RE: FCC ID: BRWDSMTX10

Dear Gentlemen,

The enclosed documents constitute a formal submittal for a Class II permissive change the above referenced FCC ID. The permissive change requests that the RF classification be changed from mobile (>20cm separation) to handheld portable.

There have been no changes to the product in order to allow for this usage.

Note, there has been a change to the operational description to reflect the worst case duty cycle to support the RF exposure calculations.

Please see the attached RF exposure calculations to show that the device is below the general RF Exposure threshold.

Regards,

Mark Hill  
Elliott Laboratories
