Re: Certification for LG Electronics WCFDM00N2A Series
IC: 2703H-WCFDM00N2A

If necessary, we have enclosed application materials for certification of LG Electronics WCFDM00N2A Series. It has been verified to comply with ISED RSS-216v2.

Current Variants:

There are three hardware variants of the EUT: WCFDM00N2A1 with cooling fan, WCFDM00N2A5 without cooling fan, and WCFDM00N2A3 without cooling fan or top rubber pad. All employ identical WPT circuitry and antennas, but the unit with the cooling fan includes a fan control IC populated on the PCB. The unit with the cooling fan populated is fully tested herein and was confirmed to be the worst case variant.

If there are any questions regarding the application or testing performed, please contact us at the above address or call (734) 252-9785, or e-mail info@wrtest.com.

Sincerely

Joseph D. Brunett
