

Regarding your answer to question 1 Please readdress per telecon with Mr. Perrine and PCTEST on 5 October to include description of the phones capabilities and modes of operation. Modes that support at ear voice use should be further investigated as part of subset testing justification for HAC. Please provide additional related information to support SAR testing in accordance with FCC policy.

[Please find attached phone capabilities in operational description per 5 October telecon.](#)

Regarding your answer to question 5 we could not locate the offset RF scan contour plot centered on the T-coil. Please locate.

[Please find attached Pages 21-22 with offset RF scan data.](#)
