Subject: KTV GLOBAL CORPORATION, FCC ID: BRFLT104AA1, Assessment NO.: AN07T6466, Notice#1

Dear Ms. Helen,

Thank you for your cooperation and kindness.

Regarding the Assessment No. AN07T6466, we would like to inform you as followings,

Question #1: The test report shows quasi-peak measurements were substituted for average measurements, which is wrong. The limit specified in 15.239 is average, please report average and peak readings instead.

---> [Please refer to attached revised test report.](#)

Question #2: The test report bandwidth results - page 10 does not agree with page 11. Please revise the test report.

---> [Please refer to attached revised test report.](#)

Question #3: The operational description indicates that the device is using BH1415F transmitter IC. But the schematic diagram in the filing does not contain it. You may need to submit a complete schematic diagram.

---> [Please refer to attached additional schematic diagram.](#)

We are sorry that our response is too late.

If you have any question, please feel free to contact us.

Best Regards,

S. C. Hong / Project Engineer
