RE: FCC ID: BRWDAMTX10

Dear Gentlemen,

The enclosed documents constitute a formal submittal for a Class II permissive change the above referenced FCC ID. The permissive change requests that the RF classification be changed from mobile (>20cm separation) to handheld portable.

There have been no changes to the product in order to allow for this usage.

Please see the attached RF exposure calculations to show that the device meets the FCC requirements for handheld device.

Regards,

Mark Hill
