

Safety Information

- Your wireless handheld portable transceiver is a low power radio. When the PTT button is pushed it sends out radio frequency (RF) signals. In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for hand-held wireless phones.

Important: To maintain Compliance with the FCC's RF exposure guidelines, if you wear a handset on your body use only the Audiovox supplied carrying case, holster or other body-worn accessory for this product and ensure that the antenna is at least 1 inch (2.5 centimeters) from your body when transmitting.

Use only the supplied antenna. Unauthorized antennas, modifications, or attachments could damage the transmitter and may violate FCC regulations.

Normal Position: Hold the transmitter approximately 1" from your face and speak in a normal voice, with the antenna pointed up and away.
