Statement Regarding Ad Hoc Mode

FCC ID: BV5SMALLENGINE

IC: 3775A-SMALLENGINE

Dear Examiner,

This is to inform that the B & O device (with the above mentioned FCC ID and IC Number) software and associated drivers will not initiate any transmission on DFS frequencies in non associated mode. This includes transmissions for beacons and other control signals. An ad-hoc or peer-to peer mode on “non-US” frequencies or on “DSF frequencies” is not supported.

If you have any questions regarding this application, please feel free to contact me.
