

Date: 2019-11-08

To Whom It May Concern:

This is a request for a Class II Permissive Change to FCC ID: BRWSR6100AT, which was granted on May 15, 2019 and IC: 6157A-SR6100AT which was granted on May 10, 2019. The unit was granted FCC listing with a 5-inch antenna, model number SPM-ELASY-000066. We would like to add a 9-inch antenna, model number SPMSR6110AT to our certification, so that the unit could come with either the 5-inch antenna or the 9-inch antenna.

The firmware/hardware version (RF characteristics, circuitry design and functional capabilities) are all not changed. Only the antenna length is changed from 5-inch to 9-inch. This modification can meet the requirements of CIIPC. We have had the unit tested with the 9-inch antenna to ensure that compliance with the original grant is maintained.

The antenna information as below:

Antenna Model	Antenna Type	Length	Gain	Manufacturer
Original Antenna: SPM-ELASY-000066 	Monopole Antenna	5-inch	2dBi	Hobby
New Antenna: SPMSR6110AT 	Monopole Antenna	9-inch	2dBi	Hobby
