

TO WHO IT MAY CONCERN

Gothenburg, 26th October 2010.

MODEL DIFFERENCE LETTER, FCC ID: BXZWH1

This letter will explain the differences between the variants of Ascom WH1 handset with the following model numbers:

WH1-AAAA (Model i62)

WH1-EACA (Model Alcatel High End)

WH1-EABA (Model Alcatel Entry Level)

All plastic parts will use same material and the only difference is the design (appearance) and colour between models.

WH1-EACA and WH1-AAAA handsets will use the same PCB (Printed Circuit Board), FPC's (Flexible Printed Circuit Board) and other electrical components e.g. speakers (loudspeaker and receiver), microphone, battery, vibrator, antenna and display.

WH1-EABA handset will use the same PCB, FPC's and other electrical components e.g. speakers (loudspeaker and receiver), microphone, battery, vibrator, antenna except for another type of display (Black & White) and display contact.

WH1-EABA will also use another type of material for the keypad and rubber details, compared to WH1-AAAA and WH1-EACA.

Very truly yours,

Lena Kindmark

Certification Engineer
