### LOCATION OF FEATURES / UBICACION DE LOS BOTONES / EMPLACEMENT DES BOTONS

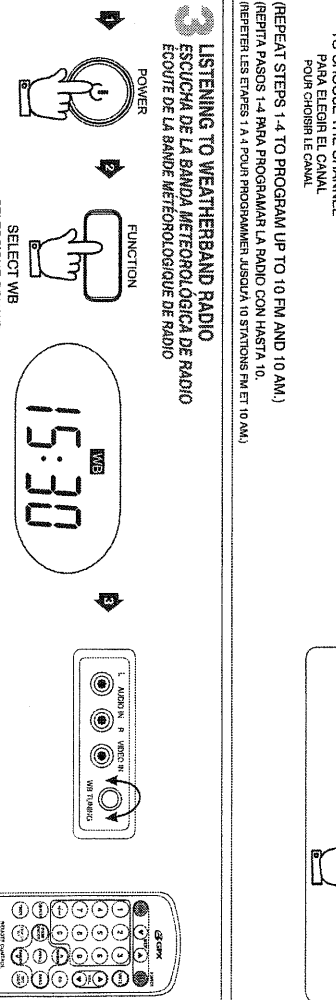

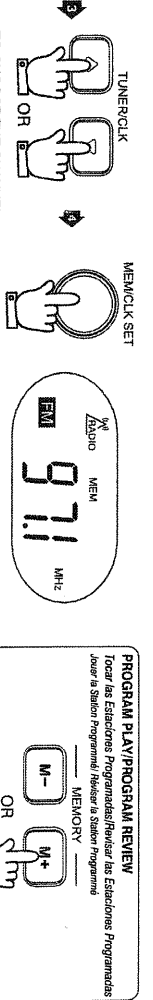

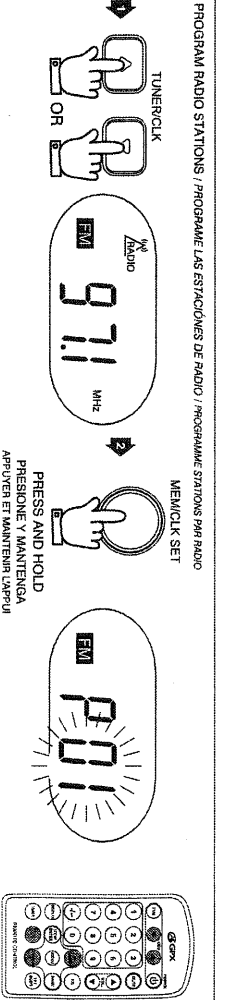

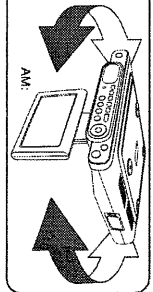

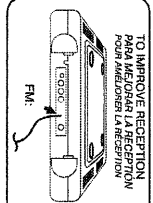

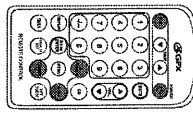

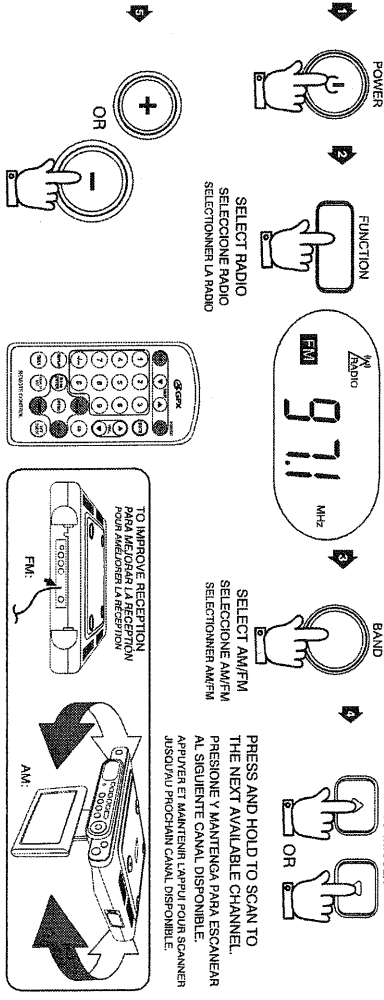

**NOTE:** Battery is for one battery only. The life of the unit depends on the type of battery used. Always use the same type of battery. Do not mix old and new batteries. Do not use different brands of batteries. Do not use rechargeable batteries. Do not use batteries with a different voltage than the one specified. Do not use batteries with a different capacity than the one specified. Do not use batteries with a different number of cells than the one specified. Do not use batteries with a different internal resistance than the one specified. Do not use batteries with a different internal temperature than the one specified. Do not use batteries with a different internal humidity than the one specified. Do not use batteries with a different internal pressure than the one specified. Do not use batteries with a different internal vibration than the one specified. Do not use batteries with a different internal magnetic field than the one specified. Do not use batteries with a different internal electric field than the one specified. Do not use batteries with a different internal gravity than the one specified. Do not use batteries with a different internal acceleration than the one specified. Do not use batteries with a different internal rotation than the one specified. Do not use batteries with a different internal oscillation than the one specified. Do not use batteries with a different internal wave than the one specified. Do not use batteries with a different internal pulse than the one specified. Do not use batteries with a different internal frequency than the one specified. Do not use batteries with a different internal wavelength than the one specified. Do not use batteries with a different internal period than the one specified. Do not use batteries with a different internal phase than the one specified. Do not use batteries with a different internal amplitude than the one specified. Do not use batteries with a different internal frequency than the one specified. Do not use batteries with a different internal wavelength than the one specified. Do not use batteries with a different internal period than the one specified. Do not use batteries with a different internal phase than the one specified. Do not use batteries with a different internal amplitude than the one specified.

## **Caution:**

Changes or modifications to this unit not expressly approved by the party responsible for compliance will void the user's authority to operate the equipment. Any change to the equipment will void FCC grant.

## **NOTE:**

This equipment has been tested and found to comply with the limits for a digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
