Class II permissive change request

This is a request for a Class II Permissive Change covered by the above FCC ID.

The requested change is the addition of two bands: 5.25GHz – 5.35GHz and 5.47GHz – 5.75GHz, the DFS capability within those two bands.

The device now updated firmware to open above two bands and include DFS functionality which is the basis for this submittal.

The test result shows that the emission is better than that original version and complies with FCC Class II Permissive Change request.

Sincerely

Chung Chang / Senior Manager
TATUNG CO.
