

Below is our answers

- 1) We have revised Functional Block Diagram.
- 2) We have revised EUT internal photos.
- 3) We have revised EUT internal photos.
- 4) This device is set under 4dB by the manufacturer.
- 5) AC conducted emissions has been evaluated at TX mode of operation and found to be identical to the data (Page 17-20) provided in the test report.
- 6) This device was tested in all 3 axis.  
The test data in this report only documents the worst case
- 7) The channels 12 and 13 have been disabled by the manufacturer. these two channels will not be used in USA.

Thank you

Best Regards
