorization have been accomplished.

The application on the server must be configured to use the correct communications port. **To determine the communications port being used by the service:**

* On the server, in the Folders pane of "My Bluetooth Places", right-click "My Device" and select "Properties" from the pop-up menu

* In the "Bluetooth Configuration Panel", select the "Local Services" tab.

* Double-click the **"Bluetooth Serial Port"** service to display its **"Service Properties"** dialog box. The **"Service Properties"** dialog box shows the communications port the connection is using.

To close a Bluetooth serial port connection

Connections are normally closed from the client:

* On the client, in the Folders pane of **"My Bluetooth Places"**, select (highlight) the device that is providing the **"Bluetooth Serial Port"** service.

* In the right pane of **"My Bluetooth Places"**, right-click **"Bluetooth Serial Port"** and then select **"Disconnect Bluetooth Serial Port"** from the pop-up menu. Though not recommended, connections can also be closed from the server:

* On the server, in the Folders pane of **"My Bluetooth Places"**, select (highlight) **"My Device".**

* In the right pane of **"My Bluetooth Places"**, right-click **"Bluetooth Serial Port"** and then select Stop to close the service. The service must be re-started before it will be available to remote devices (right-click Bluetooth Serial Port and select Start from the pop-up menu).

3.9. ActiveSync setting

ActiveSync setting for Windows

1.Right-click on *Bluetooth Configuration* icon from the toolbar in the desktop window. Select *Setup* and then open *Configuration* window.

2. Select *Local Service* tab from the Bluetooth Configuration window. In the *Service Properties* window, please learn by heart the current COM port this computer uses, for example: COM 6, in order to identify this value with the configuration of Microsoft ActiveSync later.

- The application name-- to change it, highlight the existing name and enter the new name.
- Enable or disable secure connection. To enable secure connection, place a checkmark in the box.

3.11.Personal area network setting for windows

The Personal Area Networking (PAN) chapter will show you how two or more Bluetooth enabled devices can form an ad-hoc network and how the same mechanism can be used to access a remote network through a network access point.

How to setup an Ad-hoc Network

1. On the client, in the Folders pane of **"My Bluetooth Places"**, select **"Entire Bluetooth Neighborhood"**.

2. In the right pane of **"Entire Bluetooth Neighborhood"**, right-click anywhere *except on a device name* and select Refresh from the pop-up menu.

How to setup with Bluetooth Network Access Point

The Bluetooth Software makes it easy to join an existing personal network, hosted by another Bluetooth device (PocketPC, desktop, etc.) From the **My Bluetooth Places**, choose **Entire Bluetooth Neighborhood**, and select the Bluetooth device that you want to establish a PAN connection and double click the device icon.

Right click the NAP Service and select **"Connect to Network Access Point"**, your PC will get an IP address from the Network Access Point.

At this moment, you might be prompted to enter the IP network settings; if this is the case, choose "**Obtain an IP address automatically**" from your Bluetooth Network TCP/IP setting.

After selecting the host, a connection will then be established between your PC and the host over the personal network.

4

Chapter4

Setup for PocketPC2000 & PocketPC 2002

(1) Make sure your PDA is connected with your PC, CF Bluetooth card securely sits in the PDA'S CF slot, and the installation disk in your PC's CD-ROM, the Setup program should launch automatically.

If Setup does not launch automatically, use Windows Explorer to navigate to the appropriate CD-ROM drive and double click on **"bsetup"**.

(2) Select CF Bluetooth "Software Installation Programs"-> "PocketPC2000 & PocketPC2002 (WinCE)" at Setup dialog box.

- (3). Follow the instructions on the screen:
- a) On the Welcome screen, click the Next button.

b) When the *License Agreement* screen is displayed, read the License Agreement, then click **"Yes"** to go to the next step.

