

## Technical Justification letter for SAR Evaluation

December 4, 2012

FCCID: BEJBL100  
IC Number: 2703H-BL100

**The SAR evaluation is not required when the average power is less than 60/f(GHz).**

The Max. peak power is **9.70 dBm**.

Calculation =  $60 / 2.480\text{GHz} = 24.19\text{mW} = \mathbf{13.84\text{dBm}}$

According to above comparing, the SAR evaluation is not required.
