ATTESTATION

RE: Attestation of Indoor (low-power) Client Operation

FCC ID: BEJNT-16T90TP

Dear Examiner,

We, (LG Electronics USA, Inc.) , attest that this device complies with the following requirements of the FCC's rules for the 6GHz bands:

1. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
2. This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network.
These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel.
These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
3. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.
4. We acknowledge this device is subject to and in full compliance with the device restrictions listed below. All users are notified of these restrictions through the user manual.
5. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.
