RE: Tatung Co.

FCC ID: BJM-KL1

After a review of the submitted information, I have a few comments on the above referenced Application.

- 1) Users manual contains 20 cm statements. This appears not appropriate given the use of the device. Please remove statements relative to distance, but keep the non-colocation statements in the manual. Please review & correct.
- 2) Antennas in this device exist on two different boards in 2 different locations. Do both TX? If so, have both been evaluated to show/determine worse case?
- 3) Thank you for the many photographs to show the > 2.5 cm distance to the radiating element. Unfortunately it took awhile to piece together the photos. Kindly add line/information/markings on the device when shown on the head phantom to clearly denote where the antenna is located when showing the external photograph with the ruler.
- 4) IC requires RX emissions to be tested/shown as well. It does not appear this information was provided. Please review.
- 5) IC RSS-102 has different exemption requirements than the FCC for SAR. Please note that according to RSS-102, SAR is required. Please review and complete RSS-102 attestation Appendix A which was previously left blank.
- 6) FYI....For future bandwidth tests for this type of signal, kindly use a much smaller span (i.e. 2 – 5 MHz).
- 7) FYI....Equipment codes for 15.247 on the 731 form should be DTS or DSS – depending on the device, not DXX.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
