**Re: Application for a Class II Permissive Change Request to Anti-Pilferage Device
FCC ID: BVCAMS9050**

Dear Sir or Madam:

Sensormatic Electronics Corporation, 6600 Congress Avenue, Boca Raton, FL 33487 hereby requests a Class II Permissive Change for the captioned product as set forth in the Federal Communications Commission's Rules and Regulations, 47 CFR 2.1043.

There are no electrical or mechanical changes to the electronic portion of the system. The only change is the addition of a new option to the device to enhance function in detecting the presence of metal foil in the field. Since this option uses a DSP to analyze the signal and report on the condition found, part 15, subpart B tests were performed and found to comply with the requirements of 15.107 and 15.109.

Radiated emissions measurements taken in accordance with 15.209 showed that the emissions levels exceeded those that were originally included with the filing, but continue to comply with the FCC limit. This data is attached. As the product has less margin but continues to comply with the rules, we request a Class II Permissive Change per 47 CFR 2.1043.

Sincerely,

A handwritten signature in black ink that reads "William D. Owsley".

William D. Owsley
