Dear Frank:

Transmitted herewith, on behalf of LG Electronics Inc., is an amendment provided in response to the request for technical information dated June 15, 2001.

1. Please find attached the revised test data.
2. We would like to confirm that the justification for the reported mixture is that it will lead to an overestimation of the SAR measurement value. This takes into account the measurement error and uncertainty for demonstrating compliance.

We trust this information is sufficient to issue the grant as soon as possible. If you have any further questions, please do not hesitate to contact us.
