Subject: Re: Follow-Up Questions Regarding FCC ID: BEJGU285F
Importance: High

Hello PCTEST TCB,
Thank you for your e-mail.
Please forget the second test report as I mentioned before.
Your comment is about SAR for 3Tx & 4Tx of GPRS850 band.
Therefore, we just did SAR testing for 3Tx & 4Tx again.
After re-testing, we got new data for 3Tx & 4Tx and just updated the test results only.
In this case, do we have to re-test SAR for all Tx(1~4Tx)?
If necessary, we'll re-test all Tx(1~4Tx) for GPRS850 band right away.
Please give me your response.
Thank you!

Best regards
Han.

Date of Original Email: September 15, 2009

Subject: Follow-up information

In regards to your recent TCB application referenced above, we kindly request that

you provide the following additional information.

1. Thank you for your email. Regarding your response, please explain why the second SAR report submitted showed equal power drifts to the original SAR report measurements for 3TX and 4TX, but SAR levels twice as high as the originally reported SAR, while the latest SAR report shows power drifts that are different, but SAR levels that are the same as in the second SAR report. What has changed to cause this?

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
