RE: Declaration Letter

This letter is to confirm the fact that our True Choice Digital Monitors:

- FCC ID: BMWTFY7292C Model: Y7291C
- FCC ID: BMWTFY7292P Models: Y7289P, Y7291P and Y7292P

are being shipped without the batteries installed and therefore the end-user will be able to see the FCC ID number located in the battery compartment during battery installation before first use.

The battery compartment is accessible without the use of a specialized tool. The only tool required is a regular flat blade screw driver that is commonly available in a regular household.

Please note that Model: Y7289C with FCC ID: BMWTFY7292C is not listed above. This model does not use batteries and has the FCC ID number on outside of the unit.

Sincerely,

Joseph Gheith
