Subject: RE: Questions Regarding FCC ID: BEJCT810 (Class II)

Hi Greg,

Per our discussion yesterday, we were asked to do a spot check of the WLAN and BT radiated emissions of the CT815. The results are within the 3dB tolerance from the previously measured data so there is no significant degradation of performance.

Thanks,
Dan

Subject: Questions Regarding FCC ID: BEJCT810 (Class II)

To: Mr. Bong Hyo Han / LG Electronics Inc.

From: Mr. Gregory Czumak / PCTEST TCB

RE: FCC ID: BEJCT810

Applicant: LG Electronics Inc.

Correspondence Reference Number: BEJ90712

Confirmation Number: 906030712

Date of Original Email: June 8, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. Since you saw the need to remeasure the 15B spurious radiated (and AC Line conducted) emissions, please confirm that the BT and WLAN spurious radiated emissions were also investigated, and that they

exhibited no degradation (in other words, the results dictate a Class I Permissive Change for these devices).

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
