

## **Operational Description**

This device is a 2.4GHz Wireless LAN MINI USB module which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by host equipment. The antenna is Fractal antenna without antenna connector.

For more detailed instruction, please take a look at the user's manual.
