

TO WHOM SO EVER IT MAY CONCERN

Gothenburg, 2<sup>nd</sup> September 2008.

**MODEL DIFFERENCE LETTER, FCC ID: BXZDH4**

This letter is to explain the differences between the different variants of Ascom DH4 handset with the following model numbers:

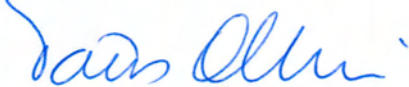

**DH4-BAAA,  
DH4-ACAA,  
DH4-CAAA,  
DH4-DAAA,  
DH4-UCAA and  
DH4-UAAA**

All DH4 handsets will use the same PCB, FPC's and other electrical components i.e. speakers (loudspeaker and receiver), microphone, battery, vibrator and display.

The models without keyboard backlight will not have the LED's and the resistors that are used for the keyboard backlight mounted on the FPC.

The only parts that will differ between the DH4 models are the plastic enclosures and markings on the case.

Very truly yours,

---
