**Response to TCB questions**

Dear Mr. Curtis:

Further to your email below, here are the answers to your questions:

1. Yes, a new battery was used for the testing.
2. Attached, please find a certification agreement signed by Chip Irvin at Desa International.
3. Yes, a peak detector was used for column 4 of page 13.
4. The labels are coated with polyester and use a permanent adhesive on the back of the label for application to the product.

I trust the above will enable you to complete the certification.

Thank you,

Mrs. Ruby Dulmage
