

1) Please provide ambient noise for both ABM1 and ABM2.

[Please find attached updated T-coil Report including ambient noise measurements on Page 20.](#)

2) Please provide additional information for the 3G justification. Please provide clear descriptions of all the phones capabilities and modes of operations. Please provide more details about the test equipment setup during the pretest such as probe location, orientation, and frequency weightings. Also, please add an ABM2 (value) measurement.

[Please find attached updated T-coil Report including additional information for 3G justification, including modes of operations, pre-test probe location, orientation and frequency weightings and ABM2 measurements in Page 23.](#)

3) Please address the version of the RF emission test used. To avoid consequences to the applicant the TCB must assure that both ratings use the same standard.

[Please find attached updated HAC RF Emissions Test Report under ANSI C63.19-2006.](#)
