November 14, 2008

Gentlemen:

I am writing to avoid the possibility of an inadvertent disclosure of proprietary information.

Included as exhibits in our application for Class II permissive change is a detailed description of the Theory of Operation of the device. We ask that this portion of our application be withheld from public inspection as provided under FCC section 0.459. This document contains details of the proprietary operation of our product and constitutes trade secrets. Therefore, we request it be withheld from public inspection.

Sincerely,

A handwritten signature in black ink, appearing to read "S. A. Hall".

Steven A. Hall
