

## TO WHOM IT MAY CONCERN

Gothenburg, 12th September 2017.

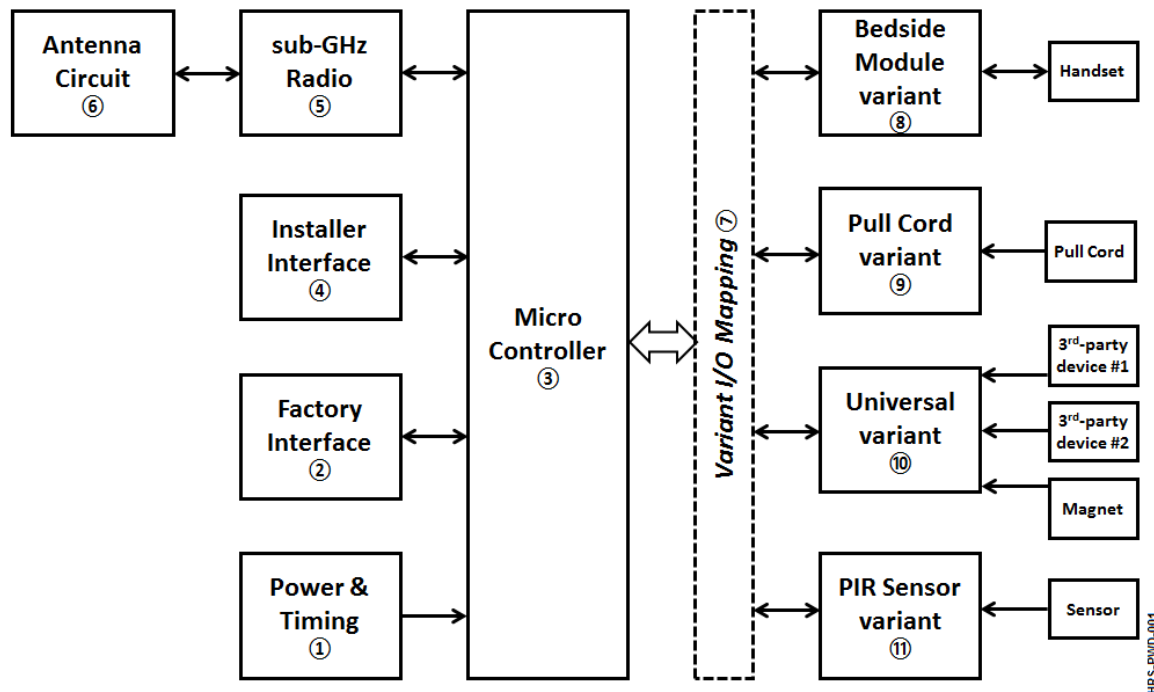

### MODEL DIFFERENCE LETTER

This letter is to explain the differences between NUWIR-903989, NUUTX-903988" and model NUWIR-HU, NUUTX-HU

903989 is the PCBA for NUWIR-HU and 903988 is the PCBA for NUUTX-HU. NUWIR and NUUTX are complete devices with PCBA and plastic covers.

For both of the devices there are no differences regarding RF design and its performance, including PCB, circuits and components.

Both models are electrically and mechanically identical, except that NUUTX ( called Universal variant below) with external inputs and NUWIR ( call PIR sensor below) with PIR sensor input, just have different components for the input handling, see the block schematic below.

Best regards,
