

April 9, 2015

To whom it may concern.

This letter is to state the following in regard to the tune up procedure for the HME BP2G4A. The HME BP2G4A is a wireless belt pack and the purpose for this letter is to gain FCC certification. The upper tolerance level for this device is

GFSK: 21dBm

BT: 6dBm

This is also reflected in the RF Exposure SAR report number SAR20150309 Revision D, page 3. Each belt pack is tuned and tested on an ATE (automatic test equipment) fixture available only at HME Poway. Among the items tested and verified is frequency and max power. These parameters are not user adjustable.