WIDCOMM BTW-CE Setup	×
License Agreement	
Please read the following license agreement carefully.	
Press the PAGE DOWN key to see the rest of the agreement.	
WIDCOMM, INC. ("WIDCOMM") IS WILLING TO LICENSE THE WIDCOMM SOFTWARE ACCOMPANYING THIS LICENSE AGREEMENT (THE "SOFTWARE") TO YOU ONLY ON THE CONDITION THAT YOU ACCEPT ALL OF THE TERMS IN THIS AGREEMENT. PLEASE READ THE TERMS CAREFULLY. BY CLICKING ON THE "YES" BUTTON YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTAND IT AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO THESE TERMS, WIDCOMM IS UNWILLING TO LICENSE THE SOFTWARE TO YOU, AND YOU SHOULD CLICK ON THE "NO" BUTTON TO DISCONTINUE THE INSTALLATION PROCESS.	
Do you accept all the terms of the preceding License Agreement? If you choose No, the setup will close. To install WIDCOMM BTW-CE 1.3.1 Software, you must accept this agreement.	
< <u>B</u> ack <u>Y</u> es <u>N</u> o	

c) On the Setup Type screen, click "Typical" and click "Next" to accept the default setting.

WIDCOMM BTW	-CE Setup		
Setup Type Select the Setup Type to install.			
Click the type o	of Setup you prefer, then click Next.		
 Typical 	Program will be installed with the most common options. Recommended for most users.		
○ <u>C</u> ompact	Program will be installed with minimum required options.		
Custom	You may choose the options you want to install. Recommended for advanced users.		
InstallShield			
	< <u>B</u> ack <u>N</u> ext > Cancel		

d) The system will start installing all the necessary setup files.

e) When the installation is completed, click the "Finish" button on the Completed screen.

WIDCOMM BTW-CE Setup	
	The installation of WIDCOMM BTW-CE 1.3.1 Software was successful!
	Setup has finished installing WIDCOMM BTW-CE 1.3.1 Software on your computer.
	< Back Finish Cancel

f) On the handheld (PDA) device:

Tap "Yes" to accept the default directory and install the software.

g) A Welcome screen will be shown with basic instructions to use BTW-CE.

h) Check off **"Add a shortcut in the Start menu"** in order to have access to the **"Bluetooth Manager"** from the Start menu.

i) Perform a **"soft"** reset to the handheld computer. Refer to your device's documentation for the exact procedure.

NOTE:

A soft reset leaves installed applications and stored data intact, and simply restarts the device.

A hard reset deletes ALL downloaded applications on the handheld. See the handheld computer's documentation for additional information.

Bluetooth Control Panel:

Configuring BTW-CE

BTW-CE provides a Control Panel to adjust Bluetooth settings.

To access the Control Panel, tap the Bluetooth icon in the lower-right corner of the Today screen.

BTW-CE can have multiple saved configurations. Individual configuration sets are saved in profiles, which can be quickly loaded to meet the appropriate situation.

The Control Panel has seven tabs. All tabs are not visible on the screen at the same time; use the arrows to the right of the tab names to scroll back-and-forth and expose the different tabs.

There are server tabs in the control panel:

* General

User profile selection

Bluetooth status (ON/OFF) indicator

Hardware power control (ON/OFF)

Shortcut to the Bluetooth Manager.

* Accessibility

Set the device name

The card's Bluetooth Device Address (Bd_Addr)

Determine which remote devices are allowed to connect

Determine whether this PocketPC can be seen by other remote devices.

* Service tabs-BTW-CE can provide four services. They are:

File Transfer-Sets the highest-level of directory on this PocketPC that the remote devices will have access to.

Information Exchange-Sets the default business card (Pocket Outlook contact entry)

Serial Port-Bluetooth serial port information

Dial-up Networking-configure the COM port, baud rate and flow control.

* About - there are no configurable options on this tab.

Software version information

Copyright information

Website and Technical Support links

There are three options on this screen:

* **Current Profile**: to change the active profile, tap the down-arrow in the "Current profile:" field and select the new profile from the drop-down list. The current profile will be saved, and the settings from the selected profile will be loaded. To add, delete, or rename a profile, tap.

* Bluetooth Status:

Integrated Bluetooth hardware.

External Bluetooth hardware (Compact Flash or PC expansion card)

* Bluetooth Manager:

Tapping on this shortcut starts the Bluetooth Manager.

When Bluetooth is OFF, no connections, incoming or outgoing, are possible.

When Bluetooth is ON, Bluetooth is always "Up" and battery drain is significantly greater than when Bluetooth is disabled. *To conserve battery power, do not enable Bluetooth when it is not being used.*
