Safety Precautions

The following safety precautions are intended to prevent unforeseen hazards or damage in advance by using the product safely and correctly.

WARNING

Failure to observe these instructions could result in death or serious injury.

CAUTION

Failure to observe these instructions could result in personal injury or property damage.

WARNING

When installing

- Please contact a service center or installation shop to install the product.
 - It may cause fire, electric shock, explosion or injury.
- Please contact a service center or industry professional to install this product
 - It may cause fire, electric shock, explosion or injury.
- Do not disassemble, repair or modify the product.
 - It may cause fire or electric shock.

When using

- Do not place a heating device near the product.
 - It may cause fire.
- Do not spill water inside the product.
 - It may cause electric shock or failure.
- Do not direct an electrical short circuit to this product
 - Giving a shock to the product may cause malfunction.
- Do not damage the product with a sharp and pointy object, etc.
 - It may damage the parts and cause failure.

CAUTION

When using

- Do not clean with strong solvent-based detergent. Use a soft cloth.
 - It may cause fire or product deformation.
- Do not touch with wet hands or pull the connecting cable.
 - It may cause electric shock or failure.

BEFORE USE OR INSTALLATION

Precautions for ZigBee dongle Installation

- It must be installed by a professional installer.
- The ZigBee thermostat should be installed within 30 meters.
It is recommended to be installed near the product.
- Install in a place free from electromagnetic interference.
It may cause malfunction of the product.
- If there is a wall or obstacle between the ZigBee dongle and the ZigBee thermostat, communication issues may occur.
- If it is attached to steel structures such as H beams, steel plates, indoor cabinets, etc., communication issues may occur
- Do not install the product in a place with high temperature or humidity such as a kitchen or bathroom.
- Install at least 1cm away from the metal panel.
- Can not use a WiFi dongle and a ZigBee dongle at the same time.
- If user have a WiFi dongle installed, unplug it and connect ZigBee dongle.

Note

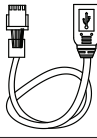

- * ZigBee dongle is equipped with Thermostat Cluster Server and Fan Control Cluster Server.
- * ZigBee thermostat should be equipped with Thermostat Cluster Client and Fan Control Cluster Client.
- * It can be used after ZigBee join and bind process.
- * It will not work on a general thermostat without Zigbee capabilities

ZIGBEE DONGLE INSTALLATION

ENGLISH

Components

Installation Parts

Name	Quantity	Appearance
ZigBee Dongle	1	
USB Cable (120 cm)	1	
Manual	1	
Double-sided Tape	2	

Installation Equipment

SPECIFICATIONS

FCC Notice

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This equipment should be installed and operated with a minimum distance of 20 cm (7.8 inches) between the antenna and your body. Users must follow the specific operating instructions for satisfying RF exposure compliance.

Industry Canada Statement

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This device may not cause interference.
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

IC Radiation Exposure Statement

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 cm (7.8 inches) between the antenna and your body.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
