

Description about the label

We will ensure that it is not inserted in the lid of another equipment

【Processing labels】

Labeling method carves letters and logos with laser.

It can't be easily peeled off

【Lid processing】

It can't be replaced with a lid of another model

Because it is not general purpose, we do original thread processing.

And it is not the size of general screw standard

【Usage assumption when the lid is removed】

The back of the lid holds the battery. When it gets out, the battery drops with shock. It can't be used.

【Loss of lid】

Unfortunately, if the customer loses the cover, manufacturer repair is necessary

We do not sell only the lid.

Only this watch can't communicate with this equipment.

Therefore, it can't connect to other EPSON's same model, general equipment, telephone, etc.
