RE: Tatung Co.

FCC ID: BJM-KA1

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) The newly provided photographs for the antenna distance seem to indicate that the antenna distance is only 2 cm. If this is the case, then SAR would be required for FCC. Alternatively, to avoid SAR, both the EIRP and conducted power would need to be reduced below 24 mW levels
