

Technical Justification letter for SAR Evaluation

October 18, 2012

FCCID: BEJMR400D
IC Number: 2703H-MR400D

The SAR evaluation is not required when the average power is less than $60/f(\text{GHz})$.

The Max. peak power is **10.40 dBm**.

Calculation = $60 / 2.480\text{GHz} = 24.19\text{mW} = \mathbf{13.84\text{dBm}}$

According to above comparing, the SAR evaluation is not required.
