Re: FCC ID:BJIB-SX

Gentlemen:

Submitted herewith is an application for a UHF frequency transmitter module to be used in a series of barcode printers having essentially same form factor. The transmitter module was tested installed in a printer that was representative of the line of models that will have the transmitter module installed in them. These printers are identified in the following manner: B-SX4T-XXXX-XX and B-SX5T-XXXX-XX where the X's represent features changes only such as color, resolution, etc. These features do not affect the radiation from the units.

If there are any additional questions, please contact me at 410-531-3439.

Sincerely yours,

Phillip Inglis
