Subject: Final Questions from FCC for LG

Hi Raymond:

In order to finalize the Grant of equipment authorization procedures, FCC has instructed us to inform you the following issues:

1. SGS Report File No. : F690501/RF-SAR001823-A2: Page 16 of 76 and Page 17 of 76: Please remove the following statement from SAR test report but keep the "Notes : Body SAR evaluation for HSDPA and HSUPA was conducted in Sub-test 1." Once you have done, please submit revised SAR test report.
2. Please inform LG that Due to the distance between the antenna and end user, FCC and TCB are not requesting HSPA SAR to be repeated for sub-test 5, even though output power is higher than Rel 99 due to MPR implementation. In subsequent permissive change filings, this will need to be reconsidered based on module changes and/or antenna location changes.

Best regards,

Chris Harvey
