Re: Request for withholding from public disclosure proprietary information submitted pursuant to an application for certification for a low power transmitter.

FCC ID: BVCAMB9010

Dear Sir or Madam:

Sensormatic Electronics Corporation requests certain materials submitted with this application for certification of device FCC ID: BVCAMB9010 be withheld from public disclosure. This request is made under the provision of FCC DA 04-1705 dated 6/15/04, 47 CFR 0.457 (d), 0.459, and 5 USC 552(b)(4) Freedom of Information Act, Trade Secrets.

The items for which confidentiality is requested include the Operational Description, Block Diagram and Schematic Diagrams. This information contains proprietary information (trade secrets) regarding the circuit operation and capabilities (specific values of components, circuit design details and system architecture) which are the result of our extensive investment in research and development. Without the disclosed information, competitive organizations would take considerable more time to assess and develop a workable competitive product. As a result, we believe that disclosure of these company-guarded materials would compromise our leading position in this market.

We therefore formally request that the materials identified "Confidential" be kept strictly confidential and not made available for inspections by any other party, except on a need to know basis for the sole purpose of the certification process.

Sincerely,

A handwritten signature in cursive script that reads 'William D. Owsley'.

William D. Owsley
